Serious Educational Game Assessment: Practical Methods and Models for Educational Games, Simulations and Virtual Worlds L.A. Annetta, Stephen Bronack, 2011-07-22 In an increasingly scientific and technological world the need for a knowledgeable citizenry, individuals who understand the fundamentals of technological ideas and think critically about these issues, has never been greater. There is growing appreciation across the broader education community that educational three dimensional virtual learning environments are part of the daily lives of citizens, not only regularly occurring in schools and in after-school programs, but also in informal settings like museums, science centers, zoos and aquariums, at home with family, in the workplace, during leisure time when children and adults participate in community-based activities. This blurring of the boundaries of where, when, why, how and with whom people learn, along with better understandings of learning as a personally constructed, life-long process of making meaning and shaping identity, has initiated a growing awareness in the field that the questions and frameworks guiding assessing these environments should be reconsidered in light of these new realities. The audience for this book will be researchers working in the Serious Games arena along with distance education instructors and administrators and students on the cutting edge of assessment in computer generated environments.

Digital Content Creation Rae Earnshaw, John Vince, 2012-12-06 The very word digital has acquired a status that far exceeds its humble dictionary definition. Even the prefix digital, when associated with familiar sectors such as radio, television, photography and telecommunications, has reinvented these industries, and provided a unique opportunity to refresh them with new start-up companies, equipment, personnel, training and working practices - all of which are vital to modern national and international economies. The last century was a period in which new media stimulated new job opportunities, and in many cases created totally new sectors: video competed with film, CDs transformed LPs, and computer graphics threatened traditional

graphic design sectors. Today, even the need for a physical medium is in question. The virtual digital domain allows the capture, processing, transmission, storage, retrieval and display of text, images, audio and animation without familiar materials such as paper, celluloid, magnetic tape and plastic. But moving from these media to the digital domain introduces all sorts of problems, such as the conversion of analog archives, multimedia databases, content-based retrieval and the design of new content that exploits the benefits offered by digital systems. It is this issue of digital content creation that we address in this book. Authors from around the world were invited to comment on different aspects of digital content creation, and their contributions form the 23 chapters of this volume.

A Linguistic History of Arabic Jonathan Owens, 2006-05-11 A Linguistic History of Arabic presents a reconstruction of proto-Arabic by the methods of historical-comparative linguistics. It challenges the traditional conceptualization of an old, Classical language evolving into the contemporary Neo-Arabic dialects. Professor Owens combines established comparative linguistic methodology with a careful reading of the classical Arabic sources, such as the grammatical and exegetical traditions. He arrives at a richer and more complex picture of early Arabic language history than is current today and in doing so establishes the basis for a comprehensive, linguistically-based understanding of the history of Arabic. The arguments are set out in a concise, case by case basis, making it accessible to students and scholars of Arabic and Islamic culture, as well as to those studying Arabic and historical linguists.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the

official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
