Moving into Mass Customization Claus Rautenstrauch, Ralph Seelmann-Eggebert, Klaus Turowski, 2012-12-06 Mass Customization leads the strategy of today's well succeeded companies. It indulges the customer with the so long yearned for product and/or service that exactly fits his desires and specifications. This book compiles a hand-selected variety of testimonies from Mass Customization experts worldwide with different experiences both on an academic research basis as well as on practical case studies. This diversity makes it a compulsory guide to use in any enterprise throughout the world that wants to take its business into new and more ambitious dimensions. Furthermore, its contents are structured in a way that will help everyone that wants to learn, teach or put into practice the concepts of Mass Customization.

Leading Mass Customization & Personalization Frank Piller, Dominik Walcher, 2018-02-02 Mass Customization today is seen as a core strategy for successful enterprises. The term denotes an offering that meets the demands of each individual customer, but that can still be produced with mass production efficiency. Current developments such as 3D-printing, smart data or digital production are strengthening this trend. Strategies and examples of mass customization have been widely published in recent years. This publication comprises interviews with 24 selected MC-experts, practitioners and researchers, giving a comprehensive report on success factors.

The Customer Centric Enterprise Mitchell M. Tseng, Frank Piller, 2011-06-27 Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

Research in Mass Customization and Personalization Mitchell, Frank T. Piller, 2009-12-01 A growing heterogeneity of demand, the advent of 'long tail markets', exploding product complexities, and the rise of creative consumers are challenging companies in all industries to find new strategies to address these trends. Mass customization (MC) has emerged in the last decade as the premier strategy for companies in all branches of industry to profit from heterogeneity of demand and a broad scope of other customer demands. The research and practical experience collected in this book presents the latest thinking on how to make mass customization work. More than 50 authors from academia and management debate on what is viable now, what did not work in the past, and what lurks just below the radar in mass customization, personalization, and related fields. Edited by two leading authorities in the field of mass customization, both volumes of the book discuss, among many other themes, the latest research and insights on customization strategies, product design for mass customization, virtual models, co-design toolkits, customization value measurement, open source architecture, customization communities, and MC supply chains. Through a number of detailed case studies, prominent examples of mass customization are explained and evaluated in larger context and perspective.

Mass Customisation and Personalisation in Architecture and Construction Poorang A.E. Piroozfar, Frank T. Piller, 2013-06-19 Challenged by the recent economic crisis, the building and construction industry is currently seeking new orientation and strategies. Here mass customisation is uncovered as a key strategy in helping to meet this challenge. The term mass customisation denotes an offering that meets the demands of each individual customer, whilst still being produced with mass production efficiency. Today mass customisation is emerging from a pilot stage into a scalable and sustainable strategy... The first dedicated publication of its kind, this book provides a forum for the concept within an applied and highly innovative context. The book includes contributions from some of the most prominent thinkers and practitioners in the field from across the world, including Kasper S. Vibaek, Steve Kendall, Martin Bechthold, Mitchell M. Tseng, and Masa Noguchi. Bringing together this panel of experts who have carried out research both in academia and practice, this book provides an overview of state-of-the-art practice related to the concept of customisation and personalisation within the built environment.

Mass Customization Information Systems in Business Blecker, Thorsten, Friedrich, Gerhard, 2007-04-30 This book describes original, innovative works on IT systems for mass customization, and provides a multitude of solutions, tools, concepts and successful realizations of IT systems for mass customization. It discusses state-of-the-art mass customization while depicting the importance of IT in making the strategy function efficiently in order to support the business processes required for manufacturing individualized products--Provided by publisher.

The Personalized Continuing Professional Learning of Teachers Orit Avidov-Ungar, 2023-11-23 Taking a personalized and global approach, this timely volume links theory with application in the context of continuing professional development (CPD) for teachers, exploring current scholarship on teachers' CPD and charting the shift towards continuing professional learning (CPL). Chapters look at concepts such as motivation, expertise, career trajectory, life story and empowerment, as well as their influences and respective roles in the personalization of teachers' professional growth during their career. Presenting the principles of personalization and their significance for teachers' CPL, this book provides a global perspective and model that clarifies the practical implications of the move towards teachers' personalized CPL, including the necessary changes in both teachers' attitudes and teacher education frameworks. Offering a unique and innovative multidimensional 'template' model that works as a tool for teachers interested in structuring their professional learning, this book will be useful to practitioners and researchers involved with teachers' professional development, school leadership, school management, as well as international and comparative education research more broadly.

