Graphing Calculator for Nys Math B... and Beyond Kathleen Noftsier, 2006-09 Graphing Calculator for NYS Math B... and Beyond was developed as the curriculum for a ½ year or 1 semester math elective course to follow Graphing Calculator for NYS Math A... and Beyond. It gives instruction and practice in the use of the TI-83+/TI-84+ family of graphing calculators for advanced algebra and trigonometry skills. It has been used by dozens of schools in New York State as a course, integrated into the 11th grade math course, or as remediation. Students learn more than how to push buttons. This workbook takes them into the math behind how the graphing calculator works and teaches how to most effectively use this powerful tool. It also includes an introduction to programming the calculator. Math teachers and college students have also found it very useful in maximizing their use and understanding of technology. The book includes instructions, review, and questions taken from the NYS Math B Regents questions. The material has been praised as easy to understand and has been credited with raising student success level on the NYS Math B Regents exam.

Discovering Calculus with Graphing Calculator Mary Margaret Shoaf-Grubbs, 1996-02-15 Written as an enrichment supplement to a course in one-variable calculus, this lab manual enables students to apply calculus concepts with a better and more complete conceptual understanding in the place of rote memorization. The graphing calculator provides students with an extremely powerful tool to aid in this understanding along with insight into traditional calculus topics through graphical representations. It is a tool

controlled by students themselves, offering a means of concrete imagery and giving them new control over their learning environment as well as the pace of that learning process.

Exploring Brief Calculus with a Graphing Calculator Charlene Beckmann,1993-01-01

Brief Calculus Ruric Wheeler,Karla Neal,Roseanne Hofmann,1996-02-01 This user friendly, mathematically sound focuses on using the graphing calculator to explore new ideas which are validated by calculus methods, to create concepts using calculus and then support them with numerical or graphical techniques and to work a problem numerically or graphically because it cannot be solved by calculus procedures.

Workshop Calculus with Graphing Calculators Nancy Baxter Hastings,2012-12-06 Based on the use of graphing calculators by students enrolled in calculus, there is enough material here to cover precalculus review, as well as first-year single variable calculus topics. Intended for use in workshop-centered calculus courses, and developed as part of the well-known NSF-sponsored project, the text is for use with students in a math laboratory, instead of a traditional lecture course. There are student-oriented activities, experiments and graphing calculator exercises throughout the text. The authors themselves are well-known teachers and constantly striving to improve undergraduate mathematics teaching.
