Primary Angioplasty Timothy J Watson,Paul JL Ong,James E Tcheng,2018-07-13 This book is open access under a CC BY 4.0 license. This quick-reference handbook offers a concise and practical review of key aspects of the treatment of ST-segment elevation myocardial infarction (STEMI) in the era of primary percutaneous coronary intervention (PPCI). In the context of STEMI, PPCI is the preferred mode of emergency revascularization. Access to PPCI is rapidly increasing and is now routinely practiced in both general and specialist hospitals and there has been a recent emphasis on developing STEMI networks to enhance and expedite the referral pathway. This coupled with concurrent developments to enhance the safety and efficacy of the PPCI procedure has heralded an era where STEMI interventions are increasingly considered an important subspecialty within interventional cardiology. Written by leading cardiologists who have been instrumental in the adoption of PPCI in their respective institutions, the book provides junior and senior cardiologists alike with insightful and thought-provoking tips and tricks to enhance the success of PPCI procedures, which may in turn translate into direct improvements in outcomes. The book is also relevant for healthcare providers and emergency department physicians.

Bifurcation Stenting Ron Waksman,John A. Ormiston,2012-03-22 Here is expert guidance on one of the most vexing clinical challenges faced by interventional cardiologists. Written by global thought leaders in the area and edited by two internationally-recognized pioneers in interventional cardiology, Bifurcation Stenting covers all techniques, imaging modalities, and devices in current use, including VH-IVUS and OCT. It includes practical tips/tricks from leading experts and a section of challenging cases to further illustrate the material and help readers better understand the treatment of bifurcation lesions.

Confocal Raman Microscopy Jan Toporski,Thomas Dieing,Olaf Hollricher,2018-03-01 This second edition provides a cutting-edge overview of physical, technical and scientific aspects related to the widely used analytical method of confocal Raman microscopy. The book includes expanded background information and adds insights into how confocal Raman microscopy, especially 3D Raman imaging, can be integrated with other methods to produce a variety of correlative microscopy combinations. The benefits are then demonstrated and supported by numerous examples from the fields of materials science, 2D materials, the life sciences, pharmaceutical research and development, as well as the geosciences.

Viral Loads Lenore Manderson,Nancy J. Burke,Ayo Wahlberg,2021-09-20 Drawing upon the empirical scholarship and research expertise of contributors from all settled continents and from diverse life settings and economies, Viral Loads illustrates how the COVID-19 pandemic, and responses to it, lay bare and load onto people's lived realities in countries around the world. A crosscutting theme pertains to how social unevenness and gross economic disparities are shaping global and local responses to the pandemic, and illustrate the effects of both the virus and efforts to contain it in ways that amplify these inequalities. At the same time, the contributions highlight the nature of contemporary social life, including virtual communication, the nature of communities, neoliberalism and contemporary political economies, and the shifting nature of nation states and the role of government. Over half of the world's population has been affected by restrictions of movement, with physical distancing requirements and self-isolation recommendations impacting profoundly on everyday life but also on the economy, resulting also, in turn, with dramatic shifts in the economy and in mass unemployment. By reflecting on how the pandemic has interrupted daily lives, state infrastructures and healthcare systems, the contributing authors in this volume mobilise anthropological theories and concepts to locate the pandemic in a highly connected and exceedingly unequal world. The book is ambitious in its scope – spanning the entire globe – and daring in its insistence that medical anthropology must be a part of the growing calls to build a new world.

