Three Daughters, Three Journeys Jill Charles,Indrani Mondal,Ranjita Chattopadhyay,Ananda

Chakrabarty,2017-05-18 Cancer threatens the lives of people around the world. Women, in particular, are at risk of certain cancers with a genetic cause. Certain mutations in the BRCA1 and BRCA2 genes put mothers and daughters at risk of breast and ovarian cancers. Unlike many cancers that most commonly occur after age 60, these inheritable cancers threaten women's lives, health and fertility even when they are young, before most would even begin to go for annual mammogram screenings to check for breast cancer. Three Daughters, Three Journeys takes on the biggest health issue of our time from a global perspective with three heroines fighting for their lives against cancer. Marzena, a Polish oncology nurse, has spent her life treating child patients with cancer. Then, she confronts it in her own family and her own body. Kamola, a rural Indian girl, knows she has symptoms of the same disease that took her mother, but feels afraid to discuss it with her father and brothers, knowing her family cannot afford medical treatment. Kamola confides in Dr Rini Mishra, a doctor testing a new treatment called Neelazin, using a bacterial anticancer protein in food, to destroy cancer cells. Selena, a wealthy woman of color in Chicago, finds out about her genetic risks of breast and ovarian cancer. She has a choice of preventative surgery that will save her life but remove any chance of having children. As she meets women who struggle to afford cancer treatment, Selena dedicates her life to providing affordable homes and counseling to families affected by the disease. Although the drug Neelazin is fictional, the possibility of new cancer treatments using bacterial anticancer proteins is being researched now. A problem with the current chemotherapy

for cancer treatment is the high toxicity of most of these drugs, as these drugs can enter both normal and cancer cells, though preferably cancer cells, causing the death of normal cells as well that are important in maintaining health. Another problem is that current chemotherapeutic drugs mostly target a single or few key steps that are important for cancer growth and proliferation and inhibit the growth of cancer cells. The cancer cells respond by quickly changing these single targets, thereby becoming resistant to the drugs, as is reflected in stage IV cancer patients. An alternative to chemotherapy would be to exploit the bacterial evolutionary wisdom and use certain proteins that can have preferential entry to cancer cells in order to minimize normal cell toxicity and multiple targets in cancer cells through protein-protein complex formation, thus reducing resistance development in cancer cells. An interesting advantage of protein drugs is to express them as part of food, and some recent research seems to suggest that oral consumption of such foods may allow the therapeutic protein to reach the blood stream to target the cancer. Women with the genetic risk factors could soon have the choice of taking a pill or such anticancer protein-expressing food to treat or prevent cancer, rather than removing the healthy tissue of the breasts and ovaries. Hopefully, they would not have to choose between fertility and survival, as is the implied message in this book, fictional as it is at this time.

*Orange is the New Pink* Marquita Bass, 2019-09-10 Do you think about your risk for getting breast cancer? If you are a female with breasts or love someone with breasts, this book is for you. According to the American Cancer Society, 1 in 8 (12%) women will get breast cancer in her lifetime. In 2019, it is estimated that 331,530 women will be diagnosed with breast cancer in the United States, and approximately 2 million women, worldwide. Breast cancer is NOT one disease. Triple-Negative Breast Cancer (TNBC) is an extremely aggressive form of breast cancer. A lot of women survive TNBC, and research is ongoing. Triple-Negative breast cancer patients should have FAITH and HOPE for a positive outcome. TNBC showed up in my life like a meteor from out of space. I am a seven-year survivor. *Orange is the New Pink: My Battle With Triple-Negative Breast Cancer* is a deeply personal story. I've combined humor and solid academic research to share: - My journey to survival which involved shock, sadness, fear, laughter, grief, cancer treatment, sexuality, body image sadness, rage, peace, love, forgiveness, risks, hope, triumph, God, family, friends, neighbors, my ex-husband, and wonderful medical professionals. - The need for targeted treatments for early stage triple-negative disease. - The importance of understanding and managing your individual breast cancer

risk factors. - The importance of being your own advocate whether it is for prevention or treatment of breast cancer.

*You Did What? Saying 'No' To Conventional Cancer Treatment* Hollie Quinn, Patrick Quinn, 2010-05 This is a story about a young woman with a very common but deadly illness who did a very uncommon thing when faced with

that disease. She disagreed with her doctors, rejected their treatment advice, and chose her own path to getting well again. She did this in the face of paralyzing fears of dying and leaving behind a motherless daughter. She did this in the face of the daunting task of researching and choosing a better treatment. She did this in the face of the intense pressures of social conformity telling her to listen to her doctors. What she did was extraordinarily brave and forward-thinking. In effect, she forged a better path through a thicket of fear, complexity, and pressure. She forged this path with the help of her husband, working as a team and exhibiting unyielding togetherness. This book chronicles the journey they took together, back to health.

*Say No to Radiation and Conventional Chemo* Diana Warren, 2014-08-15 Internationally acclaimed integrative medical oncologist James W. Forsythe, M.D., H.M.D., has praised Diana Warren for courage and tenacity in her arduous battle against Stage II breast cancer. Doctor Forsythe insists that “Diana deserves kudos from people around the world, for refusing to subject her body to unnecessary standard chemo and radiation that unscrupulous allopathic oncologists kept trying to require her to endure.” Featured in many hot-selling books written by others including media personality Suzanne Somers, and also the author of many successful books himself, Doctor Forsythe has hailed Diana for her dogged determination amid a non-stop quest to find effective natural, non-toxic treatments as her health deteriorated, while also hunting for an experienced doctor licensed to avoid high-dose poisonous options. “I strongly recommend that everyone who suffers from cancer read Diana’s compelling tale,” Doctor Forsythe said. “Today, Diana is playing a formidable role in helping to lead the way as a true champion in a quest to inform the public of the urgent need to avoid toxic treatments when feasible in certain

circumstances, and how to find acceptable natural remedies—plus the importance of avoiding ‘standard-of-care’ chemo and radiation when under the care and guidance of a qualified, licensed medical professional.” After reading many hundreds of books on cancer, Doctor Forsythe hails Diana’s publication as being “by far among the best from the viewpoint of a person who never attended medical school. Readers undoubtedly will benefit when learning of the exceptional example Diana has set for us all.”
