Medicine Wheel Oracle MSW CHT Rev. Donata Ahern, 2021-10 Since the author's first book, *Medicine Wheel: Path of the Heart*, she has wanted to make the Medicine Wheel Oracle available. The project was left in prototype, and has now been edited and prepared for publication by her editor. Based on the Maya Child's Count, this booklet provides the guidebook for the Oracle. The readings for each number have been compiled for convenience. The texts for each reading are complete and in the author's own voice. When combined with a set of discs, this is a powerful tool for gaining insight into the day, or into a question. It will bring the wisdom of the Medicine Wheel clearly into focus when used daily.

The Gender Wheel Maya Gonzalez, 2018-09-10 This is our world. Like many things in nature it's round and holds everyone at the same time. This is the Gender Wheel. Like our world it's round and holds everyone at the same time too... In 2010 Maya introduced the Gender Wheel and the Gender Team in the *Gender Now Coloring Book*. It was a jammed packed coloring extravaganza exploring bodies, nature and history in relation to multiple gender identities. It also opened up the possibility of play and expansion around our still limited language of boy and girl. Now the Gender Team returns, expanded and stronger than before, inviting you on a picture book journey through the Gender Wheel. This body positive book is a powerful opportunity for a supportive adult and child to see a wide range of bodies, understand the origins of the current binary gender system, how we can learn from nature to see the truth that has always existed and revision a new story that includes room for all bodies and genders. The Gender Wheel offers a nature-based, holistic non-western framework of gender in a kid-friendly way. (Also available as a clothed School Edition.) www.genderwheel.com *They She He Me: Free to Be!* is a powerful companion to this book and uses pronouns as a place to expand ideas about

gender and celebrate personal expression. Together these books offer an integrated foundation to talk to kids about gender and expand our thinking as we remember that we ALL belong.

Astronaut Gods of the Maya Erich von Däniken, 2017-05-25 A visual tour of the evidence for ancient astronauts in Mesoamerica • Includes more than 200 full-color photographs from the author's personal archives • Details the astronaut technology--helmets, tanks, hoses, keyboards, rockets--clearly illustrated in stone carvings and statues from Mesoamerican sites such as Palenque, Chichén Itzá, and Teotihuacán in Mexico and Tikal in Guatemala • Explores the similarities of Maya pyramids with those at Kanchipuram in South India Sharing more than 200 never-before-published full-color photographs from his personal archives, bestselling author Erich von Däniken provides clear evidence of ancient alien contact and technology among the archaeological sites of the Maya as well as other ancient cultures, such as the Aztecs and the Hindus. He reveals how the "gods" immortalized in Maya sculptures, carved reliefs, and myth were not supernatural beings but technologically advanced visitors, astronauts who gifted the Maya with their sophisticated understanding of calendar time and cosmology. He explains how, with no explanation for their technologies and origins, the Maya interpreted the visitors as divine and, thus, the "gods" were born. Examining stone carvings and statues from many Mesoamerican sites such as Palenque, Chichén Itzá, and Teotihuacán in Mexico and Tikal in Guatemala, von Däniken reveals the astronaut technology--helmets, tanks, hoses, keyboards, rockets--clearly illustrated in these ancient depictions of the gods. He explores the similarities of Plato's writings with the Chilam Balam books of Mexico and compares "ancient alien" features in myths around the world, paralleling how mercury is mentioned as a fuel ingredient of flying machines in ancient India with the discovery of mercury at Copán, Palenque, and Teotihuacán as well as in the grave of a Chinese emperor and two Egyptian graves on Nabta Playa. Illustrating the similarities of Mayan step pyramids with those of Kanchipuram in South India, the author explains how Mayan pyramids are crowned with a small temple, residence, or landing field of the gods, while the pyramids of South India are topped with a Vimana, a "godly" flying vehicle. Offering visual proof of the

ancient world's contact with advanced alien visitors they recorded as gods and teachers, von Däniken also raises the question of the "heavenly" origins of royal families and dynasties in Mesoamerica, Egypt, and beyond, revealing how the Mayan kings of Palenque and the pharaohs of Egypt may be descendants of the "gods."