ICOPE 2020 Ryzal Perdana,Gede Eka Putrawan,Sunyono,2021-03-24 We are delighted to introduce the Proceedings of the Second International Conference on Progressive Education (ICOPE) 2020 hosted by the Faculty of Teacher Training and Education, Universitas Lampung, Indonesia, in the heart of the city Bandar Lampung on 16 and 17 October 2020. Due to the COVID-19 pandemic, we took a model of an online organised event via Zoom. The theme of the 2nd ICOPE 2020 was “Exploring the New Era of Education”, with various related topics including Science Education, Technology and Learning Innovation, Social and Humanities Education, Education Management, Early Childhood Education, Primary Education, Teacher Professional Development, Curriculum and Instructions, Assessment and Evaluation, and Environmental Education. This conference has invited academics, researchers, teachers, practitioners, and students worldwide to participate and exchange ideas, experiences, and research findings in the field of education to make a better, more efficient, and impactful teaching and learning. This conference was attended by 190 participants and 160 presenters. Four keynote papers were delivered at the conference; the first two papers were delivered by Prof Emeritus Stephen D. Krashen from the University of Southern California, the USA and Prof Dr Bujang Rahman, M.Si. from Universitas Lampung, Indonesia. The second two papers were presented by Prof Dr Habil Andrea Bencsik from the University of Pannonia, Hungary and Dr Hisham bin Dzakiria from Universiti Utara Malaysia, Malaysia. In addition, a total of 160 papers were also presented by registered presenters in the parallel sessions of the conference. The conference represents the efforts of many individuals. Coordination with the steering chairs was essential for the success of the conference. We sincerely appreciate their constant support and guidance. We would also like to express our gratitude to the organising committee members for putting much effort into ensuring the success of the day-to-day operation of the conference and the reviewers for their hard work in reviewing submissions. We also thank the four invited keynote speakers for sharing their insights. Finally, the conference would not be possible without the excellent papers contributed by authors. We thank all authors for their contributions and participation in the 2nd ICOPE 2020. We strongly believe that the 2nd ICOPE 2020 has provided a good forum for academics, researchers, teachers, practitioners, and students to address all aspects of education-related issues in the current educational situation. We feel honoured to serve the best recent scientific knowledge and development in education and hope that these proceedings will furnish scholars from all over the world with an excellent reference book. We also expect that the future ICOPE conference will be more successful and stimulating. Finally, it was with great pleasure that we had the opportunity to host such a conference.

Lignocellulose Biorefinery Engineering Hongzhang Chen,2015-03-03 Biomass resources and their refining are key research topics internationally as alternatives to fossil fuel resources and oil refining. This book explores the heterogeneous nature of lignocellulosic biomass, which restricts its use as a raw material, and describes the theoretical basis of the lignocellulose refinery. It puts forward the theory of the integrated biomass refinery system, which

produces multiple products, including biofuels, biomaterials, biochemicals, food and feed based on careful fractionation of the raw material. Chapter 1 introduces the significance and development of lignocellulose biorefining. Chapter 2 gives the theoretical basis of lignocellulose biorefinery engineering. Chapters 3 to 6 describe in detail biomass refinery engineering from the perspectives of feedstocks, conversions, products and processes respectively. Models of integrated industrial biomass refinery chains are presented in Chapter 7. Finally, Chapter 8 considers future trends in lignocellulose biorefining. Explores mechanisms of selective fractionation of biomass based on biomass structural characteristics and product requirements Addresses biological, physical and chemical conversion technologies, as well as combinations of different methods based on the biomass material characteristics This thorough exploration of lignocellulose biorefining is written by an expert from a key research institute in this field

Microshelters Derek “Deek” Diedricksen,2015-08-25 If you dream of living in a tiny house, or creating a getaway in the backwoods or your backyard, you’ll love this gorgeous collection of creative and inspiring ideas for tiny houses, cabins, forts, studios, and other microshelters. Created by a wide array of builders and designers around the United States and beyond, these 59 unique and innovative structures show you the limits of what is possible. Each is displayed in full-color photographs accompanied by commentary by the author. In addition, Diedricksen includes six sets of building plans by leading designers to help you get started on a microshelter of your own. You’ll also find guidelines on building with recycled and salvaged materials, plus techniques for making your small space comfortable and easy to inhabit.

Intelligent Systems for Crisis Management Sisi Zlatanova,Rob Peters,Arta Dilo,Hans Scholten,2012-12-03 There have been major advances in technologies to support crisis response in the last few years. However, many aspects related to the efficient collection and integration of geo-information, applied semantics and situation awareness for disaster management are still open. To advance the systems and make them intelligent, an extensive collaboration is required between emergency responders, disaster managers, system designers and researchers. To facilitate this process the Geo-information for Disaster Management (Gi4DM) conference has been organized since 2005. Gi4DM is coordinated by the Joint Board of Geospatial Information Societies (JB GIS) and the ad-hoc Committee on Risk and Disaster Management. This volume presents the results of the Gi4DM 2012 conference, held in Enschede, the Netherlands, on 13-15 December . It contains a selection of around 30 scientific and 25 best-practice peer-reviewed papers. The 2012 Gi4DM focuses on the intelligent use of geo-information, semantics and situation awareness.

