*Cyber Muslims* Robert Rozehnal,2022-04-21 Through an array of detailed case studies, this book explores the vibrant digital expressions of diverse groups of Muslim cybernauts: religious clerics and Sufis, feminists and fashionistas, artists and activists, hajj pilgrims and social media influencers. These stories span a vast cultural and geographic landscape-from Indonesia, Iran, and the Arab Middle East to North America. These granular case studies contextualize cyber Islam within broader social trends: racism and Islamophobia, gender dynamics, celebrity culture, identity politics, and the shifting terrain of contemporary religious piety and practice. The book's authors examine an expansive range of digital multimedia technologies as primary “texts.” These include websites, podcasts, blogs, Twitter, Facebook, Instagram, YouTube channels, online magazines and discussion forums, and religious apps. The contributors also draw on a range of methodological and theoretical models from multiple academic disciplines, including communication and media studies, anthropology, history, global studies, religious studies, and Islamic studies.

*A Sinner in Mecca* Parvez Sharma,2017-08-15 From the recipient of a 2018 Guggenheim Fellow Based on the New York Times' Critic Pick documentary The first book about the Hajj from a gay perspective, written by a man with a deep knowledge of Islamic history. This pilgrimage is the centerpiece of his book, and he recounts it with courage and fierce emotion. —The Guardian This is the Islam you've never been allowed to see. Daringly reported from its frontlines and forbidden to most of humanity for centuries. The Hajj pilgrimage is a journey every Muslim is commanded by God to go on at least once in a lifetime if they are able and, like millions, Parvez Sharma believes his spiritual salvation lies at Islam's ground zero, Mecca. But unlike the journeys of his fellow Muslims, the consequences of his own could be deadly. In *A Sinner in Mecca*, author, filmmaker, and 2018 Guggenheim Fellow Parvez chronicles his pilgrimage as a very openly gay Muslim to Saudi Arabia, where Islam's heart beats . . . and where being true to himself is punishable by death. Risking his life, Parvez embarks on a Jihad of the self—filming his experience along the way. Already under fire for his documentary *A Jihad for Love*, which looks at the coexistence of Islam and homosexuality, he would undoubtedly face savage punishment if exposed—from being thrown off a cliff to public beheading. Parvez's odyssey is at once audacious, global, and remarkable. He meets everyone from extremists to explorers of the spiritual kind and the world they open up is frightening . . . yet breathtaking. In Mecca, Parvez comes out to a pilgrim, who then asks him why he would want to be part of something that wants no part of him. This book is his answer to this question and many more. Parvez provides an unflinching look at our troubling unfolding history, including Hizbullah, ISIS, Trump, the race-wars, an embattled Europe, and more. He offers real solutions, borne of his efforts to get his hands dirty to find them. This is a lived history—and its author is no armchair theorist. Following the New York Times Critics' Pick hit documentary of the same title, *A Sinner in Mecca* unflinchingly showcases parts of the dangerous ideology that governs today's ISIS and how much it has in common with Saudi Arabia's sacred, yet treacherous dogma, Wahhabi Islam. *A Sinner in Mecca* is simultaneously one man's personal odyssey as well as a groundbreaking, provocative revelation of a clandestine world and its fastest growing and most contested religion.