The 8 Calendars of the Maya Hunbatz Men,2009-12-29 Mayan daykeeper Hunbatz Men reveals the multi-calendar system of the Maya that guided the lives of his ancestors and how it can guide us today • The first book to reveal the secrets of the Mayan Pleiades calendar: the Tzek’eb • Explains how the Maya used their astronomical knowledge to guide their lives on Earth The Mayan Calendar has taken on special prominence with the imminent arrival of 2012, a date that many claim is the end of that calendar. However, as Mayan elder and daykeeper Hunbatz Men shows, the cosmological understanding of his ancestors was so sophisticated that they had not one, but many calendars, each based on the cycles of different systems in the cosmos. In this book he reveals for the first time the Tzek’eb, or Pleiades, Calendar of 26,000 years, which charts the revolution of our solar system around Alcyone, the central star of the Pleiades system. He also discusses the K’uuk’ulcan Calendar of the 4 seasons of the solar year and the wheel of the K’altunes Calendar, which is composed of 13 cycles of 20 years each that form a calendar of 260 years. In traditional Mayan culture the computation of time was not determined by simple economic or social motives. The calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic pulsation, to the rhythm of the annual seasons, and to the other cycles that dictate changes upon Earth. Mayan

understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life--from planning when to conceive (parents could choose not only the sex of their child but its vocation and future destiny) to plotting out the course of the entire society. Pyramids played a crucial role in applying this wisdom because, as Hunbatz Men shows, they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars. This book reveals for the first time the wisdom of the multi-calendar Mayan system and how it can help guide our modern world.

An Overview of the Mayan World Gualberto Zapata Alonzo,1988

The Birth of Technology in Mesoamerica Ethan Gomez, For thousands of years, people in Central America have found ways to improve their lives. Tools and technologies help us do more work with less effort and make our lives easier. But how did those tools and technologies come about? The Maya people were among the first groups to make discoveries that led to new technology in Mesoamerica. And now scientists uncover more about these ancient people by using modern technologies like computers and lasers! In the past, people could only see the universe in one way. They could not travel very far or very fast. But now that science and technology have changed the world, we can see things that were hidden before. We have new ways of getting from one place to another and new tools and materials that help us make textiles, boats, and paper—and even understand the past! Technology has improved in many ways, like finding better ways to get from one place to another. For example, modern technology has made transportation faster, easier, and more efficient than it used to be. Traveling long distances is much easier than before the invention of trains, cars, and airplanes. Education depends mainly on how effective teaching methods were used back then compared to today's standards; therefore, without proper instruction methods being utilized by teachers back then, there wouldn't be any hope for students' success later on down their own paths towards achieving higher learning goals. Once again, it was scientists using modern technology to help us learn more about the ancient Maya people. In Mexico, scientists have also studied the old Maya people using modern technology. They have discovered that they were more advanced than we thought, not just farmers and traders, but builders as well! The Maya had many things we take for granted today, like electricity and airplanes, but they also had inventions like books and clocks, which we don't have today! These discoveries show that even though these fantastic people lived thousands of years ago, they could still invent new things back then, just like when someone created something today (like a bike). Archaeologists have found artifacts showing how vital these things were to how these ancient people lived. In archaeology, the word artifact refers to any object left behind by people in the past. Artifacts can be made of many materials, including wood, stone, and metal. Archaeologists study these things to learn more about the people who made them and how they lived. A few discoveries have revealed things about the ancient people we never knew. For example, researchers

now know that Mayan culture was more advanced than previously thought. The old Maya had a complex social structure, religious system, and calendar that was far more developed than what was once understood by modern-day archaeologists. They also had a problematic transportation and textile system—all previously misunderstood by archaeologists who studied the civilization's remains. The world has changed a lot since the ancient Maya lived. But there is still so much we don't know about how they lived and what they thought. That's why scientists study these artifacts today. They want to learn more about them and their culture so we can learn from them too!