Product Configurators Fabio Schillaci, 2017-11-09 This book provides a source of inspiration and a manual for professional product designers, industrial designers and architects who are looking into the practical application of product configurators.

Mass Customization Hans Kull, 2015-03-16 Mass Customization examines the business opportunities, considerations, and challenges manufacturers in various industries must weigh before committing to the significant investment in machinery and software needed to go to mass customization. For manufacturers who decide that it's time to take the plunge, the author describes the proven methods and latest technologies for making mass customization work seamlessly and profitably on the factory floor. Mass customization--the automated manufacturing bespoke products, profitably combining the low unit costs of mass production with the flexibility of building custom products to order--has been touted as the next big thing for more than a quarter of a century. Until recently, however, mass

customization made only modest inroads in a few industries. Now, the convergence of new ICT and manufacturing technologies with traditional CNC technologies means that mass customization's moment has arrived for breaking out into a wide range of industries. Hans Kull is an engineer and mathematician who applies his expertise in combinatorial optimization, programming, and engineering to devising end-to-end automated solutions for mass customization, automating and optimizing all processes—from bespoke parts supply, order processing, production, and waste minimization to packing and delivery. He shares with his readers practical lessons for making mass customization succeed, case studies from various industries, and an insider's vision of the business implications of mass customization's coming of age.

Mass Customization: Concepts - Tools - Realization Thorsten Blecker, 2005

The Digital Bespoke? ginger coons, 2021-11-29 The Digital Bespoke? is about mass customization, 3D printing, human bodies, and the step towards digitally built objects made to individual specifications. The author argues that the modes of customization offered by digital fabrication and mass production have more in common with their industrial predecessors than with craft-based customization. Using case studies of historical and current practices from Europe, Africa, and North America to ground her theory, she investigates where digital fabrication technologies have developed from and how their uses differ from existing modes of production. Digital fabrication and mass customization are concepts encompassing broad ecosystems of technologies and practices. Both are increasingly implemented and hyped. As such, it is imperative to address not just their potential, but their challenges. Written for a scholarly audience and for design practitioners concerned with the social and political impacts of digital fabrication and mass customization, this book will be a useful reference point for students and researchers in digital and analogue design, technology, and material culture.

Variety Induced Complexity in Mass Customization Nizar Abdelkafi, 2008

Design for Personalisation Iryna Kuksa, Tom Fisher, 2017-05-18 The principle of personalisation appears in a range of current debates among design professionals, healthcare providers and educationalists about the implications of new technologies and approaches to consumer sovereignty for 'mass' provision. The potential of new technologies implies systems of provision that offer bespoke support to their users, tailoring services and experiences to suit individual needs. The assumption that individual choice automatically increases wellbeing has underlain the re-design of public services. Ubiquitous personalisation in screen-based environments gives individuals the sense that their personality is reflected back at them. Advances in Artificial Intelligence mean our personal intelligent agents have begun to acquire personality. Given its prevalence, it is appropriate to identify the scope of this phenomenon that is altering our relationship to the 'non-human' world. This book presents taxonomy of personalisation, and its potential consequences for the design profession as well as its ethical and political dimensions through a collection of essays from a range of academic perspectives. The thought-provoking introduction, conclusion and nine chapters present a well-balanced mixture of in-depth literature review and practical examples to deepen our understanding of the consequences of personalisation for our professional and personal lives. Collectively, this book points towards the implications of personalisation for design-led social innovation. This will be valuable reading for professionals in the design industry and health provision, as well as students of product design, fashion and sociology.

Mass Customization and Sustainability Claudio R. Boër, Paolo Pedrazzoli, Andrea Bettoni, Marzio Sorlini, 2013-05-21 To adapt to global competitive pressures, manufacturers must develop methods and enabling technologies towards a personalized, customer oriented and sustainable manufacturing. Mass Customization and Sustainability defines the two concepts of mass customization and sustainability and introduces a framework to establish a link between the two concepts to answer the questions: Are these two aspects empowering one another? Or are they hindering one another? These questions investigate mass customization as one of the main driving forces to achieve effective sustainability. A methodology to assess the contribution of mass customization to sustainability is developed, providing an assessment model composed by a set of indicators covering the three aspects of sustainability: social, economical and environmental. This is supported and further explained using ideas and new concepts compiled from recent European research. Researchers, scientists, managers and industry professionals alike can follow a set of practical examples and industrial cases, enabling them to easily transfer Mass Customization and Sustainability theoretical concepts into actions to be enforced into their everyday business for gaining competitiveness. Mass Customization and Sustainability also introduces useful concepts for government officials responsible for establishing sustainable policies and regulations, offering methods to compare the results of implementation of such policies.

