The Routledge Companion to Global Internet Histories Gerard Goggin, Mark McLelland, 2017-02-17 The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions, language cultures and social contexts across the globe. While the Internet is now in its fifth decade, the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy. From Tunisia to Taiwan, this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history. Interdisciplinary in scope, the collection offers a variety of historical lenses on the development of the Internet: as a new communication technology seen in the context of older technologies; as a new form of sociality read alongside previous technologically mediated means of relating; and as a new media vehicle for the communication of content.

Technobiophilia Sue Thomas,2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of

the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. *Technobiophilia: Nature and Cyberspace* offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

Darrow,2000 The art was the best thing about the movie. This book provides an opportunity to appreciate it without the blight of Keanu Reeves' acting. Serving as a pre-production archive of the work related to The Matrix, this coffee table edition includes the complete script, along with stills from the movie, four double-sided gatefolds featuring conceptual drawings, and commentary by the artists. Some in color, some in black and white, approximately 700 storyboards (including three cut from the final film) tell the story with a comic book sensibility. Author William Gibson provides an afterword. c. Book News Inc.
