Boston in Transit Steven Beaucher,2023-03-07 A richly illustrated story of public transit in one of America’s most historic cities, from public ferry and horse-drawn carriage to the MBTA. A lively tour of public transportation in Boston over the years, *Boston in Transit* maps the complete history of the modes of transportation that have kept the city moving and expanding since its founding in 1630—from the simple ferry serving an English settlement to the expansive network of the Massachusetts Bay Transportation Authority, or MBTA. The story of public transit in Boston—once dubbed the Hub of the Universe—is a journey through the history of the American metropolis. With a remarkable collection of maps and architectural and engineering drawings at hand, Steven Beaucher launches his account from the landing where English colonists established that first ferry, carrying passengers between what is now Boston’s North End and Charlestown—and sparing them what had been a two-day walk around Boston Harbor. In the 1700s, horse-drawn coaches appeared on the scene, connecting Boston and Cambridge, with the bigger, better omnibus soon to follow. From horse-drawn coaches, horse-drawn railways evolved, making way for the electric streetcar networks that allowed the city’s early suburbs to sprout—culminating in the multimodal, regional public transportation network in place in Boston today. With photographs, brochures, pamphlets, guidebooks, timetables, and tickets, *Boston in Transit* creates a complete picture of the everyday experience of public transportation through the centuries. At once a practical reference, local history, and travelogue, this book will be cherished by armchair tourists, day-trippers, and serious travelers alike.

Integrating Passenger Ferry Service with Mass Transit Timothy D. Payne,2013 The purpose of this synthesis was to document the state of the practice of integration between land- and water-based transit systems and to explore successful aspects of seamless integration. The report assembles and presents information in numerous locations around the United States, supplemented with examples from Canada, Australia, and Bermuda. To accomplish this effort a literature review was undertaken that received limited results. However, a selected survey of 46 respondents out of 57 transit and ferry agencies, as well as agencies and companies in Canada, Australia, and the United Kingdom, including Bermuda, received an 80% response rate. The respondents represent a geographically representative sample—varying in size and age of system, degree of coordination between ferry and transit, and type of community served. The synthesis summarizes findings from 60 different ferry-to-land-based transit interfaces. Case examples of key factors of land- and water-based integration are offered for Long Wharf in Boston, Massachusetts; TransLink’s SeaBus in Vancouver, British Columbia; New York Waterway’s Hoboken Terminal; and Washington State Ferries and Kitsap Transit in Bremerton, Washington. Tim Payne, Danielle Rose, and Hazel Scher, Nelson\Nygaard Consulting Associates, Inc., Seattle, Washington, collected and synthesized the information and wrote the report, under the guidance of a panel of experts in the subject area. The members of the topic panel are acknowledged on the preceding page. This synthesis is an immediately useful document that records the practices that were acceptable within the limitations of the knowledge available at the time of its preparation. As progress in research and practice continues, new knowledge will be added to that now at hand—Preface.

Urban and Regional Policy and Its Effects Margaret Weir,Nancy Pindus,Howard Wial,Harold Wolman,2012-02-02 The mission of the Urban and Regional Policy and Its Effects series is to inform policymakers, practitioners, and scholars about the effectiveness of select policy approaches, reforms, and experiments in addressing the key social and economic problems facing today’s cities, suburbs, and metropolitan areas. Volume four of the series introduces and examines thoroughly the concept of regional resilience, explaining how resilience can be promoted—or impeded—by regional characteristics and public policies. The authors illuminate how the walls that now segment metropolitan regions across political jurisdictions and across institutions—and the gaps that separate federal laws from regional realities—have to be bridged in order for regions to cultivate resilience. How Do I Tax Thee? Kristin Tate,2018-03-20 We all know the government taxes our income. Federal, state, and local taxes are withheld by employers, as are social security payments. But what about the many other ways the government covertly drains money from our wallets? Have you studied your cell phone bill? Customers in New York State pay an average of 24.36% in combined taxes on their wireless bills. They’re also charged for obscure services they didn’t ask for and don’t understand, like a universal service fund fee, an FCC compliance fee, a line service fee, and an emergency services fee. These aren’t taxes, strictly speaking. The government imposes these administrative and regulatory costs, and your wireless provider passes them along to you. What about your cable bill? Your power bill? Your trash bill? The cost of groceries, a gallon of gas, a cab ride, a hotel stay, and a movie ticket are all inflated by hidden fees. How much of what you pay at the grocery store, pump, airport, or the box office is really an indirect tax? In a series of short, pointed, fact-laden, humorous chapters, Kristin Tate exposes how up to half of your income is siphoned straight into federal, state, and city government coffers—and also where these hidden taxes and fees come from.—Dust jacket.