Proceedings of the 7th World Conference on Mass Customization, Personalization, and Co-Creation (MCPC 2014), Aalborg, Denmark, February 4th - 7th, 2014 Thomas D. Brunoe, Kjeld Nielsen, Kaj A. Joergensen, Stig B.

Taps, 2014-01-28 The MCPC 2014 is a multi-track conference featuring a combination of high profile keynotes with expert talks, panel discussions, paper sessions, workshops, receptions, and much more. While it is devoted to sharing and discussing the latest research in the field, the MCPC conference has a strong focus on real life applications. Since its beginning, the MCPC conference has had an equal share of participants, practitioners and academics/researchers. This makes the MCPC conference truly unique among many conferences. It strives to connect MCPC thinkers, first movers, entrepreneurs, technology developers, and researchers with people applying these strategies in practice. Twenty years ago Mass Customization was acknowledged as the "New Frontier in Business Competition". Ever since, industry has been applying the concept and researchers have developed the topic into a well-established research area and businesses have formed new strategies. More knowledge, methods and technologies are available now than ever before. Along with general Mass Customization topics, this conference addresses Mass Customization from a historical perspective, looking at both mass customization in the past 20 years and towards the new frontiers in the 20 years to come. This book presents the latest research from the worldwide MCPC community bringing together the new thoughts and results from various disciplines within the field.

The Personalization Paradox Val Swisher, Regina Lynn Preciado, 2021-03-08 According to Infosys, 86% of consumers surveyed indicated that personalized content has some impact on what they purchase and 25% said that personalization plays a large role in their purchases. And yet, looking at the data, two things stand out: Most companies say that personalizing the customer experience is a critical must have, and they have the statistics to back it up. Very few companies believe they are delivering enough personalized content, or deliver it well. What's holding these companies back from their personalization goals? And how can you avoid the pitfalls and make personalization possible with your own enterprise content? In this book, global content strategy expert Val Swisher and senior content strategist Regina Lynn Preciado show you exactly what it takes to deliver personalized

experiences at scale. You'll learn: Why personalized content is imperative to the enterprise Why so many companies fail to deliver - and how to avoid the pitfalls The five dimensions of content standardization How to bring people, technology, and process together The impact of big data and artificial intelligence The only way to deliver personalized content at scale is to automate the process at the point of delivery. And for that to work, you've got to change how you do content. The Personalization Paradox: Why Companies Fail (and How to Succeed) at Delivering Personalized Experiences at Scale shows you how.

Mass Customization and Customer Centricity Thomas Aichner,Fabrizio Salvador,2023-07-24 This book honors the contributions and career of Cipriano Forza, Professor of Management Engineering at the University of Padova, Italy. He is a Member of the Scientific Committee of Academic Journal Guide (ABS), an Associate Editor of the Decision Sciences Journal and a former Associate Editor of the Journal of Operations Management, where he curated a special issue on “Coordinating Product Design, Process Design, and Supply Chain Design Decisions”. As one of the world’s foremost researchers in the area of mass customization and operations management, Prof. Forza published more than 200 scientific articles with over 10,000 citations on Google Scholar. For his groundbreaking work, he received several awards, including the Dr. Theo Williamson Award for Excellence (1997), best paper awards by Production Planning and Control (2005) and the Journal of Operations Management (2006), the Harry Boer Highly Commended Award (2016), and the EurOMA Fellowship Awards (2021). Leading researchers and practitioners that have been working with the honoree contributed a broad range of findings from conceptual and empirical research about mass customization and personalization to this book. The individual chapters take a customer centric view on the challenges and opportunities of product and service customization from an operations management, information technology, entrepreneurship, marketing, and organizational perspective. The authors explore key ideas, current developments as well as future research directions.
