Work-Life Balance in the 21st Century D. Houston,2005-04-04 As we begin the twenty-first century, UK employees work the longest hours in Europe. Workplace stress and home responsibilities are among the top five causes of absence from work. Yet work-life balance has emerged as a key concern for employers, policy makers and the media. This edited volume contains findings from 14 research projects within the ESRC's Future of Work Programme. The research examines the notion of employment flexibility and the effects of gender and care responsibilities on work and work performance. Conflicting needs of employers and employees and the gender divisions in work and family life call into question the feasibility of achieving the Government's aim of work-life balance for everyone.

Partnership and the High Performance Workplace Andy Danford,Mike Richardson,Paul Stewart,Stephanie Tailby,Martin Upchurch,2005-08-02 The promotion of workplace partnership in the high performance workplace has become central to policy debates on the 'modernization' of employment relations in British industry. This book provides critical insights into the dynamics of partnership by way of in-depth case studies of employee experience in an under-researched industry noted for its high concentrations of skilled workers and graduates. Drawing on rich interview and questionnaire data, the authors highlight considerable conflicts of interest in the development of partnership that derive from the competitive capitalist environment in which management strategies operate.

Labour in a Global World T. Nichols,S. Cam,2005-06-10 This book gets behind much generality about globalisation to examine the production of relatively familiar commodities such as refrigerators and ovens in different countries. By considering a range of countries - China, Taiwan and South Korea, South Africa, Brazil and Turkey - it makes a substantive contribution to the understanding of the diffusion of management methods, the role of the state in employee relations, the nature of trade unionism and the impact of social structure on production relations.

Employment, Trade Union Renewal and the Future of Work P. Stewart,2004-11-10 This book examines the relationship between the experience of employment and changing organizational forms, boundaries and the context of work. It explores a range of critical sociological and political economy processes in the context of workplace restructuring, employment and labour market regulation in the wider community. Of significant importance are the themes of gendered and ethically embedded labour markets for young people, trade union and local activism, gendered identity in management, market turbulence and call centres. The book offers an international perspective that includes chapters based on case work from the UK and Turkey.