Seismic Data Analysis Özdoğan Yilmaz,Stephen M. Doherty,2001 Expanding the author's original work on processing to include inversion and interpretation, and including developments in all aspects of conventional processing, this two-volume set is a comprehensive and complete coverage of the modern trends in the seismic industry - from time to depth, from 3D to 4D, from 4D to 4C, and from isotropy to anisotropy.

New Passages Gail Sheehy,2011-09-28 THE #1 NEW YORK TIMES BESTSELLER Millions of readers literally defined their lives through Gail Sheehy's landmark bestseller Passages. Seven years ago she set out to write a sequel, but instead she discovered a historic revolution in the adult life cycle. . . People are taking longer to grow up and much longer to die. A fifty-year-old woman--who remains free of cancer and heart disease-- can expect to see her ninety-second birthday. Men, too, can expect a dramatically lengthened life span. The old demarcations and descriptions of adulthood--beginning at twenty-one and ending at sixty-five--are hopelessly out of date. In New Passages, Gail Sheehy discovers and maps out a completely new frontier--a Second Adulthood in middle life. Stop and recalculate, Sheehy writes. Imagine the day you turn forty-five as the infancy of another life. Instead of declining, men and women who embrace a Second Adulthood are progressing through entirely new passages into lives of deeper meaning, renewed playfulness, and creativity--beyond both male and female menopause. Through hundreds of personal and group interviews, national surveys of professionals and working-class people, and fresh findings extracted from fifty years of U.S. Census reports, Sheehy vividly dramatizes these newly developing stages. Combining the scholar's ability to synthesize data with the novelist's gift for storytelling, she allows us to make sense of our own lives by understanding others like us. New Passages tells us we have the ability to customize our own life cycle. This groundbreaking work is certain to awaken and permanently alter the way we think about ourselves. SHEEHY CLEARLY STATES IDEAS ABOUT LIFE THAT HAVE NEVER BEFORE BEEN AS CLEARLY STATED. --Los Angeles Times Book Review AN OPTIMISTIC ANALYSIS OF ADULT DEVELOPMENT IN PESSIMISTIC TIMES. . . It is grounded in the economic and psychological realities that make adult life so complex today. --The New York Times Book Review

Understanding Global Skills for 21st Century Professions Douglas Bourn,2018-10-24 This book highlights the increasing need for people who will be working in professions such as teaching, health, engineering and business management to have the skills for living and working in a global society. Globalisation and the challenges resulting from recent political events in Europe and North America have given rise to a need for training and further and higher education programmes to address the skills young people all need to effectively engage in the current global society. Reviewing the range of theories and debates surrounding skills for the twenty-first century, the author suggests there is a need to directly address the real-world issues of today and move beyond abstract concepts such as team work, critical thinking and problem solving, as important as these concepts are. The author proposes a new framework for global skills using examples from international and national policy-makers and evidence from further and higher educational programmes and training courses. This pioneering yet practical book will be of value to students and scholars of global education as well as practitioners and policy makers.

Latin Alive Joseph B. Solodow,2010-01-21 In Latin Alive, Joseph Solodow tells the story of how Latin developed into modern French, Spanish, and Italian, and deeply affected English as well. Offering a gripping narrative of language change, Solodow charts Latin's course from classical times to the modern era, with focus on the first millennium of the Common Era. Though the Romance languages evolved directly from Latin, Solodow shows how every important feature of Latin's evolution is also reflected in English. His story includes scores of intriguing etymologies, along with many concrete examples of texts, studies, scholars, anecdotes, and historical events; observations on language; and more. Written with crystalline clarity, this book tells the story of the Romance languages for the general reader and to illustrate so amply Latin's many-sided survival in English as well.

