Our common wealth Thomas M. Hanna,2018-09-10 Public ownership is more widespread and popular in the United States than is commonly understood. This book is the most comprehensive and up-to-date analysis of the scope and scale of U.S. public ownership, debunking frequent misconceptions about the alleged inefficiency and underperformance of public ownership and arguing that it offers powerful, flexible solutions to current problems of inequality, instability, and unsustainability—explaining why after decades of privatization it is making a comeback, including in the agenda of Jeremy Corbyn’s Labour Party in Britain. Hanna offers a vision of deploying new forms of democratized public ownership broadly, across multiple sectors, as a key ingredient of any next system beyond corporate capitalism. This book is a valuable, extensively researched resource that sets out the past record and future possibilities of public ownership at a time when ever more people are searching for answers.

The Future of Disability in America Institute of Medicine,Board on Health Sciences Policy,Committee on Disability in America,2007-10-24 The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

Icarus Down James Bow,2016 Earth's survivors cling to life on an unforgiving, distant planet, next to the sun! Three generations after the crash of the colony ship *Icarus*, Iapyx is barely hanging on: one of thirteen cities suspended halfway down deep chasms. The sun on the diamond lands above will kill a man in less than five minutes. The ticktock monsters in the fog forest below are a little slower -- but quite a bit smarter. An electromagnetic wash has disabled the computers, the radios, even the lightbulbs. It's the steam and clockwork age reborn: a careful society, rationed and stratified. Which suits Simon Daud just fine. Simon likes the rules, and knows his place -- in the shadow of his older brother, Isaac. All he wants is to earn his wings as an ornithopter pilot and get to work in the flight bays. But on his final test flight, something goes wrong. Isaac is killed. Simon is burned; his body will never be the same. Neither will his world. Not everything in Iapyx is quite as it seems, and through his rehabilitation Simon falls into the middle of a conspiracy that will bring everything he's ever known to the ground. Down in the fog forest, monsters await -- but so does the truth . . . if Simon can survive long enough to find it.

Introduction to Information Systems R. Kelly Rainer,Efraim Turban,2008-01-09 WHATS IN IT FOR ME? Information technology lives all around us-in how we communicate, how we do business, how we shop, and how we learn. Smart phones, iPods, PDAs, and wireless devices dominate our lives, and yet it's all too easy for students to take information technology for granted. Rainer and Turban's *Introduction to Information Systems*, 2nd edition helps make Information Technology come alive in the classroom. This text takes students where IT lives-in today's businesses and in our daily lives while helping students understand how valuable information technology is to their future careers. The new edition provides concise and accessible coverage of core IT topics while connecting these topics to Accounting, Finance, Marketing, Management, Human resources, and Operations, so students can discover how critical IT is to each functional area and every business. Also available with this edition is WileyPLUS - a powerful online tool that provides instructors and students with an integrated suite of teaching and learning resources in one easy-to-use website. The WileyPLUS course for *Introduction to Information Systems*, 2nd edition includes animated tutorials in Microsoft Office 2007, with iPod content and podcasts of chapter summaries provided by author Kelly Rainer.

Strategy Guide to Enable and Promote the Use of Fixed-route Transit by People with Disabilities Russell H. Thatcher,Caroline Ferris,Marilyn Golden,Jason Quan,Beth Hamby,Elizabeth H. Ellis,Jim Purdy,David Chia,2013 TRB's Transit Cooperative Research Program (TCRP) Report 163: Strategy Guide to Enable and Promote the Use of

Fixed-Route Transit by People with Disabilities is designed to help transit agencies fulfill the primary goals of the Americans with Disabilities Act of 1990 (ADA) by making mainstream fixed-route bus and rail systems accessible to and usable by individuals with disabilities. The focus of the Strategy Guide is to offer guidance on providing public services in the most integrated setting possible. -- Publisher's note.

Merchants of Truth Jill Abramson,2020-02-11 Former executive editor of The New York Times and one of our most eminent journalists Jill Abramson provides a “valuable and insightful” (The Boston Globe) report on the disruption of the news media over the last decade, as shown via two legacy (The New York Times and The Washington Post) and two upstart (BuzzFeed and VICE) companies as they plow through a revolution that pits old vs. new media. “A marvelous book” (The New York Times Book Review), *Merchants of Truth* is the groundbreaking and gripping story of the precarious state of the news business. The new digital reality nearly kills two venerable newspapers with an aging readership while creating two media behemoths with a ballooning and fickle audience of millennials. “Abramson provides this deeply reported insider account of an industry fighting for survival. With a keen eye for detail and a willingness to interrogate her own profession, Abramson takes readers into the newsrooms and boardrooms of the legacy newspapers and the digital upstarts that seek to challenge their dominance” (Vanity Fair). We get to know the defenders of the legacy presses as well as the outsized characters who are creating the new speed-driven media competitors. The players include Jeff Bezos and Marty Baron (The Washington Post), Arthur Sulzberger and Dean Baquet (The New York Times), Jonah Peretti (BuzzFeed), and Shane Smith (VICE) as well as their reporters and anxious readers. *Merchants of Truth* raises crucial questions that concern the well-being of our society. We are facing a crisis in trust that threatens the free press. “One of the best takes yet on journalism’s changing fortunes” (Publishers Weekly, starred review), Abramson’s book points us to the future.

