📖 **Starting a Walking Routine for Beginners** Jessica Lawrence,2023-01-25 There are so many reasons walking is good for you, it's virtually impossible to talk about all of them in one short report. So, think of this as a mini primer. Studies show that walking regularly lowers your risk of both heart disease and stroke. Walking gets your heart rate up and causes your body to burn calories. This, in turn, lowers your cholesterol level. According to The Stroke Association, walking for half an hour every day helps to keep your blood pressure in check and reduces your risk of stroke by up to 27 percent. Walking gives your circulation a boost and helps to increase the levels of oxygen in your blood. This actually leads to feeling more energetic after a short (brisk) walk. Walking isn't going to build muscle as effectively as other more strenuous exercises. However, a walking routine does help you burn fat and build some muscle, especially in the legs. Walking gives your calves and your thighs quite a workout. It also helps your glutes. Learn more about walking inside this eBook.

📖 **Walking and Mapping** Karen O'Rourke,2016-02-12 An exploration of walking and mapping as both form and content in art projects using old and new technologies, shoe leather and GPS. From Guy Debord in the early 1950s to Richard Long, Janet Cardiff, and Esther Polak more recently, contemporary artists have returned again and again to the walking motif. Today, the convergence of global networks, online databases, and new tools for mobile mapping coincides with a resurgence of interest in walking as an art form. In Walking and Mapping, Karen O'Rourke explores a series of walking/mapping projects by contemporary artists. She offers close readings of these projects—many of which she was able to experience firsthand—and situates them in relation to landmark works from the past half-century. Together, they form a new entity, a dynamic whole greater than the sum of its parts. By alternating close study of selected projects with a broader view of their place in a bigger picture, Walking and Mapping itself maps a complex phenomenon.
