Navigating Technomedia Sam Han,2008 This is an introductory survey of what the author calls the 'technomedia', the generation of communication technologies after television, cell phones and the first wave of the Internet. Beginning with a history of media, the book explores the nature and effects of technomedia like the blogosphere, Blackberries and related technologies. Because they are transforming the relations of their users to the social environment, the topic is fast becoming an important focus of modern social theory.

Multi-media Nick Kaye,2007-03-16 Multi-media charts the development of multi-media video, installation and performance in a unique dialogue between theoretical analysis and specially commissioned documentations by some of the world's foremost artists. Nick Kaye explores the interdisciplinary history and character of experimental practices shaped in exchanges between music, installation, theatre, performance art, conceptual art, sculpture and video. The book sets out key themes and concerns in multi-media practice, addressing time, space, the resurgence of ephemerality, liveness and 'aura'. These chapters are interspersed with documentary artwork and essays by artists whose work continues to shape the field, including new articles from: Vito Acconci The Builders Association John Jesurun Pipilotti Rist Fiona Templeton. Multi-media also reintroduces a major documentary essay by Paolo Rosa of Studio Azzurro in a new, fully illustrated form. This book combines sophisticated scholarly analysis and fascinating original work to present a refreshing and creative investigation of current multi-media arts practice.

Anamorphosis in Early Modern Literature Jen E. Boyle,2017-03-02 Anamorphosis in Early Modern Literature explores the prevalence of anamorphic perspective in the seventeenth and eighteenth centuries in England. Jen Boyle investigates how anamorphic media flourished in early modern England as an interactive technology and mode of affect in public interactive art, city and garden design, and as a theory and figure in literature, political theory and natural and experimental philosophy. Anamorphic mediation, Boyle brings to light, provided Milton, Margaret Cavendish, and Daniel Defoe, among others, with a powerful techno-imaginary for traversing through projective, virtual experience. Drawing on extensive archival research related to the genre of practical perspective in early modern Europe, Boyle offers a scholarly consideration of anamorphic perspective (its technical means, performances, and embodied practices) as an interactive aesthetics and cultural imaginary. Ultimately, Boyle demonstrates how perspective media inflected a diverse set of knowledges and performances related to embodiment, affect, and collective consciousness.

Welcome to PlanitDo! Melissa Fraser,2014-03-21 Have you ever heard the phrase, "Bloom where you're planted"? Forget about it! Plant yourself where you can bloom. Wealth creation is not as difficult as people make it. You have the power within you to become highly successful. God created each of us with unique gifts and talents. He expects us to use those gifts to make a living and to have an overflow for serving others. So where did it all go wrong? Why are so many people struggling today to just scrape by? Two words: reactive living. Reactive living is a risky behavior that leaves many grinding away at unfulfilling jobs and working for nothing more than to get to the weekend. That is not God's plan for your life. This book walks you through the five areas of FOCUS that can drive you to a much faster wealth creation result. The FOCUS framework is a five-step system for using the gifts God gave you to create the abundant life he has planned for you. Packed with practical advice on how to build a balanced and aligned strategy to create wealth, author Melissa Fraser tackles this serious topic in an entertaining way, covering alligator wrestling, constipation of the brain, and the best news of all: no, you do not have to "eat that frog." Complete with career path tools, business planning tools, and a free single-page life strategy template, this guide offers something for everyone, whether you are an employee, a business owner, or just getting started on your career.

Digital Memory and the Archive Wolfgang Ernst,2012-12-20 In the popular imagination, archives are remote, largely obsolete institutions: either antiquated, inevitably dusty libraries or sinister repositories of personal secrets maintained by police states. Yet the archive is now a ubiquitous feature of digital life. Rather than being deleted, e-mails and other computer files are archived. Media software and cloud storage allow for the instantaneous cataloging and preservation of data, from music, photographs, and videos to personal information gathered by social media sites. In this digital landscape, the archival-oriented media theories of Wolfgang Ernst are particularly relevant. Digital Memory and the Archive, the first English-language collection of the German media theorist's work, brings together essays that present Ernst's controversial materialist approach to media theory and history. His insights are central to the emerging field of media archaeology, which uncovers the role of specific technologies and mechanisms, rather than content, in shaping contemporary culture and society. Ernst's interrelated ideas on the archive, machine time and microtemporality, and the new regimes of memory offer a new perspective on both current digital culture and the infrastructure of media historical knowledge. For Ernst, different forms of media systems—from library catalogs to sound recordings—have influenced the content and understanding of the archive and other institutions of memory. At the same time, digital archiving has become a contested site that is highly resistant to curation, thus complicating the creation and preservation of cultural memory and history.

数字媒介时代的文化记忆与档案 沃尔夫冈,2021-11-09 在大众的想象中，档案是遥远的、基本上已经过时的机构：要么是古老的、不可避免地布满灰尘的图书馆，要么是由警察国家维护的个人秘密的阴险存储库。

The Return of Theory in Early Modern English Studies E. Aston,B. Reynolds,Paul Cefalu,2016-04-30 This collection looks at the growing rapprochement between contemporary theory and early modern English literary-cultural studies. With sections on posthumanism and cognitive science, political theology, and rematerialism and performance, the essays incorporate recent theoretical inquiries into new readings of early modern texts.

