Mega Magic Hair Swap Rochelle Humes, 2019-02-07
Two friends. One wish. Mai and Rose are best
friends but they're not two peas in a pod. Mai has
dark hair that is curly and whirly and never stays
put. Why couldn't she have perfect hair just like
her best friend Rose? Rose has blonde hair, as
straight as a ruler, which slips and slides
whenever she tries to put it in a pony tail. Why
couldn't she have perfect hair just like her best
friend Mai? When a magical coconut grants each
girl their wish, and they get the hair they've
always dreamt of, the friends are overjoyed.
However, they soon learn that perfect hair is not
everything it's cracked up to be. In fact, their
hair was pretty magical and perfect the way it was
before... A joyful and fun story about celebrating
differences and loving yourself from head to toe!

Christmas in Snowflake Canyon RaeAnne
Thayne, 2021-10-18 Holiday gifts don't always come
in expected packages...especially in the town of
Hope's Crossing. No one has ever felt sorry for
Genevieve Beaumont. After all, she has everything
money can buy. That is, until she discovers her
fiancé has been two-timing her and she's left with
two choices: marry the philanderer to please her
controlling father or be disinherited and find a
means to support herself. Genevieve's salvation

appears in the most unlikely of prospects: Dylan Caine, a sexy, wounded war vet whose life is as messy as hers. Dylan's struggling to adjust after his time in Afghanistan, and the last thing he needs is a spoiled socialite learning about the real world for the first time. True, she may have unexpected depths and beauty to match. But he knows he could never be the man she needs...and she knows he could never be the man she thinks she wants. So why are they each hoping that a Christmas miracle willl prove them both wrong?

Story Genius Lisa Cron, 2016-08-09 Following on the heels of Lisa Cron's breakout first book, *Wired for Story*, this writing guide reveals how to use cognitive storytelling strategies to build a scene-by-scene blueprint for a riveting story. It's every novelist's greatest fear: pouring their blood, sweat, and tears into writing hundreds of pages only to realize that their story has no sense of urgency, no internal logic, and so is a page one rewrite. The prevailing wisdom in the writing community is that there are just two ways around this problem: pantsing (winging it) and plotting (focusing on the external plot). Story coach Lisa Cron has spent her career discovering why these methods don't work and coming up with a powerful alternative, based on the science behind what our brains are wired to crave in every story we read (and it's not what you think). In *Story*

Genius Cron takes you, step-by-step, through the creation of a novel from the first glimmer of an idea, to a complete multilayered blueprint—including fully realized scenes—that evolves into a first draft with the authority, richness, and command of a riveting sixth or seventh draft.

Defending the Arctic Refuge Finis

Dunaway, 2021-04-12 Tucked away in the northeastern corner of Alaska is one of the most contested landscapes in all of North America: the Arctic National Wildlife Refuge. Considered sacred by Indigenous peoples in Alaska and Canada and treasured by environmentalists, the refuge provides life-sustaining habitat for caribou, polar bears, migratory birds, and other species. For decades, though, the fossil fuel industry and powerful politicians have sought to turn this unique ecosystem into an oil field. *Defending the Arctic Refuge* tells the improbable story of how the people fought back. At the center of the story is the unlikely figure of Lenny Kohm (1939–2014), a former jazz drummer and aspiring photographer who passionately committed himself to Arctic Refuge activism. With the aid of a trusty slide show, Kohm and representatives of the Gwich'in Nation traveled across the United States to mobilize grassroots opposition to oil drilling. From Indigenous villages north of the Arctic Circle to Capitol Hill and many places in between, this book shows how Kohm and Gwich'in leaders and environmental activists helped build a political movement that transformed the debate into a struggle for environmental justice. In its final weeks, the Trump administration fulfilled a long-sought dream of drilling proponents: leasing much

of the Arctic Refuge coastal plain for fossil fuel development. Yet the fight to protect this place is certainly not over. Defending the Arctic Refuge traces the history of a movement that is alive today—and that will continue to galvanize diverse groups to safeguard this threatened land.

An Indomitable Beast Alan Rabinowitz, 2015-08-04
The jaguar is one of the most mysterious and least-known big cats of the world. The largest cat in the Americas, it has survived an onslaught of environmental and human threats partly because of an evolutionary history unique among wild felines, but also because of a power and indomitable spirit so strong, the jaguar has shaped indigenous cultures and the beliefs of early civilizations on two continents. In *An Indomitable Beast: The Remarkable Journey of the Jaguar*, big-cat expert Alan Rabinowitz shares his own personal journey to conserve a species that, despite its past resilience, is now on a slide toward extinction if something is not done to preserve the pathways it prowls through an ever-changing, ever-shifting landscape dominated by humans. Rabinowitz reveals how he learned from newly available genetic data that the jaguar was a single species connected genetically throughout its entire range from Mexico to Argentina, making it unique among all other large carnivores in the world. In a mix of personal discovery and scientific inquiry, he sweeps his readers deep into the realm of the jaguar, offering fascinating accounts from the field. Enhanced with maps, tables, and color plates, *An Indomitable Beast* brings important new research to life for scientists, anthropologists,

and animal lovers alike. This book is not only about jaguars, but also about tenacity and survival. From the jaguar we can learn better strategies for saving other species and also how to save ourselves when faced with immediate and long-term catastrophic changes to our environment.
