Web Search Savvy Barbara G. Friedman, 2004 Anyone who uses the Internet for research will find much of value here, including techniques that harness the power of advanced searches to optimize search results, avoid advertising clutter, and locate low- or no-cost databases. Screen captures and diagrams illustrate the steps, rationale, and results to accompany various search strategies. This book emphasizes techniques that make the Web work for individuals rather than for advertisers, such as choosing the most appropriate search engine for the job and tweaking its advanced options to narrow a search and optimize results; identifying cost-free sources of online data; using creative approaches to locate information; evaluating the integrity of online data; and protecting the privacy of the researchers and the researched.--Publisher.

Comparative Causal Mapping Mauri Laukkanen, Mingde Wang, 2016-03-03 Comparative Causal Mapping: The CMAP3 Method, by Mauri Laukkanen and Mingde Wang, is an introduction to the conceptual backgrounds of causal (cognitive) mapping and to the typical methods in comparative and composite causal mapping, based on either interview or questionnaire primary data or on secondary documentary data. The discussed CCM research is supported by CMAP3, a freely downloadable (www.uef.fi/cmap3) Windows software platform for CCM studies. The book has three parts. The first discusses the theoretical underpinnings and methodological issues in causal mapping including the target phenomena and different interpretations of causal maps/mapping, the motives for using CCM methods and the criteria of method selection. The second part focuses on the technical aspects of using CMAP3 in typical CCM research. The third part presents three CCM study cases: a classical document-based study; a semi-structured interview-based (SIM) study; and a methodological study comparing SIM with an electronically administered structured hybrid CCM approach. In addition to demonstrating CCM practices, they suggest that different methods produce divergent results and are thus not substitutable. The research task should determine which CCM approach is appropriate. The book will appeal to both academic and professional audiences, in particular to doctoral students and experienced researchers looking for new topics and method approaches, but also to practitioners in fields such as management and organization studies, organizational development, public policy and education, and knowledge management.

Living the Law of One 101 Carla L Rueckert, 2014-06-03 Written with the intent of creating an entry-level, simple to read report concerning the core principles of the Law of One and Confederation philosophy in general, this book takes the reader through a discussion of Law of One principles such as unity, free will, love, light and polarity.

It then works with the Confederation version of the concept that each person has an energy body with seven chakras. It discusses this concept and its implications for the seeker, chakra by chakra. It turns the player into a Player! This is a light-hearted book about the Game of Life. It is an easy read, and yet the principles of the Law of One are not simplified. Rather, they are offered in an order which makes coherent sense. Principle builds upon principle to offer an overall view of Confederation philosophy which is a bit easier to grasp as a whole than the original Law of One books, where the question-and-answer format offers the same information in a somewhat fragmented form, although with endless interest. If you would like to play the Game of Life with Carla, please give this book a try!

Managerial and Organizational Cognition Colin Eden, J.-C. Spender, Professor J C Spender, 1998-03-19 Interest in the field of managerial and organizational cognition has been intense over the last few years. This book explores and provides an in-depth overview of the latest developments in the area and presents answers to the questions accompanying its growth: Is the field distinctive? How does it extend our understanding of managerial processes? From different disciplinary perspectives and empirical settings, the contributors study patterns of managerial cognition. In particular, the longitudinal approach reflected in the volume contributes to its impact as a grounded, practice-based analysis of cognition in organizations.

Ada 95 David A. Wheeler, 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

How Engineers Create the World William S. Hammack, 2011-09-06 In over 200 delightful short essays Bill captures the creativity and impact of engineers. He talks of their spectacular achievements - jets, satellites, skyscrapers, and fiber optics - but draws his deepest insights from the everyday, the quotidian. He finds beauty, elegance and meaning in Ferris wheels, Tupperware, Slinkys, mood rings, waterless urinals and Velcro. Delivered originally on public radio between 1999 and 2006, each essay is a small slice of the world created by engineers. The essays also illuminate and inform about the important topics of our day by showing how intertwined engineering and technology are with terrorism, security, intellectual property and our cultural legacy.

Winners, Losers & Microsoft S. J. Liebowitz, Stephen Margolis, 2001 Few issues in high technology are as divisive as the raging debate over competition, innovation, and antitrust. Why do certain products and technologies become dominant while others fail? Is there something about high technology that makes markets less dependable at choosing goods and services? Will the robust competition and technological advances of the past two decades continue? Or, will they be suffocated by larger firms employing monopolistic practices? Is antitrust primarily employed against monopolies to increase competition for the benefit of consumers, or is it actually a vehicle that firms use against their rivals to restrict the competitive process? This book examines these and other questions

confronting high-technology markets.

The Economics of QWERTY S. J. Liebowitz, 2002-02 The top left hand side of the keyboard reads Q-W-E-R-T-Y. Is this inefficient layout an inefficient early development to which we are now forever committed? The economics of QWERTY describes cases in which it has been claimed that technologies which have become accepted are not as good as rival technologies. Perhaps they have been locked in at an early stage, preventing newer, better possibilities from taking hold. Distinguished economists Stan Liebowitz and Steven Margolis have critically examined the various aspects of the economics of QWERTY and its implications, calling into question the historical accuracy of the standard account of QWERTY and similar cases such as those of Beta/VHS and Macintosh/Windows. They contend that no plausible case of inferior standards being locked in has ever been documented, though much antitrust activity and legislative policy has been based on the belief in the occurrence of such cases. The Economics of Qwerty brings together into one volume Liebowitz and Margolis's essential contributions, remarkable for their eloquence and relevance, to consider these issues, which are of real and enduring importance for the functioning of the market economy. Together they constitute a complete account of the critique of the economics of QWERTY.

Open Education: from OERs to MOOCs Mohamed Jemni, Kinshuk, Mohamed Koutheair Khribi, 2016-08-11 This book focuses on the emerging phenomenon of Massive Open Online Courses (MOOCs), which are changing the fundamental underpinning of educational systems worldwide and forcing educators and other stakeholders to re-think the way instruction is currently conducted. It examines the origins of MOOCs within the context of the open education movement, and reviews current policies, guidelines and initiatives to promote the use of ICT in education through the development and use of open educational resources from international practices, including implementation and licensing issues. With a particular focus on new trends in MOOCs, the book explores the potential of this emerging paradigm, its rise and its impact on openness in education. Various new initiatives are also presented, including more global examples and those that are more geared to certain regional contexts. The book is intended as a stepping stone for both researchers and practitioners who are looking to approach MOOCs from a holistic perspective.

The Aaron/Q'uo Dialogues Barbara Brodsky, Carla L. Rueckert, 2011-12-06 Inspired by the breakthrough channeled series *The Law of One*, Buddhist teacher Barbara Brodsky sent its author, Carla L. Rueckert, some transcriptions of her own material. Struck by Brodsky's lucid, witty, and fearless channeling, Rueckert invited Brodsky to co-channel a conversation between their spirit teachers, Q'uo and Aaron. Developed from the transcripts of nine weekends of joint channeling, *The Aaron/Q'uo Dialogues: An Extraordinary Conversation between Two Spiritual Guides* offers teachings from a "positive polarity" perspective, and provides answers to a wide range of spiritual questions, such as: • "What is the spiritual path and how do we live it?" • "Why do seemingly bad things happen to people who are trying to follow the dictates of love?" • "How do we open the heart?" Offering wise solutions to the major problems that prevent people from living with more awareness and compassion, these conversations offer the spiritual seeker a valuable template for a life of spiritual peace.
