Mapping Place Names of India Anu Kapur,2019-02-26 This book is the first of its kind to chart the terrain of contemporary India's many place names. It explores different 'place connections', investigates how places are named and renamed, and looks at the forces that are remaking the future place name map of India. Lucid and accessible, this book explores the bonds between names, places and people through a unique amalgamation of toponymy, history, mythology and political studies within a geographical expression. This volume addresses questions on the status and value of place names, their interpretation and classification. It brings to the fore the connections between place names and the cultural, geographical and historical significations they are associated with. Edney,1997 The reshaping of cartographic technologies in Europe into their modern form, including the adoption of the technique of triangulation (known at the time as trigonometrical survey) at the beginning of the nineteenth century, played a key role in the use of the GTS as an instrument of British cartographic control over India. River Ganga P. L. Madan,2005 The Western perception of India has varied widely since antiquity. Early Egyptians and Babylonians had a vague idea about the region; Greeks on the other hand were more aware; geographical perspectives and perceptions changed rapidly; science of cartography swiftly advanced; means of collecting empirical carto-geographical data multiplied rapidly; map-makers were kept busy. Many inaccuracies or fallacies crept in the early stages of map-making, some inevitable, others not so. Map-makers carried on with these inaccuracies not for years or decades, but for centuries. In one map the author was surprised to see that a river Ganga' shown flowing in the south-central region of India, and falling into the Bay of Bengal in Orissa. This river was south-west of the

great delta of the real Ganga or Ganges, coming from the north-west in Bengal, called Bengala in the map. Two Gangas or Ganges in one map! And this in the map by a well-known map-maker of the time. This was one of the reasons for the author's quest for early geographical literature to find out the reasons behind showing Ganga in peninsular India, and the perpetuation of the fallacy for centuries by other respected cartographers as well. This important volume would go a long way in deciphering the mystery and fascination the Indian subcontinent, especially the holy river Ganga has held for cartographers from time immemorial.
