Whether a novice, hobbyist, or professional, those who purchase this book have just taken a huge step to accelerating their learning and performance related to the most sophisticated martial art in existence - Mixed Martial Arts (MMA). More than a sport, MMA is a true

martial art that when taught and learned appropriately, can be life changing. It will develop you physically, mentally, and spiritually. Through our program, you will receive the most comprehensive and detailed curriculum ever created in MMA. We have applied the science of human behavior to identify and break down the most critical and fundamental techniques that have been successfully applied in MMA and found to significantly accelerate performance across sports. These fundamental approaches to learning, teaching, and skill refinement will help you as an MMA student or coach to develop a strong base that will accelerate learning and performance that is recognized and memorialized through our belt-ranking system. As you progress, you will be able to rapidly increase learning by using our videos drills available online along with the task analysis skill sheets included in this book to objectively measure and accelerate skill development. Whether you are seeking to enhance your own development through self-training and self-coaching, or you are an instructor training and coaching others and would like to enhance your own ability and program, our system cuts right to the heart of the matter: it teaches how to automatically apply the right MMA technique in precisely the right way at exactly the right time. Not only does our book provide concrete strategies related to improving learning, training, and coaching, we also provide scientific and practical approaches for coping with fear and anxiety associated with fighting. This book reflects a combined 100 years of Martial Arts and Combat Sports training complimented by formal education and real-world professional application of technologies rooted in psychology and the science of human behavior. As such, we are very excited to use our experience to introduce tradition, organization, and science to the MMA world. This comprehensive manuscript includes the following four books

all wrapped up in one: Training and Coaching Guide, Yellow Belt Task Analysis and Belt Ranking Guide, Orange Belt Task Analysis and Belt Ranking Guide, and Green Belt Task Analysis and Belt Ranking Guide. Each can be used by an instructor to greatly improve their ability to train and coach through the scientific principles at the root of a performance, or by a student to dramatically accelerate their own learning. Why wait? Order our book right now to increase successful outcomes associated with the greatest martial art and sport in the world - Mixed Martial Arts.

**Martial Arts Training Through The Teacher's Eyes** GM David J.

Harrell, 2016-11-04 Embedded in the pages is the story of the making of a teacher of the martial arts and the methods he uses to teach martial arts to children and adults at the Traditional Martial Arts Institute based in Aberdeen, Scotland. The author, Grand Master David J. Harrell has dedicated most of his life to the study and practice of an ancient art of self defence, and to the development of those skills that would allow him to share his knowledge with the next generation. His book tells the story of his personal journey in martial arts and the lessons learned from fifty-three years of training. The book begins with the author's introduction to martial arts in his home town in Suffolk at a time when segregation usually led to the exclusion of black children and adults from these white-dominated activities. Even at this early stage GM Harrell had a strong desire to teach and he asked his first, and every subsequent teacher to teach him to teach the martial arts. He goes on to describe those things that he learned from each of his teachers about how to share knowledge and skill with students of all ages and ability levels. In addition he reveals numerous insights gained from his many years of teaching and training. The book explains how he makes use of modern

teaching methods and resources to replicate and remain faithful to what has been handed down to him by his instructors, including the traditions and values of martial art training.

**Development of Technique & Tactical Skill** Luis Preto, Spyridon Katsigiannis, 2014-02-05 This book is an attempt to bridge the gap between scientific research in the field of motor control and the practical, day-to-day work of coaching athletes, beginners as well as advanced. The main focus of the authors is to provide coaches with a basic understanding of how motor skills are constructed, thus looking to reach beyond that which is visible to the naked eye. More to the point, a careful review of the field's literature combined with analyses of numerous practical teaching settings from different sports make for a very strong case in favor of treating motor skills as context-dependent problem solving strategies. Motor skills are presented as a natural result of athletes interacting with their environment, instead of mere physical movements that are to be memorized and repeated on request. Consequently, the teaching strategies presented are quite innovative and, hopefully, will provide coaches with effective ways to help trainees achieve their full potential.
