*Internet Resources and Services for International Real Estate Information* Sheau-Yu J. Chao, 2001-02-28 You're investing in real estate, relocating to a new state, or maybe moving to a new country. You go to the Internet, an endless source of information. But is it current? Is it accurate? Can you even find what you need? Here is an analytic guide to nearly 2000 real estate Web sites. Data for more than 220 regions, states, and countries are divided into six sections representing the major continents. The book runs the gamut with data resources for broad geographical regions right down to individual localities (including U.S. states). Indexes to Web site titles, key content, sponsors, and country of origin make this guide essential to everyone from real estate practitioners (developers, bankers, and investors, etc.) to students and researchers in the field.

Max Liebermann and International Modernism Marion Deshmukh, Françoise Forster-Hahn, Barbara Gaehtgens, 2011-05 Although Max Liebermann (1847–1935) began his career as a realist painter depicting scenes of rural labor, Dutch village life, and the countryside, by the turn of the century, his paintings had evolved into colorful images of bourgeois life and leisure that critics associated with French impressionism. During a time of increasing German nationalism, his paintings and cultural politics sparked numerous aesthetic and political controversies. His eminent career and his reputation intersected with the dramatic and violent events of modern German history from the Empire to the Third Reich. The Nazis' persecution of modern and Jewish artists led to the obliteration of Liebermann from the narratives of modern art, but this volume contributes to the recent wave of scholarly literature that works to recover his role and his oeuvre from an international perspective.

*The Holy Spirit's Guidance in Max International* Rick Eugene Meyer, 2013 This project will examine the impact of obedience and disobedience to the Holy Spirit on Max International associates as well as other business leaders.

*Self-Determination, Statehood, and the Law of Negotiation* Robert P. Barnidge, Jr., 2016-01-28 From the Madrid Invitation in 1991 to the introduction of the Oslo process in 1993 to the present, a negotiated settlement has remained the dominant leitmotiv of peacemaking between Israel and the Palestinian people. That the parties have chosen negotiations means that either side's failure to comply with its obligation to negotiate can result in an internationally wrongful act and, in response, countermeasures and other responses. This monograph seeks to advance our understanding of the international law of negotiation and use this as a framework for assessing the Israeli-Palestinian dispute, with the Palestinian people's unsuccessful attempt to join the United Nations as a Member State in autumn 2011 and the successful attempt to join the same institution as a non-Member Observer State in November 2012 providing a case study for this. The legal consequences of these applications are not merely of historical interest; they inform the present rights and obligations of Israel and the Palestinian people. This work fills a significant gap in the existing international law scholarship on the Israeli-Palestinian dispute, which neither engages with this means of dispute settlement generally nor does so specifically within the context of the Palestinian people's engagements with international institutions. 'Based on primary research, this book explores materials that were not analyzed before. It treats a highly political issue with scientific objectivity that strikes a balance between various points of view. The book will be an essential reading to all those involved in peace studies, international negotiations and Israeli-Palestinian conflict'. Mutaz M Qafisheh, Associate Professor of International Law, Hebron University. 'A compelling and innovative account of the legal aspects of the Palestinian-Israeli conflict: a must read.' Efraim Karsh, King's College London and Bar-Ilan University, author of *Palestine Betrayed*. 'A superbly imagined and executed study on Palestine that puts the 'negotiation imperative' at the

heart of its narrative, fully interrogating the involvement of public international law at each step of the long and layered history that is vigorously brought to life in these pages. A study that also promises texture, nuance, and depth to the legal analysis it offers-and it delivers handsomely on each of these fronts.' -Dino Kritsiotis, Chair of Public International Law & Head of the International Humanitarian Law Unit, University of Nottingham.

**Multi-Criteria Decision-Making Techniques for Improvement Sustainability Engineering Processes** Edmundas Kazimieras Zavadskas, Dragan Pamučar, Željko Stević, Abbas Mardani, 2020-12-15 The success of any activity and process depends fundamentally on the possibility of balancing (symmetry) needs and their satisfaction. That is, the ability to properly define a set of success indicators. The application of the developed new multi-criteria decision-making (MCDM) methods can be eliminated or decreased by decision-makers' subjectivity, which leads to consistency or symmetry in the weight values of the criteria. In this Special Issue, 40 research papers and one review study co-authored by 137 researchers from 23 different countries explore aspects of multi-criteria modeling and optimization in crisp or uncertain environments. The papers propose new approaches and elaborate case studies in the following areas of application: MCDM optimization in sustainable engineering, environmental sustainability in engineering processes, sustainable multi-criteria production and logistics processes planning, integrated approaches for modeling processes in engineering, new trends in the multi-criteria evaluation of sustainable processes, and multi-criteria decision-making in strategic management based on sustainable criteria.

*Maritime Piracy and the Construction of Global Governance* Michael J. Struett, Jon D. Carlson, Mark T. Nance, 2013-05-07 Piratical attacks have become more frequent, violent, costly and increasingly threaten to undermine order in the international system. Much attention has focused on Somalia, but piracy is a problem worldwide. Recent coordination efforts among states in South East Asia appear to have helped in the area, but elsewhere piracy has expanded. Interestingly, international law has long recognized piracy as a crime and provided tools for universal suppression, yet piracy persists. In this book, a handpicked group of leading experts in the field of International Relations use maritime piracy as a means to expose the incongruities in our understanding of global governance. Using broadly constructivist approaches to understand international actors' responses to the challenges created by maritime piracy, the contributors question a number of myths and misconceptions around piracy and analyze the various ways that international law and organizations channel actors' understandings of maritime piracy and their efforts to respond to it. In doing so, they expose some shaky foundations for IR theorists: how do we conceive of governance and

legitimacy when they are delinked from the territorial aspect of the modern nation-state? What happens to prospects for cooperation when we get to the nitty-gritty questions of practice related to paying for trials, imprisoning and maintaining captured pirates, bearing the burden of policing sea-lanes, or even determining what constitutes a pirate? Does anyone have a monopoly on the legitimate use of force at sea, and how is that legitimacy constructed? *Maritime Piracy and the Construction of Global Governance* offers an improved theoretical understanding of the response of the international community to maritime piracy and broadens our understanding of the complex and sometimes countervailing motivations of all the actors involved, from international organizations and states down to the pirates themselves.
