On the Road to Cuastecomate John Osborn,2011-08-08 Dear Reader, enclosed you will find a set of short stories. It includes actual events from the authors life, and imagined events from the authors mind. Fact and fiction so to speak. As with most books, except those heavy serious textbook tomes, the tales tell of personal and interpersonal emotions and actions. As the saying goes, we are not alone. Each and every one of us affects both each other and the world around us. Moreover, each and every one of us have talents, and unlike the servant who buried his given talents under a stone, the author believes that the sharing of talents can, in fact may, help someone or something somewhere. Maybe consciously or unconsciously, actively or unseen, small or enormously, each and every one of us has an opportunity to act. We could all do our bits to the best of our ability, the possible if you like, while still striving for the dream. We all have our own roads to Cuastecomate.

*How Antigravity Built the Pyramids* Nick Redfern,2022-09 Discover the Lost Secrets of the Ancients and the Time When Stones Floated High over Egypt Throughout history, folklore, and mystery, tales have circulated of massive stones being moved through the air effortlessly by sound. Bizarre? Well, yes, it is. That doesn't take away the fact that sound was, and still remains, the key to the construction of the pyramids of Egypt, Stonehenge, the stone figures of Easter Island, and the massive stones at Baalbek, Lebanon. Were they the work of ancient humans or of equally ancient extraterrestrials? How Antigravity Built the Pyramids delves into specific stories and theories: A 9th-century story of a mysterious papyrus with the power to move large stones at the Giza Necropolis The Mayan story of the construction of the Pyramid of the Magician said to be overseen by a small humanoid who could whistle large stones into place Native American stories of ancient priests being able to make stones light to move easily Author Nick Redfern argues it was not literally music and whistling that somehow raised large stones, but both have one thing in common: sound. Acoustics. Almost certainly, acoustic levitation was at the heart of these incredible feats. The truth of the science behind acoustic levitation was lost and forgotten for ages with little more left than fanciful tales of music, whistles, a curious papyrus, and strange metal rods that could achieve incredible feats in the air. Today, we are finally starting to get a grasp on this incredible technology, a technology that may have been the work of ancient humans, aliens from faraway worlds--or, perhaps, a combination of the two.

God Wills it David O'Connell,2017-07-05 God Wills It is a comprehensive study of presidential religious rhetoric. Using careful analysis of hundreds of transcripts, David O'Connell reveals the hidden strategy behind presidential religious speech. He asks when and why religious language is used, and when it is, whether such language is influential. Case studies explore the religious arguments presidents have made to defend their decisions on issues like defense spending, environmental protection, and presidential scandals. O'Connell provides strong evidence that when religious rhetoric is used public opinion typically goes against the president, the media reacts harshly to his words, and Congress fails to do as he wants. An experimental chapter casts even further doubt on the persuasiveness of religious rhetoric. God Wills It shows that presidents do not talk this way because they want to. Presidents like Jimmy Carter and George H.W. Bush were quite uncomfortable using faith to promote their agendas. They did so because they felt they must. God Wills It shows that even if presidents attempt to call on the deity, the more important question remains: Will God come when they do?

*The Well of Echoes Box Set* Ian Irvine,2019-05-03 The war has been raging for a hundred years ... and humanity is close to defeat. Santhenar is locked in conflict with the lyrinx – intelligent, winged predators from the Void who are desperate to gain their own world. And despite the development of mechanical battle clankers, and mastery of the crystals that drive them, humanity is losing. The enemy is destroying its nodes of magical power, one by one. Tiaan, a clever but naïve crystal worker in a clanker manufactory, is testing a new kind of crystal when she overhears an enchanting young man, Minis, speaking from far away. The crystal has woken her gift for geomancy, the most powerful of all the Secret Arts, and the most perilous. It is a talent that both humanity and its enemies are desperate to control. Falsely accused of sabotage by Irisis, a malicious rival, Tiaan flees for her life. But soon she is stalked by the outcast, wingless lyrinx, Ryll, who plans to use her in his dreadful flesh-forming sorcery. From afar, Minis advises and guides Tiaan and she now sees him as more than a friend. Aching for him, Tiaan follows his instructions all the way to Tirthrax, the tallest mountain in all the Three Worlds, where a nightmare awaits her ... You won't want to miss this edge-of-the seat epic fantasy series by a million-selling author. What reviewers say about the Three Worlds books "A compelling adventure in a landscape full of wonders." – Locus "A page-turner of the highest order ... Formidable!" – SFX onGeomancer "It is the most engrossing book I've read in years." – Van Ikin, Sydney Morning Herald "Readers of Eddings, Goodkind and Jordan will lap this one up." – Starlog "Utterly absorbing." Stephen Davenport, Independent Weekly "For sheer excitement, there's just no one like Irvine." SFX on The Destiny of the Dead "As good as anything I have read in the fantasy genre." – Adelaide Advertiser Reviews and Honours for The Well of Echoes Scrutator, Honourable Mention, 2003 Aurealis Award for best fantasy novel, and listed in the Sydney Morning Herald's BEST BOOKS OF 2003. Chimaera listed in the Sydney Morning Herald's BEST BOOKS OF 2004. 'Ian Irvine is arguably the most inventive fantasy author to emerge in recent years. A page-turner of the highest order ... Irvine can now consider himself comfortably ranked next to the works of Robert Jordan and David Eddings and, more appropriately, the mighty Anne McCaffrey. Formidable!' SFX 'This is, attractively, grimmer and grittier than most fantasy novels with a real sense of industrial squalor and a society in paranoid melt-down – and with a neatly unpleasant set of twists at the end.' Roz Kaveney, Amazon.uk 'Ian Irvine has produced one of those rarities in the fantasy genre, and that is a unique, well-thought-out world coupled with a well-written storyline. A gripping read.' Enigma 'Irvine imagines the epic landscape through which the characters move in persuasive detail and describes it powerfully. The misery of the manufactory's oppressed children and fearful adults is effectively communicated and elaborated. Driven by fear and inadequacy ... they cheat, lie and betray others in the cause of their own ambition, but are nonetheless sympathetically portrayed.' Australian Book Review.

*The Future of Nuclear Waste* Rosemary Joyce,2020 How can sites of waste disposal be marked to prevent contamination in the future? The United States government addressed this challenge in planning for nuclear waste repositories. Consulting with experts in imagining future scenarios, in language and communication, and in anthropology, the Department of Energy sought to develop plans that would satisfy demands from the Environmental Protection Agency for a marker system that would be effective long into the future. Expert consultants proposed two very different designs: one based on archaeological sites recognized as cultural heritage monuments; the other proposing that certain forms invoke universal feelings. The Department of Energy opted for a design based on archaeological ruins, cited as proof human-made markers could last and communicate warnings for thousands of years. This book explores the common sense assumptions the experts made about their archaeological models, and shows how they are contradicted by what archaeologists understand about these places and things. The book alternates between discussions of archaeological marker designs and reflections on the alternative proposal based on archetypes intended to arouse universal responses. Recognizing these archetype designs as similar in scale and form to Land Art projects, it compares the way government experts proposed their designs would work with views of modern artists and critics. Drawing on views of indigenous people who disproportionately are asked to accommodate such projects, the book explores concessions within the project that only oral transmission is likely to ensure such sites remain identifiable long into the future--
