Chips Challenging Champions J. Schaeffer, Jaap van den Herik, 2002-05 One of the earliest dreams of the fledgling field of artificial intelligence (AI) was to build computer programs that could play games as well as or better than the best human players. Despite early optimism in the field, the challenge proved to be surprisingly difficult. However, the 1990s saw amazing progress. Computers are now better than humans in checkers, Othello and Scrabble; are at least as good as the best humans in backgammon and chess; and are rapidly improving at hex, go, poker, and shogi. This book documents the progress made in computers playing games and puzzles. The book is the definitive source for material of high-performance game-playing programs.

A SHORT ACCOUNT OF THE HISTORY OF MATHEMATICS W. W. Ball Rouse, 2021-07 The subject-matter of this book is a historical summary of the development of mathematics, illustrated by the lives and discoveries of those to whom the progress of the science is mainly due. It may serve as an introduction to more elaborate works on the subject, but primarily it is intended to give a short and popular account of those leading facts in the history of mathematics which many who are unwilling, or have not the time, to study it systematically may yet desire to know. The first edition was substantially a transcript of some lectures which I delivered in the year 1888 with the object of giving a sketch of the history, previous to the nineteenth century, that should be intelligible to any one acquainted with the elements of mathematics. In the second edition, issued in 1893, I rearranged parts of it, and introduced a good deal of additional matter.

Emma's Fantastique Word Play Shirley A. Franklin, 2009-06 Emma Miller, a Lilliputian, is on her way to winning big! A delicious twist to the competition is that most of the answers have to be sent by text message. Emma, with nimble fingers, is rather good at that, too. It seems that life experiences and home-school lessons prepared them to give the Griffins some stiff competition in this exciting annual event.--Page 4 of cover.

40th Anniversary Volume: Advancing into the 21st Century , 2000-05-23 Humans are often distinguished from other animals by their ability, even need, to see patterns in everyday life. As we enter a new millennium, all aspects of society seem to want to take stock of what has happened in the

past and what is likely to happen in the future. The computer industry is no different from others. Advances in Computers has been published continuously since 1960 and this year's volume is the fiftieth technical volume in the series (two index volumes were published as volumes 50 and 51). Since it is the fortieth year of publication, we decided to look back on the changes that have occurred since Volume 1 of Advances in computers appeared in 1960. We looked at the six chapters of that initial volume and decided that an appropriate anniversary volume for this series would be a collection of papers on the same topics that appeared in 1960. What has happened to those technologies? Are we making the progress we thought we would or are events moving more slowly? Love & War Deluxe James Carville, Mary Matalin, 2014-01-07 The deluxe eBook edition of *Love & War* includes over twenty five additional photos of James Carville and Mary Matalin over the course of their celebrated careers in politics, and at home with their family in Louisiana. Interspersed throughout the text are eleven exclusive videos of them expanding on the various topics discussed within the book, providing an exclusive glimpse into the dynamic between this fascinating couple. For twenty years, James Carville and Mary Matalin have held the mantle of the nation's most politically opposed, ideologically mismatched, and intensely opinionated couple. In this follow-up to their groundbreaking *All's Fair: Love, War, and Running for President*, Carville and Matalin take a look at how they—and America—have changed in the last two decades. If nothing else, this new collaboration proves that after twenty years of marriage they can still manage to agree on a few things. *Love & War* traces, in their two distinct voices, James and Mary's story from the end of the 1992 presidential campaign—where he managed Bill Clinton's electoral triumph while she suffered defeat as George H. W. Bush's key strategist—till now. Mary focuses on issues of family, faith, and foreign enemies and offers insights from her kitchen table as well as the White House Cabinet Room, while James's concentration is politics and love—the triumphant and troubled Clinton era, George W. Bush's complicated presidency, the election of Barack Obama, the rise of the corrosive partisanship that dominates political life in Washington today, and the overriding abiding romance he holds for his native Louisiana and his wife and children. Together, the Carville-Matalins reflect on raising two daughters in the pressure cooker of the nation's capital, and their momentous 2008 decision to leave D.C. and move their family to New Orleans. Post-Katrina, James and Mary's efforts to rebuild and promote that city have become a central part of their lives—and a poignant metaphor for moving the nation forward. A fascinating look at the last two decades in American politics and an intimate, quick-witted primer on grown-up relationships and values, *Love & War* provides unprecedented insight into one of our nation's most intriguing and powerful couples. With their natural charm and sharp intelligence, Carville and Matalin have written undoubtedly the most spirited memoir of the year.

Sibling Therapy Karen Gail Lewis, 2023 Just mention the word sibling, and everyone has a story to share. It might be a happy story or a miserable one, but they want to tell it.
