Icarus Down James Bow, 2016 Earth's survivors cling to life on an unforgiving, distant planet, next to the sun! Three generations after the crash of the colony ship Icarus, Iapyx is barely hanging on: one of thirteen cities suspended halfway down deep chasms. The sun on the diamond lands above will kill a man in less than five minutes. The ticktock monsters in the fog forest below are a little slower -- but quite a bit smarter. An electromagnetic wash has disabled the computers, the radios, even the lightbulbs. It's the steam and clockwork age reborn: a careful society, rationed and stratified. Which suits Simon Daud just fine. Simon likes the rules, and knows his place -- in the shadow of his older brother, Isaac. All he wants is to earn his wings as an ornithopter pilot and get to work in the flight bays. But on his final test flight, something goes wrong. Isaac is killed. Simon is burned; his body will never be the same. Neither will his world. Not everything in Iapyx is quite as it seems, and through his rehabilitation Simon falls into the middle of a conspiracy that will bring everything he's ever known to the ground. Down in the fog forest, monsters await -- but so does the truth . . . if Simon can survive long enough to find it.

Shadow Work Craig Lambert, 2015-05-01 With the exception of sleep, humans spend more of their lifetimes on work than any other activity. It is central to our economy, society, and the family. It underpins our finances and our sense of meaning in life. Given the overriding importance of work, we need to recognize a profound transformation in the nature of work that is significantly altering lives: the incoming tidal wave of shadow work. Shadow work includes all the unpaid tasks we do on behalf of businesses and organizations. It has slipped into our routines stealthily; most of us do

not realize how much of it we are already doing, even as we pump our own gas, scan and bag our own groceries, execute our own stock trades, and build our own unassembled furniture. But its presence is unmistakable, and its effects far-reaching. Fueled by the twin forces of technology and skyrocketing personnel costs, shadow work has taken a foothold in our society. Lambert terms its prevalence as middle-class serfdom, and examines its sources in the invasion of robotics, the democratization of expertise, and new demands on individuals at all levels of society. The end result? A more personalized form of consumption, a great social leveling (pedigrees don't help with shadow work!), and the weakening of communities as robotics reduce daily human interaction. *Shadow Work* offers a field guide to this new phenomenon. It shines a light on these trends now so prevalent in our daily lives and, more importantly, offers valuable insight into how to counter their effects. It will be essential reading to anyone seeking to understand how their day got so full—and how to deal with the ubiquitous shadow work that surrounds them.

In the Morning I'll Be Gone Adrian McKinty, 2019-05-28 A Catholic cop tracks an IRA master bomber amidst the sectarian violence of the conflict in Northern Ireland in this pulse-pounding thriller from The New York Times bestselling and Edgar Award-winning author Adrian McKinty. "McKinty's writing is dark and witty with gritty realism, spot-on dialogue, and fascinating

characters.” —The Chicago Sun-Times It's the early 1980s in Belfast. Sean Duffy, a conflicted Catholic cop in the Protestant RUC (Royal Ulster Constabulary), is recruited by MI5 to hunt down Dermot McCann, an IRA master bomber who has made a daring escape from the notorious Maze prison. In the course of his investigations Sean discovers a woman who may hold the key to Dermot's whereabouts; she herself wants justice for her daughter who died in mysterious circumstances in a pub locked from the inside. Sean knows that if he can crack the locked-room mystery, the bigger mystery of Dermot's whereabouts might be revealed to him as a reward. Meanwhile the clock is ticking down to the Conservative Party conference in Brighton in 1984, where Mrs. Thatcher is due to give a keynote speech...

The Book of Will Lauren Gunderson, 2018-06-18 Without William Shakespeare, we wouldn't have literary masterpieces like *Romeo and Juliet*. But without Henry Condell and John Heminges, we would have lost half of Shakespeare's plays forever! After the death of their friend and mentor, the two actors are determined to compile the First Folio and preserve the words that shaped their lives. They'll just have to borrow, beg, and band together to get it done. Amidst the noise and color of Elizabethan London, *THE BOOK OF WILL* finds an unforgettable true story of love, loss, and laughter, and sheds new light on a man you may think you know.

The Goddess Solution Lisa Marie Rankin, 2021-04-13 In this practical spiritual guide, Lisa Marie Rankin shows how to apply ancient goddess wisdom to modern-day scenarios like dating, sex, careers, divorce, conflict and more. She'll teach you how to reconnect with your goddess nature so you can do less, receive more, live authentically and love passionately. You'll learn about goddesses from

across various traditions and discover that their wisdom is more relevant than ever. You can connect with Mary Magdalene to identify and rewrite beliefs that are limiting you. The Greek goddess Aphrodite will show you how to infuse your life and your relationships with passion. Durga, a Hindu warrior goddess, will inspire you to stand up for what you know to be right and speak your truth. Interwoven with these stories are spiritual concepts, modern thought leadership and practical examples that will help you tap into your inner goddess and create the life of your dreams. You'll learn that you have the power to birth new ideas, experience and invoke pleasure, rise above challenges and access your inner wisdom to get the most out of your one truly fantastic life. The goddess is not some esoteric deity that is out of reach or a spiritual sex bomb that you find on social media. You are the goddess in your current physical form, with your messy human experiences and hidden primal desires. When you learn to befriend all aspects of yourself, you can reclaim your crown and become the most radiant person you know. Lisa Marie Rankin will show you the way. Through meditation, journaling, prayer and self-care rituals, you can reveal your true goddess nature.

