Spilling the Beans Too Samuelin MarTinez,2015-07-24 Imagine living in a world that hates you, and becoming aware of this witnessing how that hate hurts your mother daily. At five I held my Ama's tired head and swore an oath, when I get big I will work hard so you won't be so tired. Look through my lens, and see Corporate America exploiting and overexposing my mother to toxic waste, and toxic relationships stressing her native will to protect me from all that she suffered as a child. I invite you to consider my agony and adoring love that inspired this indictment; Corporate America killed my mother! Cancer is not a normal death; it is murder because corporations know their waste is toxic. I provide evidence, beyond a reasonable doubt, that our native maternal relationship was a military target for America to Kill the Indian save the child. How can a

country be so cruel, feel no empathy and deny there was a related American Holocaust? I submit historical evidence that America is a socio-pathic mass murderer. I also charge Corporate America with Child Abuse and Neglect, violating the United Nations Charter on the Human Rights of the Child. The evidence, beyond a reasonable doubt, is the millions of homeless, hungry, sick and under educated children stressed, in the richest country in the world preying In God we Trust. What is feigned love without justice or freedom? A crime confusing profit with prophet. For example, pediatrician Nadine Burke Harris explains that the repeated stress of abuse, neglect has real, tangible effects on the development of the brain. This unfolds across a lifetime with triple risk for heart disease and lung cancer. The related Adverse Childhood Experiences (ACE) Study associations childhood maltreatment and later-life health and well-being. Their focus is toxic parenting, mine is a toxic American history.

Wildlife Photography Joseph F. Classen, 2015-08-17

Wildlife photography is an adventure—and as any great adventure story unfolds, odds are, there are bound to be some great risks involved. Whether it's the risk or the reward—or both—that motivates wildlife shooters, there is one pervasive truth: Preparation is key to success—and survival. In this book, Joe Classen approaches the art of wildlife photography from a hunter's perspective. He teaches readers how to select and use the appropriate specialized photographic gear required for the rigors of wildlife photography—as you'd expect. However, he also teaches you how to mentally and physically prepare for an outing in which your wits must be as keen as your eye. Classen provides detailed insights into planning and packing for a wilderness adventure. Readers will learn how to securely pack their delicate photographic gear for a rugged, outdoor environment but will also learn how to

choose and tote the best clothing for the site, accessories to ensure your personal safety, and even basic cooking and drinking requirements for days spent shooting in remote areas. Once you've scouted your location, you'll learn how to track and lure your photographic subject using time-honored practices (calls—from lust to hunger, to anger and sloth; decoys; attractor scents; working invisibly, etc.) while “shooting” (your camera!) from a blind or stand—or, conversely, by using a more aggressive stalk-and-ambush approach. You'll learn how to read animal behaviors—from eating to mating—and predict how, when, and where your best photographic opportunities will arise—and when your safety should be a greater concern than your shot. With this soup-to-nuts approach, readers will find, in this book, a compendium of information about wild-animal behavior, wilderness survival and safety, the art and science of photographic capture, and even storing and processing your prized digital files once you return home from your adventure. Armed with Classen's suggestions and strategies, you'll maximize your photo opportunities and increase the odds that your wildlife images are the mount-and-frame trophies for which you risked life and limb.

The Logic of Designing Anja Maria

Boxleitner, 2023-09-12 In *The Logic of Designing*, the author unlocks the secrets of the practical designing process and sheds light on the underlying principles and interplay of the various qualities of information. Using an insightful research project set in fascinating Las Vegas, she delves deeply into the nature of visual communication. The book explores the importance of different degrees of abstraction to our perception of the world, drawing on empirical research conducted in Las Vegas. Focusing on visual communication, the authors emphasize that reality is not limited to visual entities or a single level of abstraction. Instead, they show how visual communication involves a dynamic interplay of informational qualities that shape our understanding of reality. In an innovative approach, the author explores both the tangible and intangible aspects of information in design. By deciphering how these qualities interact and merge, the

book offers new insights into how design profoundly affects our perception and understanding of the world. The transparently presented design process allows for an in-depth analysis that specifically uncovers the informational quality of visually non-informative and non-tangible elements. Concrete examples and tangible revelations within the book provide readers with a deeper understanding of the transformative power of design. As the narrative unfolds, readers gain valuable insights into how design shapes our perception of reality, transcending surface appearances. Embark on a captivating journey as the author deciphers the logic and interplay of information qualities in the realm of design. Riding the Wind of Change Peter Hardy,2021-08-05 After five years working in Southern Rhodesia, now Zimbabwe, and South Africa, I decided to return to London overland from Johannesburg, 9000 miles. Early in 1960 I hitchhiked with a Jewish friend to Nairobi, East Africa. From there I continued alone. David wanted to avoid the Moslem lands. From Uganda the Nile carried me to the Sudan, where primitive Nilotic people greeted me. In Egypt I explored the temples of Ramses II carved out of a cliff at Abu Simbel. Later these were relocated avoiding flooding. I hitched through Greece and communist Yugoslavia, eventually returning to my London family, March 1960.
