**Better Buses, Better Cities** Steven Higashide, 2019-10-10 Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, **Better Buses, Better Cities** describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.

**Rails Across Dixie** Jim Cox,2010-11-17 Covering legendary and obscure intercity passenger trains in a dozen Southeastern states, this book details the golden age of train travel. The story begins with the inception of steam locomotives in 1830 in Charleston, South Carolina, continuing through the mid-1930s changeover to diesel and the debut of Amtrak in 1971 to the present. Throughout, the book explores the technological achievements, the romance and the economic impact of traveling on the tracks. Other topics include contemporary museums and excursion trains; the development of commuter rails, monorails, light rails, and other intracity transit trains; the social impact of train travel; and historical rail terminals and facilities. The book is supplemented with more than 160 images and 10 appendices.

**The Heart of the City** Alexander Garvin,2019-05-07 Downtowns are more than economic engines:

they are repositories of knowledge and culture and generators of new ideas, technology, and ventures. They are the heart of the city that drives its future. If we are to have healthy downtowns, we need to understand what downtown is all about; how and why some American downtowns never stopped thriving (such as San Jose and Houston), some have been in decline for half a century (including Detroit and St. Louis), and still others are resurging after temporary decline (many, including Lower Manhattan and Los Angeles). The downtowns that are prospering are those that more easily adapt to changing needs and lifestyles. In *The Heart of the City*, distinguished urban planner Alexander Garvin shares lessons on how to plan for a mix of housing, businesses, and attractions; enhance the public realm; improve mobility; and successfully manage downtown services. Garvin opens the book with diagnoses of downtowns across the United States, including the people, businesses, institutions, and public agencies implementing changes. In a review of prescriptions and treatments for any downtown, Garvin shares brief accounts--of both successes and failures--of what individuals with very different objectives have done to change their downtowns. The final chapters look at what is possible for

downtowns in the future, closing with suggested national, state, and local legislation to create standard downtown business improvement districts to better manage downtowns. This book will help public officials, civic organizations, downtown business property owners, and people who care about cities learn from successful recent actions in downtowns across the country, and expand opportunities facing their downtown. Garvin provides recommendations for continuing actions to help any downtown thrive, ensuring a prosperous and thrilling future for the 21st-century American city.

**Hidden History of Transportation in Los Angeles** Charles P. Hobbs,2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.
