Shipping in Arctic Waters Willy Ostreng,Karl Magnus Eger,Brit Fløistad,Arnfinn Jørgensen-Dahl,Lars Lothe,Morten Mejlænder-Larsen,Tor Wergeland,2013-07-01 The most comprehensive and richest study undertaken so far of the factors and conditions that will determine the scope and range of shipping and shipping activities in Arctic waters now and in the future. Furthermore, it is the first study comparing the three Arctic transportation corridors, covering a variety of interacting and interdependent factors such as: - geopolitics, military affairs, global warming, sea ice melting, international economic trends, resources, competing modes of transportation, environmental challenges, logistics, ocean law and regulations, corporate governance, jurisdictional matters and rights of indigenous peoples, arctic cruise tourism and marine insurance.

**Geopolitics and Security in the Arctic** Rolf Tamnes,Kristine Offerdal,2014-07-11 Written by a group of leading experts on Arctic affairs, this book offers a historically informed and comprehensive study of the geopolitics and security challenges of the Arctic. The key aim of the work is to identify the conditions for cooperation, stability and peace in the Arctic and to reach beyond simple description and expectation in order to explore in depth some of the main factors that will determine the future of international relations in the region. Furthermore, it addresses key topics such as the geopolitical significance of the Arctic and the importance of oil and gas resources in the Arctic. The book also investigates what the main characteristics of governance in the Arctic are, and

how institutions and regimes can promote stability and security in the region. The volume maintains two layers of focus. The first relates to the dynamics within the Arctic and the second to developments outside the region, highlighting that we cannot understand the Arctic in isolation from global developments such as energy markets, security conflicts and NATO-Russian antagonism. This book will be of much interest to students of Arctic politics, security studies, geopolitics, Russian and Scandinavian politics, and international relations in general.

*Nordic fisheries in transition:* Jeppe Høst, Jens Christiansen, 2018-10-04 In the last decades Nordic countries have been implementing quota markets and similar instruments to manage mainly the economic performance of their fisheries. Coming from a historical situation dominated by owner-operated fishing units closely connected to their supporting communities, market-based fisheries management plays a role in promoting company-organised fishing units, non-fisher owner-ship and new social relations. Introducing market-mechanisms to distribute the limited marine resources is therefore not just a change in the technical regulation. It is an active engagement in social change. The publication reviews the Nordic experiences with market-based fisheries management and discusses the implications for managers and future recruitment.

**Bronze Age Settlement and Land-Use in Thy, Northwest**

**Denmark (Volume 1 & 2)** Jens-Henrik Bech,Kristian Kristiansen,Berit Valentin Eriksen,2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape, settlements and households during the period 1500-1100 BC. Bordering the North Sea to the west, and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research (pollen and palaeo-botanical analyses) with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for students and researchers of the Bronze Age alike.

Global Marine Science and Carlsberg - The Golden Connections of Johannes Schmidt (1877-1933) Bo Poulsen,2016-11-21 In Global Marine Science and Carlsberg Bo Poulsen examines the life and work of the renowned Danish marine scientist, Johannes Schmidt (1877-1933) who made landmark discoveries such as the breeding place of the Atlantic eel in the Sargasso Sea while working for Carlsberg.

**The Law of the Sea and Polar Maritime Delimitation and Jurisdiction** Alex G. Oude Elferink,Donald R. Rothwell,2001-10-17 The climate and other characteristics of the polar regions have been major factors in shaping the legal regime applicable to the polar oceans. In Antarctica, states have had to grapple with the question of how to account for developments in the Law of the Sea, while preserving the compromise over sovereignty contained

in the Antarctic Treaty. The Arctic also has presented challenges for the Law of the Sea, as illustrated by the continued attention given to special rules for polar shipping. The 1982 United Nations Convention on the Law of the Sea has led to substantial agreement on the legal regime of ocean spaces. The present volume explores the impact the Convention has had on the polar regions in this respect, including after its entry into force in 1994. To this end, it looks at a number of issue areas in the field of maritime delimitation (baselines, maritime zones, delimitation of maritime zones between neighboring states) and jurisdiction (environmental protection, navigation and fisheries) from a bipolar perspective. It is strongly suggested that the legal regime of the polar oceans will be further elaborated to more effectively deal with existing activities or to accommodate new activities. It is likely that the United Nations Convention of the Law of the Sea will continue to provide the basic legal framework for this exercise and that states will be careful not to unravel the delicate balance contained in it.

The IMLI Manual on International Maritime Law David Attard, Malgosia Fitzmaurice, Norman A. Martinez Gutierrez, 2014-10-30 This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this is a uniquely comprehensive study of this fundamental area of international law. Volume I: The Law of the Sea addresses the major issues which arise in the law of the sea. It provides a detailed understanding of the historical development of the law of the sea; the role of the International Maritime Organization; the law surrounding maritime zones; the legal regime of islands; the international sea-bed area; the legal regime governing marine scientific research; the rights and obligations of land-locked and

geographically disadvantaged states; the legal regime of Arctic and Antarctic; and the settlements of disputes. This volume also considers the ways in which human rights and the law of the sea interact. The forthcoming Volume II will address shipping law; Volume III will provide analysis of marine environmental law and maritime security law. The full three-volume Manual will set out the entirety of international maritime law, re-stating and re-examining its fundamental principles, how it is enacted, and the issues that are shaping its future. It will be a superlative resource for those working with or studying this area of law.

**The Law of the Sea** Laura Pineschi,Tullio Treves,2021-09-27  
The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common positions of the member States and the results of their coordinated action also emerge from these

essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests.

**The International Law of the Sea** Donald R Rothwell, Tim Stephens, 2023-08-10 Praise for the previous edition: "A complete overview of the subject which does not intimidate the reader but rather spurs interest and understanding in the subject." *European Energy and Environmental Law Review* "... (the book is) scholarly yet accessible and very readable; thoroughly recommended." *Law Institute Journal* Description The law of the sea provides for the regulation, management and governance of the ocean spaces that cover over two-thirds of the Earth's surface. This book provides a comprehensive assessment of the foundational principles of the law of the sea, a critical overview of the 1982 United Nations Convention on the Law of the Sea and an analysis of subsequent developments including many bilateral, regional, and global agreements that supplement the Convention. The third edition of this acclaimed text has been thoroughly revised and updated, and now incorporates a dedicated chapter on natural and artificial islands. All of the main areas of the law of the sea are addressed including the foundations and sources of the law, the nature and extent of the maritime zones, the delimitation of overlapping maritime boundaries, the place of archipelagic and other special states in the law of the sea, navigational rights and freedoms, military activities at sea, marine scientific research, and marine

resource and conservation issues such as fisheries, marine environmental protection and dispute settlement. The book also takes stock of contemporary oceans governance issues not adequately addressed by the Convention. Overarching challenges facing the law of the sea are considered, including how new maritime security initiatives can be reconciled with traditional navigational rights and freedoms, the need for stronger legal and policy responses to protect the global ocean environment from climate change and ocean acidification, and work on a new agreement for the conservation and sustainable use of marine biological diversity in areas beyond national jurisdiction.