Island Cup James Sullivan,2012-07-17 To most of us wash-ashores, the islands of Martha's Vineyard and Nantucket are resort destinations, summer homes for the Kennedys, the Obamas, and--yes--Bill Belichick. But the year-rounders see a different picture. After the tourists and jetsetters leave, the cold weather descends, and the local shop owners, carpenters, and fishermen ready themselves for the main event: high school football. For over fifty years, the local teams been locked in a fierce rivalry. They play for pride, a trophy, and

very often, a shot at the league championship. Despite their tiny populations, both islands are dangerous on the football field. In this far-reaching book, James Sullivan tells the story not only of the Whaler-Vineyarder rivalry, but of two places without a country. Filled with empty houses nine months of the year, Nantucket and the Vineyard have long, unique histories that include such oddities as an attempt to secede from the U.S., and the invention of a proprietary sign language. Delving into the rich history of both places, Sullivan paints a picture of a bygone New England, a place that has never stopped fighting for its life--and for the rights to coveted Island Cup.

The Myth That Made Us Jeff Fuhrer, 2023-09-12 How our false narratives about post-racism and meritocracy have been used to condone egregious economic outcomes—and what we can do to fix the system. The Myth That Made Us exposes how false narratives—of a supposedly post-racist nation, of the self-made man, of the primacy of profit- and shareholder value-maximizing for businesses, and of minimal government interference—have been used to excuse gross inequities and to shape and sustain the US economic system that delivers them. Jeff Fuhrer argues that systemic racism continues to produce vastly disparate outcomes and that our brand of capitalism favors doing little to reduce disparities. Evidence from other developed capitalist economies shows it doesn't have to be that way. We broke this (mean-spirited) economy. We can fix it. Rather than merely laying blame at the feet of both conservatives and liberals for aiding and abetting an unjust system, Fuhrer charts a way forward. He supplements evidence from data with insights from community voices and outlines a system that provides more equal opportunity to accumulate both human and financial capital. His key areas of focus include universal access to high-quality early childhood education;

more effective use of our community college system as a pathway to stable employment; restructuring key aspects of the low-wage workplace; providing affordable housing and transit links; supporting people of color by serving as mentors, coaches, and allies; and implementing Baby Bonds and Reparations programs to address the accumulated loss of wealth among Black people due to the legacy of enslavement and institutional discrimination. Fuhrer emphasizes embracing humility, research-based approaches, and community involvement as ways to improve economic opportunity.

The Feather Thief Kirk Wallace Johnson, 2018-04-24 As heard on NPR's This American Life "Absorbing . . . Though it's non-fiction, *The Feather Thief* contains many of the elements of a classic thriller." —Maureen Corrigan, NPR's Fresh Air "One of the most peculiar and memorable true-crime books ever." —Christian Science Monitor A rollicking true-crime adventure and a captivating journey into an underground world of fanatical fly-tiers and plume peddlers, for readers of *The Stranger in the Woods*, *The Lost City of Z*, and *The Orchid Thief*. On a cool June evening in 2009, after performing a concert at London's Royal Academy of Music, twenty-year-old American flautist Edwin Rist boarded a train for a suburban outpost of the British Museum of Natural History. Home to one of the largest ornithological collections in the world, the Tring museum was full of rare bird specimens whose gorgeous feathers were worth staggering amounts of money to the men who shared Edwin's obsession: the Victorian art of salmon fly-tying. Once inside the museum, the champion fly-tier grabbed hundreds of bird skins—some collected 150 years earlier by a contemporary of Darwin's, Alfred Russel Wallace, who'd risked everything to gather them—and escaped into the darkness. Two years later, Kirk Wallace Johnson was waist high in a

river in northern New Mexico when his fly-fishing guide told him about the heist. He was soon consumed by the strange case of the feather thief. What would possess a person to steal dead birds? Had Edwin paid the price for his crime? What became of the missing skins? In his search for answers, Johnson was catapulted into a years-long, worldwide investigation. The gripping story of a bizarre and shocking crime, and one man's relentless pursuit of justice, *The Feather Thief* is also a fascinating exploration of obsession, and man's destructive instinct to harvest the beauty of nature.

