The Film Photography Handbook, 3rd Edition Chris Marquardt,Monika Andrae,2022-09-20

Film photography has recently witnessed a significant renaissance—and not just among those who have previously shot with film. Interest in film photography and analog photography has also grown enormously among those who have only ever shot digitally. In *The Film Photography Handbook, 3rd Edition*, authors Chris Marquardt and Monika Andrae speak to both types of film photographers as they offer an easy-to-understand, complete resource to shooting film. In this updated and expanded edition, they address today's working climate, including such topics as the hybrid film/digital workflow, the digitization of negatives, and using smartphones for light metering and to assist in film processing.

This book is intended for anyone who is curious about film and analog photography, whether you need a refresher course or are discovering this wonderful format for the first time. You'll learn how easy it is to shoot and process black-and-white film at home, and that just a little special equipment is needed to get into film photography.

You'll learn all about:

- The important differences between film and digital photography
- Numerous film cameras, as well as how to buy a secondhand camera
- Film formats, from 35 mm to medium format and large format
- Exposure settings, tonal values, and tonal representations in different types of film, from color negatives and slides to the enormous spectrum of black-and-white films
- Processing film, covering everything you need to know: equipment, chemicals, and workflow
- Scanning negatives to bring your analog photography into a digital workflow
- Both presenting and archiving your prints and negatives

Working in film and embracing analog photography can also prove to be a great inspiration for your own digital photography, as well. *The Film Photography Handbook, 3rd Edition* covers it all—from the technical to the creative—and will have you shooting film in no time, whether it's with an old rangefinder, an inexpensive Holga, or a medium-format Rolleiflex or Hasselblad.

Walker Evans Svetlana Alpers, 2023-11-07 A magisterial study of celebrated photographer Walker Evans Walker Evans (1903–75) was a great American artist photographing people and places in the United States in unforgettable ways. He is known for his work for the Farm Security Administration, addressing the Great Depression, but what he actually saw was the diversity of people and the damage of the long Civil War. In Walker Evans, renowned art historian Svetlana Alpers explores how Evans made his distinctive photographs. Delving into a lavish selection of Evans's work, Alpers uncovers rich parallels between his creative approach and those of numerous literary and cultural figures, locating Evans within the wide context of a truly international circle. Alpers demonstrates that Evans's practice relied on his camera

choices and willingness to edit multiple versions of a shot, as well as his keen eye and his distant straight-on view of visual objects. Illustrating the vital role of Evans's dual love of text and images, Alpers places his writings in conversation with his photographs. She brings his techniques into dialogue with the work of a global cast of important artists—from Flaubert and Baudelaire to Elizabeth Bishop and William Faulkner—underscoring how Evans's travels abroad in such places as France and Cuba, along with his expansive literary and artistic tastes, informed his quintessentially American photographic style. A magisterial account of a great twentieth-century artist, Walker Evans urges us to look anew at the act of seeing the world—to reconsider how Evans saw his subjects, how he saw his photographs, and how we can see his images as if for the first time.