Digital Diplomacy Corneliu Bjola,Marcus Holmes,2015-03-24 This book analyses digital diplomacy as a form of change management in international politics. The recent spread of digital initiatives in foreign ministries is often argued to be nothing less than a revolution in the practice of diplomacy. In some respects this revolution is long overdue. Digital technology has changed the ways firms conduct business, individuals conduct social relations, and states conduct governance internally, but states are only just realizing its potential to change the ways all aspects of interstate interactions are conducted. In particular, the adoption of digital diplomacy (i.e., the use of social media for diplomatic purposes) has been implicated in changing practices of how diplomats engage in information management, public diplomacy, strategy planning, international negotiations or even crisis management. Despite these significant changes and the promise that digital diplomacy offers, little is known, from an analytical perspective, about how digital diplomacy works. This volume, the first of its kind, brings together established scholars and experienced policy-makers to bridge this analytical gap. The objective of the book is to theorize what digital diplomacy is, assess its relationship to traditional forms of diplomacy, examine the latent power dynamics inherent in digital diplomacy, and

assess the conditions under which digital diplomacy informs, regulates, or constrains foreign policy. Organized around a common theme of investigating digital diplomacy as a form of change management in the international system, it combines diverse theoretical, empirical, and policy-oriented chapters centered on international change. This book will be of much interest to students of diplomatic studies, public diplomacy, foreign policy, social media and international relations.

Freedom of the Press 2007 Freedom House (U.S.),2008 This annual press freedom survey, now covering 195 countries and territories, has tracked trends in media freedom worldwide sine 1980. It provides comparative rankings and examines the legal environment for the media, political pressures that influence reporting, and economic factors that affect access to information.

Handbook of Research Methodology 9781545703403, This comprehensive Handbook is aimed at both academic researchers and practitioners in the field of research. The book's 8 chapters, provide in-depth coverage of research methods based on the revised syllabus of various universities especially considering the students of under graduate, post graduate and doctorate level. This book is a product of extensive literature survey made by the authors. The authors have made sincere efforts to write the book in simple language. The book comprises all the aspects according to new syllabus of PCI and APJ Abdul Kalam Technical University, Lucknow. Though this book is intended for the use of pharmacy students of any level yet it can also be useful to students of applied fields and medical students. The book deals with interdisciplinary fields such as finding research problems, writing research proposals, obtaining funds for research, selecting research designs, searching the literature and review, collection of data and analysis, preparation of thesis, writing research papers for journals, citation and listing of references, preparation of visual materials, oral and poster presentation in conferences, minutes of meetings, and ethical issues in research. At the end of every chapter and book some questions related to chapter have been mentioned for the support of students to understand the subject. Valuable suggestions for the improvement of this book are most welcome.

Algorithms Unlocked Thomas H. Cormen,2013-03-01 For anyone who has ever wondered how computers solve problems, an engagingly written guide for nonexperts to the basics of computer algorithms. Have you ever wondered how your GPS can find the fastest way to your destination, selecting one route from seemingly countless possibilities in mere seconds? How your credit card account number is protected when you make a purchase over the Internet? The answer is algorithms. And how do these mathematical formulations translate themselves into your GPS, your laptop, or your smart phone? This book offers an engagingly written guide to the basics of computer algorithms. In Algorithms Unlocked, Thomas Cormen—coauthor of the leading college textbook on the subject—provides a general explanation, with limited mathematics, of how algorithms enable computers to solve problems. Readers will learn what computer algorithms are, how to describe them, and how to evaluate them. They will discover simple ways to search for information in a computer; methods for rearranging information in a computer into a prescribed order (“sorting”); how to solve basic problems that can be modeled in a computer with a mathematical structure called a “graph” (useful for modeling road networks, dependencies among tasks, and financial relationships); how to solve problems that ask questions about strings of characters such as DNA structures; the basic principles behind cryptography; fundamentals of data compression; and even that there are some problems that no one has figured out how to solve on a computer in a reasonable amount of time.

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution Ratri Wulandari,Idhar Resmadi,Vika Haristianti,Rahmiati Aulia,Riky Taufik Afif,Gema Ari Prahara,Aulia Ibrahim Yeru,2021-08-25 The 7th Bandung Creative Movement conference presented the theme Dynamics of Industrial Revolution 4.0 which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that is more ecologically ‘smart.’ We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward discussions on dynamic changes, ups and downs, innovations, relations of industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.