The Future of Disability in America Institute of Medicine, Board on Health Sciences Policy, Committee on Disability in America, 2007-10-24 The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the

organizing and financing of disability-related research. The Future of Disability in America is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

The Future of Public Transportation Paul Comfort, 2020-02-15

Paul Comfort is our industry's leader on what's coming next for mobility. After a thirty year career in public transportation operations and executive leadership, he now travels the globe hearing directly from our top CEOs on what's working, what's not and what's next. If anyone can pull together a compendium on the Future of Public Transportation, it's Paul and he's done so in this book. Congrats! - Erinn Pinkerton, President and CEO of BC Transit. With Paul's long and distinguished career in transportation as well as his current involvement in mobility through his podcast Transit Unplugged and other thought leadership, Paul is uniquely positioned to provide a clear eyed and expert view on the future of public transportation and what we as concerned stakeholders should be thinking about. - Blair Schlecter, VP of Economic Development and Govt. Affairs, Beverly Hills Chamber of Commerce As a 38 year public transportation industry veteran, and former CEO and Chair of APTA, I can say that technology and mobility is adapting faster than ever to societal demands and technological abilities. Paul Comfort has his finger on the pulse of these fast changing developments and has pulled together for this book a top notch roster of executives from the public and private sector to provide their input. - Peter Varga, Former Chair American Public Transportation Association (APTA). This new book The Future of Public Transportation is written by transit industry leader Paul

Comfort and over forty top public transport leaders, CEOs, futurists and associations. The book examines the transformations coming this decade for cities and the public transportation systems that serve them allowing readers to become more informed and ready for these changes. In the next few years technology enhancements will produce and expand game changing new mobility options such as autonomous vehicles on regular bus routes and Mobility-as-a-Service (MaaS) smart phone apps allowing passengers to plan, pay for and subscribe to a full menu of traditional public transit and private microtransit options for their travel. Cities will further regulate and optimize the rampant expansion of e-bikes and e-scooters. Mobile public transit fare paying options will expand including allowing the use of not only cell phone and tap and go credit cards but even wearable fare payment jewelry and watches. Traditional transit systems are rebooting their bus networks, adding in high frequency routes & reducing the friction that slows their buses by adding bus only lanes, transit signal priority (TSP) and electronic fare payment systems. TNCs have now entered the public mobility marketplace and are supplementing or replacing public transit services for many. Transit fleets are becoming greener shifting to zero emission fuels like electric or hydrogen, large multi-national firms are transforming how we build and operate new rail and other capital projects through Public Private Partnerships (P3). Hyperloop and air taxis are looking more like science than fiction. Cities are becoming smart and eliminating traffic in the public square or charging for its usage in peak times. Most transit software is moving to the cloud and privately-owned electric automobiles could be the autonomous taxicabs of tomorrow. All these trends & innovations in technology and business models are explored in depth in this book with the

collaboration of thought leaders, industry associations, CEOs and the major companies that are creating and utilizing them. In the end, bold leaders will take us to new horizons as they always have, but they will do so using modern technology to move us in ways we never thought possible, and in the process, eliminate barriers that have too long stood in the way of true mobility for all. And THAT is the Future of Public Transportation.

Merchants of Truth Jill Abramson,2020-02-11 Former executive editor of The New York Times and one of our most eminent journalists Jill Abramson provides a “valuable and insightful” (The Boston Globe) report on the disruption of the news media over the last decade, as shown via two legacy (The New York Times and The Washington Post) and two upstart (BuzzFeed and VICE) companies as they plow through a revolution that pits old vs. new media. “A marvelous book” (The New York Times Book Review), Merchants of Truth is the groundbreaking and gripping story of the precarious state of the news business. The new digital reality nearly kills two venerable newspapers with an aging readership while creating two media behemoths with a ballooning and fickle audience of millennials. “Abramson provides this deeply reported insider account of an industry fighting for survival. With a keen eye for detail and a willingness to interrogate her own profession, Abramson takes readers into the newsrooms and boardrooms of the legacy newspapers and the digital upstarts that seek to challenge their dominance” (Vanity Fair). We get to know the defenders of the legacy presses as well as the outsized characters who are creating the new speed-driven media competitors. The players include Jeff Bezos and Marty Baron (The Washington Post), Arthur Sulzberger and Dean Baquet (The New York Times), Jonah Peretti (BuzzFeed), and Shane Smith (VICE) as well as their reporters and anxious readers. Merchants of Truth raises crucial questions that concern the well-being of our society. We are

facing a crisis in trust that threatens the free press. “One of the best takes yet on journalism’s changing fortunes” (Publishers Weekly, starred review), Abramson’s book points us to the future.

The Dream of the Great American Novel Lawrence

Buell, 2014-02-25 The first book in many years to take in the full sweep of national fiction, *The Dream of the Great American Novel* explains why this supposedly antiquated idea continues to thrive. It shows that four G.A.N. scripts are keys to the dynamics of American literature and identity--and to the myth of a nation perpetually under construction.

Trains, Buses, People Christof Spieler, 2018-10-23

What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit—rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board member, and enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers

analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end, *Trains, Buses, People* shows that it is possible with the right tools to build good transit.