Congressional Record United States. Congress,1967 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Boston Below Joseph R. Votano,Karen E. Hosking,2013 Every day, roughly 720,000 people from all walks of life use the four lines of the Boston MBTA subway system: red, green, blue, and orange. The T, as it’s known, is a vital link to living, working, or visiting in Boston. The subway system acts as the city’s arteries. It includes 28 underground and 80 above-ground stations. Over 145 compelling art photographs explore the T-riders, their behavior, their actions when waiting for or riding a train, and their response to the chaotic push of rush hour. With a keen eye, both the T’s infrastructure and its many stations with their varied architecture, artwork, and physical layouts are captured. With the first tunnel excavation begun in 1895 and the last station completed in 1985, there is plenty of variation to explore. Interestingly, this volume also offers a rarely seen glimpse of how the trains are kept operational in several maintenance facilities. Here is a fascinating visual journey through one of the nation’s oldest subway systems. Whether you are a regular subway rider, a fan of photography, a train enthusiast, or a people watcher, there is something here for you.

 Roots to Power Lee Staples,2016-02-22 The third edition of the manual for community organizers tells readers how to most effectively implement community action for social change, clearly laying out grassroots organizing principles, methods, and best practices. Written for those who want to improve their own lives or the lives of others, this thoroughly revised how-to manual presents techniques groups can use to organize successfully in pursuit of their dreams. The book combines time-tested, universal principles and methods with cutting-edge material addressing new opportunities and challenges. It covers basic concepts and best practices and offers step-by-step guidelines on things an organizer needs to know, such as how to identify issues, formulate strategies, set goals, recruit participants, and much more. The work focuses on six organizing arenas: turf/geography, faith-based, issue, identity, shared experience, and work-related. It offers new or expanded material addressing community development, use of social media, internal organizational dynamics, electoral organizing, evaluation/assessment, and prevention of burnout for key leaders. There are also nuts-and-bolts articles by experts who address topics such as action research, lobbying, legal tactics, and grassroots fundraising. Numerous case examples, charts, worksheets, and small group exercises enrich the discussion and bring the material to life.

 The Race Underground Doug Most,2014-02-04 In the late nineteenth century, as cities like Boston and New York grew more congested, the streets became clogged with plodding, horse-drawn carts. When the great blizzard of 1888 crippled the entire northeast, a solution had to be found. Two brothers from one of the nation’s great families—Henry Melville Whitney of Boston and William Collins Whitney of New York—pursued the dream of his city digging America’s first subway, and the great race was on. The competition between Boston and New York played out in an era not unlike our own, one of economic upheaval, life-changing innovations, class warfare, bitter political tensions, and the question of America’s place in the world.The Race Underground is peopled with the famous, like Boss Tweed, Grover Cleveland and Thomas Edison, and the not-so-famous, from brilliant engineers to the countless sandhogs who shoveled, hoisted and blasted their way into the earth’s crust, sometimes losing their lives in the construction of the tunnels. Doug Most chronicles the science of the subway, looks at the centuries of fears people overcame about traveling underground and tells a story as exciting as any ever ripped from the pages of U.S. history. The Race Underground is a great American saga of two rival American cities, their rich, powerful and sometimes corrupt interests, and an invention that changed the lives of millions.