Beyond Transparency Brett Goldstein,Lauren Dyson,2013-09-30 The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities? Edited by Brett Goldstein, former Chief Data Officer for the City of Chicago, with Code for America, this book features essays from over twenty of the world's leading experts in a first-of-its-kind instructive anthology about how open data is changing the face of our public institutions. Contributors include: Michael Flowers, Chief Analytics Officer, New York City Beth Blauer, former director of Maryland StateStat Jonathan Feldman, CIO, City of Asheville Tim O'Reilly, founder & CEO, O'Reilly Media Eric Gordon, Director of Engagement Game Lab, Emerson College Beth Niblock, CIO, Louisville Metro Government Ryan & Mike Alfred, Co-Founders, Brightscope Emer Coleman, former director of the London Datastore Mark Headd, Chief Data Officer, City of Philadelphia As an essential volume for anyone interested in the future of governance, urban policy, design, data-driven policymaking, journalism, or civic engagement, *Beyond Transparency* combines the inspirational glow and political grit of *Profiles in Courage* with the clarity of an engineer's calm explanation of how something technical actually works. Here are the detailed how-to stories of many members of the first generation of open government pioneers, written in a generous, accessible style; this compilation presents us with a great deal to admire, ample provocation, and wise guidance from a group of remarkable individuals. -Susan Crawford, author of *Captive Audience* Just as he did during his time in my administration, Goldstein has brought together industry leaders to discuss issues of relevance in the open data movement and the practical implications of implementing these policies... This book will help continue the work to make open government a reality across the country. - Mayor Rahm Emanuel, City of Chicago A must-read for anyone who is passionate about what open data can do to transform city living. - Boris Johnson, Mayor of London

The Future of Public Transportation Paul Comfort,2020-02-15 Paul Comfort is our industry's leader on what's coming next for mobility. After a thirty year career in public transportation operations and executive leadership, he now travels the globe hearing directly from our top CEOs on what's working, what's not and what's next. If anyone can pull together a compendium on the Future of Public Transportation, it's Paul and he's done so in this book. Congrats! - Erinn Pinkerton, President and CEO of BC Transit. With Paul's long and distinguished career in transportation as well as his current involvement in mobility through his podcast *Transit Unplugged* and other thought leadership, Paul is uniquely positioned to provide a clear eyed and expert view on the future of public transportation and what we as concerned stakeholders should be thinking about.-Blair Schlecter, VP of Economic Development and Govt. Affairs, Beverly Hills Chamber of Commerce As a 38 year public transportation industry veteran, and former CEO and Chair of APTA, I can say that technology and mobility is adapting faster than ever to societal demands and technological abilities. Paul Comfort has his finger on the pulse of these fast changing developments and has pulled together for this book a top notch roster of executives from the public and private sector to provide their input.-Peter Varga, Former Chair American Public Transportation Association (APTA). This new book *The Future of Public Transportation* is written by transit industry leader Paul Comfort and over forty top public transport leaders, CEOs, futurists and associations. The book examines the transformations coming this decade for cities and the public transportation systems that serve them allowing readers to become more informed and ready for these changes. In the next few years technology enhancements will produce and expand game changing new mobility options such as autonomous vehicles on regular bus routes and Mobility-as-a-Service (MaaS) smart phone apps allowing passengers to plan, pay for and subscribe to a full menu of traditional public transit and private microtransit options for their travel. Cities will further regulate and optimize the rampant expansion of e-bikes and e-scooters. Mobile public transit fare paying options will expand including allowing the use of not only cell phone and tap and go credit cards but even wearable fare payment jewelry and watches. Traditional transit systems are rebooting their bus networks, adding in high frequency routes & reducing the friction that slows their buses by adding bus only lanes, transit signal priority (TSP) and electronic fare payment systems. TNCs have now entered the public mobility marketplace and are supplementing or replacing public transit services for many. Transit fleets are becoming greener shifting to zero emission fuels like electric or hydrogen, large multi-national firms are transforming how we build and operate new rail and other capital projects through Public Private Partnerships (P3). Hyperloop and air taxis are looking more like science than fiction. Cities are becoming smart and eliminating traffic in the public square or charging for its usage in peak times. Most transit software is moving to the cloud

and privately-owned electric automobiles could be the autonomous taxicabs of tomorrow. All these trends & innovations in technology and business models are explored in depth in this book with the collaboration of thought leaders, industry associations, CEOs and the major companies that are creating and utilizing them. In the end, bold leaders will take us to new horizons as they always have, but they will do so using modern technology to move us in ways we never thought possible, and in the process, eliminate barriers that have too long stood in the way of true mobility for all. And THAT is the Future of Public Transportation.

Stir Barbara Lynch,2019-02-05 Although Barbara Lynch was born and raised in South Boston, not Tuscany, many critics believe her food rivals the best of Italy. It has been praised by Bon Appétit, Food & Wine, and Gourmet, and many more. Lynch’s cuisine is all the more remarkable because it is self-taught. In a story straight out of Good Will Hunting, she grew up in the turbulent projects of “Southie,” where petty crime was the only viable way to make a living. But in a home ec class in high school, she discovered her passion. Through a mix of hunger for knowledge, hard work, and raw smarts, she gradually created her own distinctive style of cooking, mining Italian and French classics for ideas and seasoning them with imagination. The 150 recipes in Stir combine sophistication with practicality. Appetizers like baked tomatoes and cheese and crisp, buttery brioche pizzas. Dozens of the artful pastas Lynch is famous for, such as little lasagnas with chicken meatballs, and potato gnocchi with peas and mushrooms. Lobster rolls with aioli. Chicken wrapped in prosciutto and stuffed with melting Italian cheese. Creamy vanilla bread pudding with caramel sauce. Accompanied by Lynch’s forthright opinions and stunning four-color photographs, these dishes will create a stir on home tables.

Hidden History of Transportation in Los Angeles Charles P. Hobbs,2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

Trains, Buses, People Christof Spieler,2018-10-23 What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit—rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board member, and enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end, *Trains, Buses, People* shows that it is possible with the right tools to build good transit.
