Field Trials of Health Interventions Peter G. Smith, Richard H. Morrow, David A. Ross, 2015-06-25 This is an open access title available under the terms of a CC BY-NC 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Before new interventions are released into disease control programmes, it is essential that they are carefully evaluated in 'field trials'. These may be complex and expensive undertakings, requiring the follow-up of hundreds, or thousands, of individuals, often for long periods. Descriptions of the detailed procedures and methods used in the trials that have been conducted have rarely been published. A consequence of this, individuals planning such trials have few guidelines available and little access to knowledge accumulated previously, other than their own. In this manual, practical issues in trial design and conduct are discussed fully and in sufficient detail, that Field Trials of Health Interventions may be used as a 'toolbox' by field investigators. It has been compiled by an international group of over 30 authors with direct experience in the design, conduct, and analysis of field trials in low and middle income countries and is based on their accumulated knowledge and experience. Available as an open access book via Oxford Medicine Online, this new edition is a comprehensive revision, incorporating the new developments that have taken place in recent years with respect to trials, including seven new chapters on subjects ranging from trial governance, and preliminary studies to pilot testing.

Ex Post Evaluation of Competition Cases Assimakis Komninos,Nicolas Petit,2021-10-13 Competition authorities use ex post evaluation of enforcement decisions to help determine if an intervention (or non-intervention) has achieved its objectives – and, if not, the reasons it failed to do so – thus allowing for improvement in the design and use of techniques used in the analysis underpinning the decision. In this essential volume, expert contributors use this procedure to provide a neutral and extensive assessment of cases that have significantly shaped European Union (EU) competition law enforcement. With in-depth analysis of foundational cases of EU competition law and the methodologies that have been developed over time to predict how enforcement decisions will affect competition, for each case the authors respond thoroughly to such questions as the following: Did the decision have an impact on the affected market? Did it improve consumer or social welfare? With the benefit of hindsight, were the factual assertions true? Were all the relevant theories of harm (and efficiency justifications) properly investigated? Was the decision able to deter similar anticompetitive behaviour? Did the decision provide clear guidance on which types of conduct should be deemed illegal? Industries covered include information technology (the Microsoft cases), payment cards (the Visa Europe 2010 Commitments Decision), pharmaceuticals, and conditional rebates (Michelin I, Michelin II and BA/Virgin). Also investigated are the role of buyer power in concentration cases and the relative strength of competition law enforcement versus regulation, where appropriate. In its accumulation of evidence from individual cases that have gradually improved our ability to grasp the connections between policy choices and the outcomes they lead to, this matchless volume has no peers. It constitutes an invaluable resource for competition authorities in performing ex post evaluations and will be welcomed by practitioners and academics concerned with European competition law.

Crimes and Trials of the Century [2 volumes] [2 volumes] Frankie Y. Bailey, Steven Chermak Ph.D.,2007-10-30 What do O. J. Simpson, the Lindbergh baby, and Gary Gilmore have in common? They were all the focus of famous crimes and/or trials in the United States. In this two-volume set, historical and contemporary cases that not only shocked the nation but that also became a part of the popular and legal culture of the United States are discussed in vivid, and sometimes shocking, detail. Each chapter focuses on a different crime or trial and explores the ways in which each became famous in its own time. The fascinating cast of characters, the outrageous crimes, the involvement of the media, the actions of the police, and the trials that often surprised combine to offer here one of the most comprehensive sets of books available on the subject of famous U.S. crimes and trials. The public seems fascinated by crime. News and popular media sources provide a steady diet of stories, footage, and photographs about the misfortunes of others in order to satisfy this appetite. Murder, rape, terrorism, gang-related activities, and other violent crimes are staples. Various crime events are presented in the news every day, but most of what is covered is quickly forgotten. In contrast, some crimes left a lasting impression on the American psyche. Some examples include the assassination of President John F. Kennedy, the bombing of the Murrah building in Oklahoma City, and the September 11th attacks. These events, and other significant cases, are immediately or on reflection talked about as crimes of the century. They earn this title not only because they generate enormous publicity, but because of their impact on American culture: they help define historical eras, influence public opinion about crime, change legal process, and focus concern about important social issues. They seep into many other shared aspects of social life: public conversation, fiction and nonfiction, songs, poems, films, and folk tales. This set focuses on the many crimes of the century of the last 100 years. In vivid detail, each crime is laid out, the investigation is discussed, the media reaction is described, the trial (if there was one) is narrated, the resolution is explored, and the significance of the case in terms of its social, political, popular, and legal relevance is examined. Illustrations and sidebars are scattered throughout to enliven the text; print and electronic resources for further reading and research are offered for those wishing to dig deeper. Cases include the Scopes Monkey trial, Ted Bundy, Timothy McVeigh, O.J. Simpson, Leopold and Loeb, Fatty Arbuckle, Al Capone, JonBenet Ramsey, the Lacy Peterson murder, Abu Ghraib, Columbine and more.

Microsoft, Antitrust and the New Economy: Selected Essays David S. Evans, 2006-04-11 No antitrust case in recent history has attracted as much public attention as U.S v. Microsoft Corp. Nor has any antitrust case in memory raised as many complex, substantive issues of law, economics and public policy. Microsoft, Antitrust and the New Economy: Selected Essays constitutes an early effort to analyze some of the central issues and to put the case in the context of the ongoing debate over the role of government in managing markets - especially in technology driven New Economy industries. All of these essays, it should be noted, are written by critics of the government's efforts to regulate Microsoft. Indeed, many are by individuals who were closely involved in the company's legal defense and served as consultants to Microsoft. But their work should be judged on the merits rather than their provenance. For all represent serious scholarship by researchers committed to advancing the debate over government regulatory policies.

Fair and Unfair Trials in the British Isles, 1800-1940 David Nash, Anne-Marie Kilday, 2020-11-12 Adopting a microhistory approach, Fair and Unfair Trials in the British Isles, 1800-1940 provides an in-depth examination of the evolution of the modern justice system. Drawing upon criminal cases and trials from England, Scotland, and Ireland, the book examines the errors, procedural systems, and the ways in which adverse influences of social and cultural forces impacted upon individual instances of justice. The book investigates several case studies of both justice and injustice which prompted the development of forensic toxicology, the implementation of state propaganda and an increased interest in press sensationalism. One such case study considers the trial of William Sheen, who was prosecuted and later acquitted of the murder of his infant child at the Old Baily in 1827, an extraordinary miscarriage of justice that prompted outrage amongst the general public. Other case studies include trials for treason, theft, obscenity and blasphemy. Nash and Kilday root each of these cases within their relevant historical, cultural, and political contexts, highlighting changing attitudes to popular culture, public criticism, protest and activism as significant factors in the transformation of the criminal trial and the British judicial system as a whole. Drawing upon a wealth of primary sources, including legal records, newspaper articles and photographs, this book provides a unique insight into the evolution of modern criminal justice in Britain.
