Francis D. K. Ching

Architecture Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

The Green House Mario Vargas Llosa, 1995-01-01 A South American city is divided when a strange green house is built across the river. For young girls and the men of Puira, the house is a night-time pleasure oasis. For the religious and moral forces in the city, the green house is the incarnation of the Devil - an evil that must be destroyed.

Policing Democracy Mark Ungar, 2020-03-03 2011 Winner of the Charles H. Levine Memorial Book Prize of the International Political Science Association Latin America's crime rates are astonishing by any standard—the region's homicide rate is the

world's highest. This crisis continually traps governments between the need for comprehensive reform and the public demand for immediate action, usually meaning iron-fisted police tactics harking back to the repressive pre-1980s dictatorships. In *Policing Democracy*, Mark Ungar situates Latin America at a crossroads between its longstanding form of reactive policing and a problem-oriented approach based on prevention and citizen participation. Drawing on extensive case studies from Argentina, Bolivia, and Honduras, he reviews the full spectrum of areas needing reform: criminal law, policing, investigation, trial practices, and incarceration. Finally, *Policing Democracy* probes democratic politics, power relations, and regional disparities of security and reform to establish a framework for understanding the crisis and moving beyond it.

World Report on Violence and Health World Health Organization, 2002 This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

The Juno Mission Scott Bolton, 2018-09-14 The Juno mission to Jupiter is one of the most ambitious, daring and challenging solar system exploration missions ever conceived. Next to the Sun, Jupiter is the largest object in our solar system. As such, it is both a record and driver of the formation and evolution of the planets - - no other object in our solar system can tell us more about the origin of planetary systems. Understanding the details of giant planet formation, structure, composition and powerful magnetospheric environment required a new perspective close up and over the poles of Jupiter -- an orbit never before attempted.

Juno was specifically designed for this challenge, entering into the harshest planetary environment known in the solar system. This volume describes the mission design, scientific strategies and instrument payload that enable Juno to peer deep into Jupiter's atmosphere and reveal the fundamental process of the formation and early evolution of our solar system. In these papers, the Juno instrument teams describe their investigations, which include gravity radio science, microwave radiometers, magnetometers, an infrared imager auroral mapper, an ultraviolet imager and spectrograph, a visible light imager known as JunoCam, low and high energy particle detectors and plasma wave and radio electromagnetic sensors. The articles also describe a radiation monitoring experiment and the extensive laboratory measurements undertaken to assist with the analysis and interpretation of Juno's pioneering investigation of Jupiter's deep atmosphere. Towards a General Theory of Translational Action

Katharina Reiss, Hans J Vermeer, 2014-04-08 This is the first English translation of the seminal book by Katharina Reiß and Hans Vermeer, *Grundlegung einer allgemeinen Translationstheorie*, first published in 1984. The first part of the book was written by Vermeer and explains the theoretical foundations and basic principles of skopos theory as a general theory of translation and interpreting or 'translational action', whereas the second part, penned by Katharina Reiß, seeks to integrate her text-typological approach, first presented in 1971, as a 'specific theory' that focuses on those cases in which the skopos requires equivalence of functions between the source and target texts. Almost 30 years after it first appeared, this key publication is now finally accessible to the next generations of translation scholars. In her translation, Christiane Nord attempts to put skopos theory and her own concept of 'function plus loyalty' to the test, by producing a comprehensible, acceptable

text for a rather heterogeneous audience of English-speaking students and scholars all over the world, at the same time as acting as a loyal intermediary for the authors, to whom she feels deeply indebted as a former student and colleague.

Indigenous Language Revitalization Jon Allan

Reyhner, Louise Lockard, 2009 This 2009 book includes papers on the challenges faced by linguists working in Indigenous communities, Maori and Hawaiian revitalization efforts, the use of technology in language revitalization, and Indigenous language assessment. Of particular interest are Darrell Kipp's introductory essay on the challenges faced starting and maintaining a small immersion school and Margaret Noori's description of the satisfaction garnered from raising her children as speakers of her Anishinaabemowin language. Dr. Christine Sims writes in her American Indian Quarterly review that it covers a broad variety of topics and information that will be of interest to practitioners, researchers, and advocates of Indigenous languages. Includes three chapters on the Maori language: Changing Pronunciation of the Maori Language - Implications for Revitalization; Language is Life - The Worldview of Second Language Speakers of Maori; Reo o te Kainga (Language of the Home) - A Ngai Te Rangi Language Regeneration Project.