Modernist Star Maps Aaron Jaffe,Jonathan Goldman,2016-12-05 Bringing together Canadian, American, and British scholars, this volume explores the relationship between modernism and modern celebrity culture. In support of the collection's overriding thesis that modern celebrity and modernism are mutually determining phenomena, the contributors take on a range of transatlantic canonical and noncanonical figures, from the expected (Virginia Woolf and F. Scott Fitzgerald) to the surprising (Elvis and Hitler). Illuminating case studies are balanced by the volume's attentiveness to broader issues related to modernist aesthetics, as the contributors consider celebrity in relationship to identity, commodification, print culture, personality, visual cultures, and theatricality. As the first book to read modernism and celebrity in the context of the crises of individual agency occasioned by the emergence of mass-mediated culture, Modernist Star Maps argues that the relationship between modernism and the popular is unthinkable without celebrity. Moreover, celebrity's strange evolution during the twentieth century is unimaginable without the intercession of modernism's system of cultural value. This innovative collection opens new avenues for understanding celebrity not only for modernist scholars but for critical theorists and cultural studies scholars.

Walter Benjamin David S. Ferris,1996 This collection of nine essays focuses on those writings of Walter Benjamin (1892-1940) on literature and language that have a direct relevance to contemporary literary theory, notably his analyses of myth, violence, history, criticism, literature, and mass media. In an introductory essay, David S. Ferris discusses the problem of history, aura, and resistance in Benjamin☐s later work and in its reception. Samuel Weber, in a reading of Benjamin☐s most influential essay, The Work of Art in the Age of Mechanical Reproduction,☐ analyzes the status of the image and technology in Benjamin☐s own terms and in the shadow of Heidegger. Rodolphe Gasché devotes himself to an analysis of Benjamin☐s dissertation on the German Romantics, providing a valuable guide to a major text that has yet to appear in English translation.

Yeast Surface Display Michael W. Traxlmayr,2022-04-28 This detailed volume explores a wide variety of applications of yeast surface display, an

extensively used protein engineering technology. Beginning with detailed protocols for the construction and efficient selection/screening of yeast surface display libraries, as well as for the analysis of individual yeast-displayed protein variants, the book continues with protocols describing the selection of yeast surface display libraries for binding to mammalian cells or to extracellular matrix as well as protocols for a broad spectrum of specialized yeast surface display applications, demonstrating the versatility of this display platform. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible methodologies, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Yeast Surface Display serves as a comprehensive resource that enables the implementation of this powerful and versatile technique in virtually any molecular biology laboratory, even in the absence of any prior yeast surface display experience.

Empowering Civil Society in the Industrial Revolution 4.0 Sukowiyono,Siti Awaliyah,Peter B.R. Carey,Max Lane,Chen Fei,2021-10-25 ICCEDI is an international seminar that is held every two years organized by the Law and Citizenship Department, Faculty of Social Science Universitas Negeri Malang. The activities aim to discuss the theoretical and practical citizenship education that becomes needed for democracy in Indonesia and other countries with a view to build academic networks by gathering academics from various research institutes and universities. Citizenship education is an urgent need for the nation in order to build a civilized democracy for several reasons. Citizenship education is important for those who are politically illiterate and do not know how to work the democracy of its institutions. Another problem is the increasing political apathy, indicated by the limited involvement of citizens in the political process. These conditions show how citizenship education becomes the means needed by a democratic country like Indonesia. The book addresses a number of important issues, such as law issues, philosophy of moral values, political government, socio-cultural and Pancasila, and civic education. Finally, it offers a conceptual framework for future democracy. This book will be of interest to students, scholars, and practitioners, governance, and other related stakeholders.

Authoritative and practical, Protein-Protein Interactions: Methods and Protocols serves as an ideal guide for researchers working in protein science and beyond.

A Robust Platform for High-throughput Genomics in Microorganisms Julia Oh,2010 Accurate, large-scale gene annotation is a major challenge in biology. Traditionally, gene function can be assigned by observing the phenotype of a null mutant under various conditions. This principle has engendered the creation of genome-wide deletion collections in which each gene in a genome is knocked out or disrupted. Phenotype can then be assayed for each gene knockout individually. Parallelization of phenotypic assays via the introduction of molecular barcodes has proved invaluable for interrogating genome-wide collections of mutants in many conditions. This approach has been most visibly successful in the case of the budding yeast Saccharomyces cerevisiae, but it has the potential to bring insight to the genomes of many more microorganisms. The strategy of creating the genome-wide mutant collections that permit parallel phenotypic analysis has not been broadly applied beyond S. cerevisiae due primarily to technical limitations. In this dissertation, we describe a universal approach to rapidly generate comparable tagged, mutant collections. This approach combines DNA tag technology with transposon mutagenesis, and thereby can be generalized to any microorganism amenable to transposon mutagenesis. We created a universal collection of tags whose utility can extend to any application requiring sample tracking or multiplexing. We describe the validation of this tag resource as well as its use in the transposon mutagenesis of two different microorganisms, the bacteria Shewanella oneidensis MR-1 and the yeast Candida albicans. We then describe the expansion of this method to generate a genome-wide tagged transposon mutant collection in C. albicans. We used this collection to identify i) haploinsufficient genes in different nutrient conditions, and ii) mechanisms of drug-induced haploinsufficiency in C. albicans, and illustrated how these data can be used as a resource for genome annotation and hypothesis generation. Moreover, these studies illustrate why direct study of C. albicans is necessary, because relying solely on similarities between its traditional model organism, S. cerevisiae, would result in exclusion of C. albicans-specific genes and processes that are involved in its pathogenesis and may prove to be novel therapeutic targets.