**Screenscapes of e-Religiosity in India** Shekh Moinuddin,2023-04-01 This book deals with three different subjects: geography, social media and religion equally to discuss e-religiosity in terms of screenscapes that shaped digital socialization processes wherein the role of digital devices in general and smartphones in particular are considered crucial and critical. The spatial dimension is the primary foundation of the book wherein both space and place are discussed in digital manifestations in spatial sense. Religiosity is discussed variably in a sense of spirituality, social theories, religions and images. The book uses some illustrations to understand image politics. Image politics is quintessential in the age of digital technologies when production and reproduction of images are not restricted to business only; rather it attracts politics too and politicians often use the same to make political scores against opponents. The book covers contemporary digital discourses of e-religiosity in a sense of screenscapes that often found pivot in daily discussions across social media platforms. Screenscapes are considered as mediated technologies when contents can be accessed from different social media apps to construct or deconstruct their views, narratives, discourses, ideas, emotions, and perceptions around religious images in day-to-day activities, practices, rituals, customs, traditions, faiths and beliefs. The used illustrations exclusively map Indian religious gestures, identities, values, and rituals in digital-spatial contexts. The book discusses seven major questions and argues the same across the chapters in varied representations and interpretations: How and to what extent has the meaning of religiosity changed in the digital age? What are the dimensions of e-religiosity in India? How are digital devices (re)shaping religiosity in terms of e-religiosity? How and to what extent digital devices are negotiating with social and cultural lives? What is digital spatiality? How and to what extent does social media influence religiosity?

*Arabia: The Cradle of Islam* Samuel Marinus Zwemer,2021-11-05 The author of this instructive volume is in the direct line of missionary pioneers to the Moslem world. He follows Raymond Lull, Henry Martyn, Ion Keith-Falconer, and Bishop French, and, with his friend and comrade the Rev. James Cantine, now stands in the shining line of succession at the close of a decade of patient and brave service at that lonely outpost on the shores of the Persian Gulf. Others have followed in their footsteps, until the Arabian Mission, the adopted child of the Reformed Church in America, is at present a compact and resolute group of men and women at the gates of Arabia, waiting on God's will, and intent first of all upon fulfilling in the spirit of obedience to the Master the duty assigned them.

**Divining a Digital Future** Paul Dourish, Genevieve Bell,2014-01-10 A sociotechnical investigation of ubiquitous computing as a research enterprise and as a lived reality. Ubiquitous computing (or ubicomp) is the label for a “third wave” of computing technologies. Following the eras of the mainframe computer and the desktop PC, ubicomp is characterized by small and powerful computing devices that are worn, carried, or embedded in the world around us. The ubicomp research agenda originated at Xerox PARC in the late 1980s; these days, some form of that vision is a reality for the millions of users of Internet-enabled phones, GPS devices, wireless networks, and smart domestic appliances. In *Divining a Digital Future*, computer scientist Paul Dourish and cultural anthropologist Genevieve Bell explore the vision that has driven the ubiquitous computing research program and the contemporary practices that have emerged—both the motivating mythology and the everyday messiness of lived experience. Reflecting the interdisciplinary nature of the authors' collaboration, the book takes seriously the need to understand ubicomp not only technically but also culturally, socially, politically, and economically. Dourish and Bell map the terrain of contemporary ubiquitous computing, in the research community and in daily life; explore dominant narratives in ubicomp around such topics as infrastructure, mobility, privacy,

and domesticity; and suggest directions for future investigation, particularly with respect to methodology and conceptual foundations.

*Digital Sociology* Deborah Lupton,2014-11-05 We now live in a digital society. New digital technologies have had a profound influence on everyday life, social relations, government, commerce, the economy and the production and dissemination of knowledge. People’s movements in space, their purchasing habits and their online communication with others are now monitored in detail by digital technologies. We are increasingly becoming digital data subjects, whether we like it or not, and whether we choose this or not. The sub-discipline of digital sociology provides a means by which the impact, development and use of these technologies and their incorporation into social worlds, social institutions and concepts of selfhood and embodiment may be investigated, analysed and understood. This book introduces a range of interesting social, cultural and political dimensions of digital society and discusses some of the important debates occurring in research and scholarship on these aspects. It covers the new knowledge economy and big data, reconceptualising research in the digital era, the digitisation of higher education, the diversity of digital use, digital politics and citizen digital engagement, the politics of surveillance, privacy issues, the contribution of digital devices to embodiment and concepts of selfhood and many other topics. Digital Sociology is essential reading not only for students and academics in sociology, anthropology, media and communication, digital cultures, digital humanities, internet studies, science and technology studies, cultural geography and social computing, but for other readers interested in the social impact of digital technologies.