Laser-Induced Breakdown Spectroscopy Sergio

Musazzi, Umberto Perini, 2014-07-08 This book deals with the Laser-Induced Breakdown Spectroscopy (LIBS) a widely used atomic emission spectroscopy technique for elemental analysis of materials. It is based on the use of a high-power, short pulse laser excitation. The book is divided into two main sections: the first one concerning theoretical aspects of the technique, the second one describing the state of the art in applications of the technique in different scientific/technological areas. Numerous examples of state of the art applications provide the readers an almost complete scenario of the LIBS technique. The LIBS theoretical aspects are reviewed. The book helps the readers who are less

familiar with the technique to understand the basic principles. Numerous examples of state of the art applications give an almost complete scenario of the LIBS technique potentiality. These examples of applications may have a strong impact on future industrial utilization. The authors made important contributions to the development of this field.

Rare Metal Technology 2020 Gisele Azimi, Kerstin Forsberg, Takanari Ouchi, Hojong Kim, Shafiq Alam, Alafara Abdullahi Baba, 2020-01-20 This collection presents papers from a symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production. Rare metals include strategic metals that are in increasing demand and subject to supply risks. Metals represented include neodymium, dysprosium, scandium and others; platinum group metals including platinum, palladium, iridium, and others; battery related metals including lithium, cobalt, nickel, and aluminum; electronics-related materials including copper and gold; and refractory metals including titanium, niobium, zirconium, and hafnium. Other critical materials such as gallium, germanium, indium and silicon are also included. Papers cover various processing techniques, including but not limited to hydrometallurgy (solvent extraction, ion exchange, precipitation, and crystallization), electrometallurgy (electrorefining and electrowinning), pyrometallurgy, and aerometallurgy (supercritical fluid extraction). Contributions are focused on primary production as well as secondary production through urban mining and recycling to enable a circular economy. A useful resource for all involved in commodity metal production, irrespective of the major metal Provides knowledge of cross-application among industries Extraction and processing of rare metals that are the main building block of many emerging critical technologies have been receiving significant attention in recent years. The technologies that rely on critical metals are prominent worldwide, and finding a way to extract and supply them

effectively is highly desirable and beneficial.

Pompeii and Herculaneum Alison E. Cooley, M. G. L. Cooley, 2013-10-01 The original edition of Pompeii: A Sourcebook was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, Pompeii and Herculaneum: A Sourcebook allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, Pompeii and Herculaneum: A Sourcebook offers an invaluable resource for anyone studying or visiting the sites.

Brazilian Portuguese and the Null Subject Parameter Mary Aizawa Kato, 2000 Using the Null Subject Parameter theory in cross linguistic variation, Brazilian Portuguese is studied in this book from a diachronic and a synchronic perspective, and from the language acquisition point of view.

The Routledge Handbook of Language Revitalization Leanne Hinton, Leena Huss, Gerald Roche, 2018-03-05 The Routledge Handbook of Language Revitalization is the first comprehensive overview of the language revitalization movement, from the Arctic to the Amazon and across continents. Featuring 47 contributions from a global range of top scholars in the field,

the handbook is divided into two parts, the first of which expands on language revitalization issues of theory and practice while the second covers regional perspectives in an effort to globalize and decolonize the field. The collection examines critical issues in language revitalization, including: language rights, language and well-being, and language policy; language in educational institutions and in the home; new methodologies and venues for language learning; and the roles of documentation, literacies, and the internet. The volume also contains chapters on the kinds of language that are less often researched such as the revitalization of music, of whistled languages and sign languages, and how languages change when they are being revitalized. The Routledge Handbook of Language Revitalization is the ideal resource for graduate students and researchers working in linguistic anthropology and language revitalization and endangerment.

