The Personal MBA Josh Kaufman,2010-12-30 Master the fundamentals, hone your business instincts, and save a fortune in tuition. The consensus is clear: MBA programs are a waste of time and money. Even the elite schools offer outdated assembly-line educations about profit-and-loss statements and PowerPoint presentations. After two years poring over sanitized case studies, students are shuffled off into middle management to find out how business really works. Josh Kaufman has made a business out of distilling the core principles of business and delivering them quickly and concisely to people at all stages of their careers. His blog has introduced hundreds of thousands of readers to the best business books and most powerful business concepts of all time. In *The Personal MBA*, he shares the essentials of sales, marketing, negotiation, strategy, and much more. True leaders aren't made by business schools—they make themselves, seeking out the knowledge, skills, and experiences they need to succeed. Read this book and in one week you will learn the principles it takes most people a lifetime to master.

Rethinking the MBA Srikant M. Datar,David A. Garvin,Patrick Gerard Cullen,2010 The authors give the most comprehensive, authoritative and compelling account yet of the troubled state of business education today and go well beyond this to provide a blueprint for the future.

Elite MBA Programs at Public Universities Mimi Wolverton,Larry Penley,2004-11-30 Business education programs should practice what they preach: applying the principles of strategic analysis to play to their strengths and develop distinctive offerings that attract the most profitable customers—in this case, students, faculty, local communities, and the institutions that support them financially. With the costs of private MBA programs skyrocketing, public universities, which generally operate out of the spotlight of the Harvards and Whartons, have a tremendous opportunity to distinguish themselves as centers of innovative, high-quality education. Mimi Wolverton and Larry Penley conducted extensive research to identify the qualities of those public institutions across the country—from the University of Washington to Georgia Tech—that have successfully established competitive advantages, generally through a combination of cost leadership, differentiation, and focus. *Elite MBA Programs at Public Universities* features 12 in-depth case studies by senior representatives of the respective institutions, detailing the process by which they developed and launched programs to raise their profiles and ultimately compete aggressively for talent and support. From developing strategic alliances with local businesses and complementary academic departments to establishing online and overseas courses to investing in state-of-the-art facilities, these schools are setting new standards for business education—and measuring the positive results, for example, in terms of increased funding, higher faculty research productivity, higher rankings, and greater student diversity. Wolverton and Penley frame the case studies by applying the concepts of strategy theory, drawing lessons that can be applied in other educational institutions, as well as for students of strategy and general readers interested in emerging trends in business education. The result is a fascinating peek behind the scenes at the most innovative MBA programs, as well as a rich canvas for observing the principles of strategic management in action.

Roadside MBA Michael Mazzeo,Paul Oyer,Scott Schaefer,2014-06-10 While playing hooky from a conference in Boston a few years back, three former colleagues from Northwestern's Kellogg School of Management hopped in a car and headed on a road trip. They pulled into a shoe store in Maine and noticed that the sales help was unusually pushy. After a few questions, they discovered the store had a secret shopper program, in which employees would be marked down if they were not sufficiently aggressive with customers. A lightbulb went off. Instead of teaching the tried-and-true case studies involving GE and Microsoft, these three wise men decided to pull their heads out of their ivory towers and go in search of insights about product differentiation, pricing, brand management, building a team, and a host of other topics. Why take your cues on employee compensation from Wall Street when you can learn from a Main Street company like Couer D'Alene's best crime-scene cleaner? Want to learn about scaling a business? Come meet Dr. Burris, the flying orthodontist, who operates multiple, profitable practices in rural Arkansas. The book isn't all egghead; the chapters are spiced with the type of vehicular mishaps and Maalox moments that are common on any road trip.

The 12-Week MBA Bjorn Billhardt,Nathan Kracklauer,2024-02-06 Based on award-winning leadership development programs experienced by over 100,000 professionals at Fortune Global 500 companies, The 12-Week MBA offers practical tips for aspiring business leaders while making an impassioned case for a new approach to management education. Getting an MBA takes time and money, making it inaccessible to many people who want to take charge in the business world. The 12-Week MBA offers an alternative way to learn business essentials by focusing on the skills and knowledge required to succeed as both a manager and a business leader. The 12-Week MBA's unique premise is that business leaders in any industry, any function, and at any level need the same core knowledge, skills, and attitudes to effectively manage and lead. That core consists of working through and with other people to create value while using financial concepts and metrics to maximize the value created for all company stakeholders. The timeless essence of managing numbers and leading people can be learned in less time and at a lower cost than in a traditional two-year MBA, where much of the curriculum may become obsolete by the time students graduate. Authors Bjorn Billhardt and Nathan Kracklauer are senior executives at Abilitie, a global leadership development company that has served over 100,000 learners in fifty countries. Abilitie's clients include some of the world's most recognizable brands such as Coca-Cola, The New York Times, and Dell. Now the key lessons from Abilitie's 12- Week MBA curriculum are available in this accessible and engaging guide.

The Future of the MBA Mihnea C. Moldoveanu,Roger L. Martin,2008-04-25 The MBA is probably the hottest ticket among the current university graduate degree offerings--every year, more than 120,000 students enroll in MBA programs in the United States, and the estimates in Europe do not lag far behind. In addition, job prospects have never looked better for business school graduates; corporations are hiring more business school graduates every year, and compensating them more handsomely. The Future of the MBA provides a sorely needed detailed and systematic review of the major contemporary debates on management education. At the same time, it makes a striking new proposal that will certainly have an impact in business schools: that managers need to develop a series of qualitative tacit skills which could be appropriately developed by integrative curricula brought from different disciplines, including sociology, philosophy, and other social sciences. Moldoveanu and Martin, both involved in the greatly respected integrative business education program at the

Rotheman School of Management, provide a guide on how to design a reliable integrated program for management students. One of the main assets of the book is that it relies not just on speculative thinking, but on real life experience, and that it also includes case studies that will appeal to practicing managers. As an authoritative reference on MBA education, it will appeal to faculty and staff of business schools, as well as students in related fields like education and public policy.
