**Minimalist Parenting** Christine K. Koh,Asha Dornfest,2016-10-04 We're in the midst of a parenting climate that feeds on more. More expert advice, more gear, more fear about competition and safety, and more choices to make about education, nutrition, even entertainment. The result? Overwhelmed, confused parents and overscheduled, overparented kids. In MINIMALIST PARENTING, Christine Koh and Asha Dornfest offer a fresh approach to navigating all of this conflicting background noise. They show how to tune into your family's unique values and priorities and confidently identify the activities, stuff, information, and people that truly merit space in your life. The book begins by showing the value of a minimalist approach, backed by the authors' personal experience practicing it. It then leads parents through practical strategies for managing time, decluttering the home space, simplifying mealtimes, streamlining recreation, and prioritizing self-care. Filled with parents' personal stories, readers will come away with a unique plan for a simpler life.

Digital Interactive TV and Metadata Arthur Lugmayr,Samuli Niiranen,Seppo Kalli,2004-06-22 The book shows how digital-interactive television (digiTV) will affect the relation between the broadcaster and the consumer. Standardization processes, technological paradigms, and application development issues will be discussed. The emerging applications, innovations, and future concepts are described in detail. The triangle: content - end-user - technology will be conceptualized to create a vision and to overview provision of services that will be major innovative

elements in the world of digital television. From the technical side, eXtensible Markup Language (XML)-based metadata standards are a major element in realizing new innovative concepts in the world of digital, interactive television. This book clearly shows by the introduction of applications and use-scenarios, which conceptual requirements and metadata models are applicable, which metadata subsets are applicable due to resource limitations, which metadata aspects are needed for nonlinear content viewing, etc. The book gives a broad and detailed both visionary and technical overview useful for graduates, engineers, and scientists; and last but not least decision-makers in the broadcasting industry.

*Digital Asset Management Unknown*

Author, 2012-10-12 Content and media asset management systems are core back office applications of the modern day broadcaster, yet there is little information available on the control and management of these systems and how content can be delivered over a variety of different channels: television, iTV, internet, webcasting, mobile phones and wireless PDAs. This book explains the potential for applying asset management systems to content creation models for distribution over a variety of outlets and the benefits gained from increased efficiency and lowering of costs. Taking an unbiased view and focusing on core principles rather than specific systems, David Austerberry presents the business case for digital asset management systems, demystifies some assumptions regarding the technology and provides a thorough introduction to the system components required, such as indexing, searching, middleware, database and rights management and web portals.

*Media Management* Bernd W. Wirtz, 2020-09-11

"Digitalization significantly changes the media. To cope with this change and to exploit new market opportunities is a major challenge for media corporations. Bernd Wirtz provides a valuable guideline for this new world, combining theory, facts, and practice." Dr. Hubert Burda, German publisher and Managing Corporate Partner of Hubert Burda Media Holding KG "The media business is subject to substantial change while differences between distinctive media areas are fading away. This is due to technical innovation in areas like transmittance of content, bearer of content and recording devices but also due to

new formats, trends and constant change of consumer behavior." The textbook "Media and Internet Management" stays abreast of changes and covers this topic on a well-founded and comprehensive basis. It makes a valuable contribution to theory and practice in media management and is highly recommendable to media managers."

Christoph Mohn, Chairman of the Supervisory Board, Bertelsmann AG "The world of media is full of challenges and dynamic conditions for its field. The dynamic of this market is accelerated even more by new digital technologies and ongoing globalization. This book is an absolute "must have" for everyone who wants to know more about the basics, conditions and requirements of modern media management. The analytical clearness and structure make this publication highly relevant for students, but also for managers." Urs Rohner, Chairman of the Board of Directors, Credit Suisse Group AG "Media Management is a textbook, but a very welcome newcomer for students and teachers as it fills a market gap for good educational material in this rapidly evolving field. It is concise, simple (but not simplistic), and contains a contemporary overview of concepts and tools for media managers. " Prof. Dr. Bozena I. Mierzejewska, Editor of The International Journal on Media Management, Fordham University, New York "Summed up, with his second edition Wirtz managed to strengthen the outstanding position of his publication "Media Management". His textbook shines because of its content, analytical clearness and the high relevance for business practice without losing its academic background. With the second edition this book has established its position in the field of media business as the leading standard reference book in Germany. It is suitable for business students, lectures as well as managers who can gain magnificent information from it." Prof. Dr.

Wolfgang Fritz, Director of the Institute of Marketing,  
Braunschweig University of Technology, Germany;  
Honorary Professor at the Institute of Business  
Administration, University of Vienna, Austria.

Bronx Requiem John Clarkson, 2016-11-08 The death of Paco Packy Johnson shouldn't have surprised anyone. Paco Johnson spent a lifetime in the system -- starting in juvie at age 10, then prison for most of his adult life. But he managed to make some real friends in prison, friends who helped him get parole, a place to stay, and plans to help him adjust to a life outside prison after seventeen years behind bars. But only seventeen hours after he was released, he was found dead -- murdered -- in the streets of the Bronx. James Beck can't save Packy any longer -- but he can try to find out what happened to Packy, and why, and exact a measure of justice. Beck, ringleader of a tight clique of ex-cons based in Brooklyn's Red Hook section, is determined to accord Packy at least some dignity and a measure of justice. But what drove Packy out onto the streets of the Bronx his first night back? Who did he run into that hated him enough to viciously beat him before executing him, and yet left behind his wallet full of cash? But what at first appears to be a simple, if tragic, street killing, quickly becomes something much more difficult and complex. And it will take all the skills, connections, and cunning of Beck and his team not only to learn the truth but to survive the forces they've unwittingly unleashed.