Company Lawyers Philippe Coen, Christophe Roquilly, École des hautes études commerciales du Nord, 2014 Premier ouvrage proposant une analyse internationale et comparative sur le sujet essentiel de l'indépendance de la profession des juristes d'entreprise. Fréquemment, tant au niveau européen qu'au niveau national, cette indépendance n'est pas reconnue. Or, cette absence de reconnaissance entraîne de nombreuses questions, en particulier pour les clients de cette profession : les entreprises. Ce livre blanc explique l'importance d'un tel concept et montre que l'indépendance intellectuelle est un prérequis à tout avis ou conseil juridique pertinent. L'ouvrage rassemble près de 60 contributions de praticiens - juristes, avocats et universitaires venant de plus de 20 pays sur quatre continents et fait part de vingt propositions concrètes pour faire évoluer le statut des juristes au sein des entreprises. Dependency Linguistics Kim Gerdes, Eva Hajičová, Leo Wanner, 2014-09-15 This volume offers the reader a unique possibility to obtain a concise introduction to dependency linguistics and to learn about the current state of the art in the

field. It unites the revised and extended versions of the linguistically-oriented papers to the First International Conference on Dependency Linguistics held in Barcelona. The contributions range from the discussion of definitional challenges of dependency at different levels of the linguistic model, its role beyond the classical grammatical description, and its annotation in dependency treebanks to concrete analyses of various cross-linguistic phenomena of syntax in its interplay with phonetics, morphology, and semantics, including phenomena for which classical simple phrase-structure based models have proven to be unsatisfactory. The volume will be thus of interest to both experts and newcomers to the field of dependency linguistics and its computational applications.

Advanced Customization in Architectural Design and Construction Roberto Naboni, Ingrid Paoletti, 2014-12-04 This book presents the state of the art in advanced customization within the sector of architectural design and construction, explaining important new technologies that are boosting design, product and process innovation and identifying the challenges to be confronted as we move toward a mass customization construction industry. Advanced machinery and software integration are discussed, as well as an overview of the manufacturing techniques offered through digital methods that are acquiring particular significance within the field of digital architecture. CNC machining, Robotic Fabrication, and Additive Manufacturing processes are all clearly explained, highlighting their ability to produce personalized architectural forms and unique construction components. Cutting-edge case studies in digitally fabricated architectural realizations are described and, looking towards the future, a new model of 100% customized architecture for design and construction is presented. The book is an excellent guide to the profound revolution taking place within the fields of architectural design and construction, characterized by computational tools, advanced fabrication means and custom-

made high-performance architecture.

Paediatric Gastroenterology, Hepatology and Nutrition Mark Beattie, Anil Dhawan, John WL Puntis, 2009-03-12 This handbook of paediatric gastroenterology, hepatology and nutrition provides a concise overview of key topics in these three closely related specialties.

Primed and Purposeful Soliman M. Santos, Paz Verdades M. Santos, Octavio A. Dinampo, 2010 Provides the political and historical detail necessary to understand the motivations and probable outcomes of conflicts in the country. The volume explores relate human security issues, including the willingness of several Filipino armed groups to negotiate political settlements to the conflicts, and to contemplate the demobilization and reintegration of combatants into civilian life. Light is also shed on the use of small arms - the weapons of choice for armed groups - whose availability is maintained through leakage from government arsenals, porous borders, a thriving domestic craft industry, and a lax regulatory regime.

Star Power Alain Bécoulet, 2022-03-01 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion—the process that makes the stars shine—could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In *Star Power*, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to “put the sun in a box.” He surveys the history of

nuclear power, beginning with post-World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current through fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. Star Power offers an introduction to what may be the future of energy production.

Church of Spies Mark Riebling, 2015-09-29 The heart-pounding history of how Pope Pius XII -- often labeled Hitler's Pope -- was in fact an anti-Nazi spymaster, plotting against the Third Reich during World War II. The Vatican's silence in the face of Nazi atrocities remains one of the great controversies of our time. History has accused wartime pontiff Pius the Twelfth of complicity in the Holocaust and dubbed him Hitler's Pope. But a key part of the story has remained untold. Pope Pius in fact ran the world's largest church, smallest state, and oldest spy service. Sainly but secretive, he sent birthday cards to Hitler -- while secretly plotting to kill him. He skimmed from church charities to pay covert couriers, and surreptitiously tape-recorded his meetings with top Nazis. Under his leadership the Vatican spy ring actively plotted against the Third Reich. Told with heart-pounding suspense and drawing on secret transcripts and unsealed files by an acclaimed author, *Church of Spies* throws open the Vatican's doors to reveal some of the most astonishing events in the history of the papacy. Riebling reveals here how the world's greatest moral institution met the greatest moral crisis in history.
