**36 Dirty Tricks From Ancient China** Chan Joon Yee, 2020-02-17     , often translated as 36 Strategems have always been marketed as a guide for businessmen to give them an edge over their competitors. But make no mistake, these are just 36 dirty tricks used in China over thousands of years in war and swindle. Most of these tricks cannot be ethically applied. Some can be downright criminal. In this book, Singaporean author Chan Joon Yee nakedly illustrates the 36 dirty tricks in their original context with examples from both ancient and modern times. He makes no attempt to market it as a business guide and sincerely hopes that his readers will read it purely for entertainment.

Painting in Stone Fabio Barry,2020-10-27 A sweeping history of premodern architecture told through the material of stone Spanning almost five millennia, *Painting in Stone* tells a new history of premodern architecture through the material of precious stone. Lavishly illustrated examples include the synthetic gems used to simulate Sumerian and Egyptian heavens; the marble temples and mansions of Greece and Rome; the painted palaces and polychrome marble chapels of early modern Italy; and the multimedia revival in 19th-century England. Poetry, the lens for understanding costly marbles as an artistic medium, summoned a spectrum of imaginative associations and responses, from princes and patriarchs to the populace. Three salient themes sustained this “lithic imagination”: marbles as images of their own elemental substance according to premodern concepts of matter and geology; the perceived indwelling of astral light in earthly stones; and the enduring belief that colored marbles exhibited a form of natural—or divine—painting, thanks to their vivacious veining, rainbow palette, and chance images.

Materiality in Roman Art and Architecture Annette Haug, Adrian Hielscher, M. Taylor

Lauritsen, 2021-12-31 The focus of this volume is on the aesthetics, semantics and function of materials in Roman antiquity between the 2nd century B.C. and the 2nd century A.D. It includes contributions on both architectural spaces (and their material design) and objects – types of 'artefacts' that differ greatly in the way they were used, perceived and loaded with cultural significance. With respect to architecture, the analysis of material aesthetics leads to a new understanding of the performance, imitation and transformation of surfaces, including the social meaning of such strategies. In the case of objects, surface treatments are equally important. However, object form (a specific design category), which can enter into tension with materiality, comes into particular focus. Only when materials are shaped do their various qualities emerge, and these qualities are, to a greater or lesser extent, transferred to objects. With a focus primarily on Roman Italy, the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

Natural Stone and Architectural Heritage Giovanna Antonella Dino, Lola Pereira, Lidia

Catarino, 2019-09-23 This book is made up of contributions dealing with heritage stones from different countries around the world. The stones are described, as well as their use in vernacular and contemporaneous architecture. Heritage stones are those stones that have special significance in human culture. Examples include some very important stones that have been either neglected because they are no longer extracted, or stones that have great significance in commercial terms but knowledge of their national and/or international heritage has not been well documented. In this collection of articles, we have

tried to spread awareness of architectural heritage around the world, the natural stones that have been used in its construction, and the need to preserve historical quarries that once provided the source of such stones. Historical quarries are linked to regional culture and tradition. Because of the specific technical and aesthetical characteristics of heritage stones, which have lasted for centuries, these historical quarries should be preserved to be able to use the stones for the proper restoration of monuments and historical buildings to avoid negative actions that can be observed in many places in the restoration of buildings, which are some times part of World Heritage sites. The final intention of this book is to continuously grow the interest on this fascinating subject of heritage stones.
