**More iPhone 3 Development** David Mark, Jeff LaMarche, 2010-03-25 Interested in iPhone development? Want to learn more? Whether you're a self-taught iPhone development genius or have just made your way through the pages of *Beginning iPhone 3 Development*, we have the perfect book for you. *More iPhone 3 Development: Tackling iPhone SDK 3* digs deeper into Apple's latest SDK. Best-selling authors Dave Mark and Jeff LaMarche explain concepts as only they can, covering topics like Core Data, peer-to-peer networking using GameKit and network streams, working with data from the web, MapKit, in-application e-mail, and more. All the concepts and APIs are clearly presented with code snippets you can customize and use, as you like, in your own apps. If you are going to write a professional iPhone app, you'll want to get your arms around Core Data, and there's no better place to do so than in the pages of this book. The book continues right where *Beginning iPhone 3 Development* left off with a series of chapters devoted to Core Data, the standard for persistence that Apple introduced to iPhone with SDK 3. Jeff and Dave carefully step through each of the Core Data concepts and show you techniques and tips specifically for writing larger applications—offering a breadth of coverage you won't find anywhere else. The Core Data coverage alone is worth the price of admission. But there's so much more. This book covers a variety of networking mechanisms, from GameKit's relatively simple Bluetooth peer-to-peer model, to the addition of Bonjour discovery and network streams, through the complexity of accessing files via the web. Dave and Jeff will also take you through coverage of concurrent programming and some advanced techniques for debugging your applications. Whether you are a relative newcomer to iPhone development or an old hand looking to expand your horizons, there's something for everyone in *More iPhone 3 Development*. Note: A few of the apps in this book demonstrate technologies not yet supported by the simulator. To run them on your iPhone or iPod touch, you'll need to join one of Apple's paid iPhone developer programs.

The enhanced multitasking, threading, memory management and more are important. Apps are getting more and more complex, including sophisticated game apps that offer virtual or augmented

**Studies in Temporal Urbanism** Fabian Neuhaus,2011-08-04 This book is very much about what the name urbanTick literally says, about the ticking of the urban, the urban as we experience it everyday on the bus, in the park or between buildings. It is about the big orchestrated mass migration of commuters, the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish-eater-trucks. It is also, not to forget, about climate, infrastructure, opening hours, term times, parking meters, time tables, growing shadows and moon light. But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns. The content of this book is based on the content of the urbanTick blog between 2008-2010. One year blogging about this topic brought together a large collection of different aspects and thoughts. It is not at all a conclusive view, the opposite might be the case, it is an exploratory work in progress, while trying to capture as many facets of the topic as possible.

This volume contains 36 original papers reporting the results of research performed throughout nearly the entire length and breadth of the Appalachian region, including all major provinces and geographical areas. *Memoir 206* was designed to commemorate the (near-)fortieth anniversary of the publication of the classic *Studies of Appalachian Geology* volumes that appeared just prior to the application of plate tectonic concepts to the region. The Geo-Doc Mark Terry,2020-02-03 This book introduces a new form of documentary film: the Geo-Doc, designed to maximize the influential power of the documentary film as an agent of social change. By combining the proven methods and approaches as evidenced through historical, theoretical, digital, and ecocritical investigations with the unique affordances of Geographic Information System technology, a dynamic new documentary form emerges, one tested in the field with the United Nations. This book begins with an overview of the history of the documentary film with attention given to how it evolved as an instrument of social change. It examines theories surrounding mobilizing the documentary film as a communication tool between filmmakers and policymakers. Ecocinema and its semiotic storytelling techniques are also explored for their unique approaches in audience engagement. The proven methods identified throughout the book are combined with the spatial and temporal affordances provided by GIS technology to create the Geo-Doc, a new tool for the activist documentarian.

**Mapping Southern Routes of Migrant Women** Sondra Cuban,2022-03-30 Whereas most migration research still focuses on South to North migration, this book shines a light on mobilities within the Global South. Using migration to and within Chile as a case study, the book looks at the experiences of women, who make up a large proportion of migrants within Latin America. Mapping the experiences, aspirations and struggles of women moving to and in Chile, the book exposes the unexpected issues encountered by migrant women in their new destination country, particularly the discrimination that leaves them feeling invisible, unsettled, and, immobile. Within the region there is a long history of feminized migration and domestic labour circuits that spurs migrants' residential movements but slows their social progress. Yet despite these challenges, the migrant women expressed their agency through the support networks they created among their compatriots and their transnational families. Overall, the book demonstrates the growing migrant populations that exist within the Global South and the impact of domestic and care labour markets in driving gendered migration in particular. This book will be of interest to researchers and advanced students in the fields of mobilities and migration, cultural geography, international development, and gender studies, especially those with an interest in Latin America.
