On the Move to Meaningful Internet Systems: OTM 2009 Robert Meersman,Tharam Dillon,Pilar Herrero,2009-11-06 Internet-based information systems, the second covering the large-scale integration of heterogeneous computing systems and data resources with the aim of providing a global computing space. Each of these four conferences encourages researchers to treat their respective topics within a framework that incorporates jointly (a) theory, (b) conceptual design and development, and (c) applications, in particular case studies and industrial solutions. Following and expanding the model created in 2003, we again solicited and selected quality workshop proposals to complement the more archival nature of the main conferences with research results in a number of selected and more avant-garde areas related to the general topic of Web-based distributed computing. For instance, the so-called Semantic Web has given rise to several novel research areas combining linguistics, information systems technology, and artificial intelligence, such as the modeling of (legal) regulatory systems and the ubiquitous nature of their usage. We were glad to see that ten of our earlier successful workshops (ADI, CAMS, EI2N, SWWS, ORM, OnToContent, MONET, SEMELS, COMBEK, IWSSA) re-appeared in 2008 with a second, third or even 7th edition, sometimes by alliance with other newly emerging workshops, and that no fewer than three brand-new independent workshops could be selected from proposals and hosted: ISDE, ODIS and Beyond SAWSDL. Workshops audiences productively mingled with each other and with those of the main conferences, and there was considerable overlap in authors.

Semantic Mashups Brigitte Endres-Niggemeyer,2013-04-05 Mashups are mostly lightweight Web applications that offer new functionalities by combining, aggregating and transforming resources and services available on the Web. Popular examples include a map in their main offer, for instance for real estate, hotel recommendations, or navigation tools. Mashups may contain and mix client-side and server-side activity. Obviously, understanding the incoming resources (services, statistical figures, text, videos, etc.) is a precondition for optimally combining them, so that there is always some undercover semantics being used. By using semantic annotations, neutral mashups permute into the branded type of semantic mashups. Further and deeper semantic processing such as reasoning is the next step. The chapters of this book reflect the diversity of real-life semantic mashups. Two overview chapters take the reader to the environments where mashups are at home and review the regulations (standards, guidelines etc.) mashups are based on and confronted with. Chapters focusing on DBpedia, search engines and the Web of Things inspect the main Web surroundings of mashups. While mashups upgrading search queries may be nearer to the everyday experience of readers, mashups using DBpedia input and sensor data from the real world lead to important new and therefore less known developments. Finally, the diversity of mashups is tracked through a few application areas: mathematical knowledge, speech, crisis and disaster management, recommendations (for games), inner-city information, and tourism. Participants of the AI Mashup Challenge wrote all the chapters of this book. The authors were writing for their current and future colleagues – researchers and developers all over the Web who integrate mashup functionalities into their thinking and possibly into their applications.

Geoscience Education Clara Vasconcelos,2016-11-14 This book presents research in Geoscience Education focusing on indoor and outdoor environments in which teaching geoscience gains particular relevance, significance and contextualization. The research areas that are presented throughout the thirteen chapters cover a wide variety of subjects ranging from educational resources and fieldwork to science models. Chapters discuss specific geoscience topics such as earthquakes, rocks, fossils and minerals. Other chapters present a more interdisciplinary approach addressing topics that aren't usually examined, such as geomedicine and geoethics, with a specific focus on sustainable development and their alignment with the school curricula. Throughout the book readers can find research-based arguments illustrated with practical examples, which will help them to innovate in their curriculum development area, classroom practices and pre and in-service teachers' education. The book challenges readers to improve Geoscience Education by changing the ways of teaching, by enabling students to exploit their natural curiosity, and by spurring a learning process that should not be confined to the classroom but rather maintained throughout life.

Geomediale Fiktionen Annika Richterich,2014-06-30 Nicht alles, was vermessbar ist, ist auch real. Bereits Galilei demonstrierte mit einer Vermessung der Hölle Dantes, dass man selbst literarische Räume kartieren kann. Diesem Vorbild folgen auch die Laienkartographen des 21. Jahrhunderts. Ihre »Map Mashups« führen eine Tradition fort, die seit der Antike Spuren in Literatur, Kartographie und wissenschaftlichen Diskursen hinterlassen hat. Mit diesen digitalen »Remediations« sind literatogeographische Fragen in der Internetforschung angekommen. Annika Richterichs Studie untersucht daher aus medien- und literaturwissenschaftlicher Sicht, wie (software-)technischer Fortschritt und habitualisierte Mediennutzung im Forschungsfeld der geomedialen Fiktionen zusammenspielen.

Sociedad del Conocimiento, Tecnología y Educación Ana Sacristán Lucas,Daniel Cassany,Gabriela Fretes,Michele Knobel,Colin Lankshear,Julio Meneses,Josep M. Morinó,Dolors Reig,Genís Roca,Sonia Santoveña,Carlos Sigalés,2014-09-24 La irrupción meteórica de las Tecnologías de la Información y de la Comunicación y en especial de Internet, su más notorio vástago, han transformado en apenas treinta años las sociedades contemporáneas con una radicalidad, efectiva y potencial, que no tiene precedentes en la historia de las relaciones entre las innovaciones tecnológicas y la evolución social. Todos los ámbitos han sido profundamente afectados: la economía productiva y financiera, la política (a un ritmo más lento, pero con unas posibilidades de innovación inmensas), así como el tema que ocupa este libro, la cultura, en sus tres facetas, la producción, el consumo y la distribución, dentro de las cuales la educación ha jugado un papel fundamental. Es probable que la educación siga jugándolo en el futuro pero tras un inevitable proceso de autoreflexión y, también, en gran medida, de reinención. Los textos que componen este libro, unos escritos ad hoc y otros recopilados de entre la innumerable producción teórica sobre la materia, pretenden ofrecer al lector una visión de conjunto de la revolución que suponen las TIC. Revolución no tanto en el sentido histórico habitual de sustitución de unos poderes socioeconómicos o políticos por otros (aunque algo hay, y podrá haber, también de esto), como en el literal de 'revolver' todo lo establecido. Revolución centrada en la producción y enseñanza de la cultura y en cómo se ven afectadas las relaciones sociales que son, conjuntamente, su causa y efecto. Se ofrece una visión general de los cambios técnicos y socioculturales que dan lugar a una nueva sociedad, la denominada Sociedad del Conocimiento, y una descripción sin pretensión de exhaustividad, de la muy variada y novedosa temática técnica y relacional que incorpora.

e-Lexicography Pedro A. Fuertes-Olivera, Henning Bergenholz, 2011-08-18 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics:

- Polyfunctional versus monofunctional dictionary tools
- Developing theories of lexicography for electronic mediums
- Distinguishing between the database and the dictionary
- Online dictionaries not as data repositories but as sophisticated search engines

This volume will appeal to scholars in lexicography and to practicing lexicographers.
