*Fire and Rain* Stephen LaDochy, Michael Witiw, 2023-10-24 This book shows how California's weather and climate have drastically changed and what we can expect in the near future. California's weather and climate are becoming as common a topic in the media as inflation and wars. It comes into our lives during heat waves when we require more cooling and during droughts when we are asked to limit our use of water. We may not be able to visit state and national parks when fires rage nearby. Indeed, California does have weather. LaDochy and Witiw dispel the erroneous myths about the state's climate in a colorful, entertaining way. California does have seasons. It does rain in Southern California. It is not always sunny and mild throughout the year. And not all El Niños bring abundant rainfall every time throughout the state. These and other myths are discussed and dismissed with the latest science and remarkable vignettes. The authors describe the diversity of the state's physical environment, both natural and man-made and how climate change is currently altering this diverse environment. Climate change, in the past, present and future, continues to influence this most populous state. Yes, California does have weather.

*Dictators and Autocrats* Klaus Larres, 2021-10-31 In order to truly understand the emergence, endurance, and legacy of autocracy, this volume of engaging essays explores how autocratic power is acquired, exercised, and transferred or abruptly ended through the careers and politics of influential figures in more than 20 countries and six regions. The book looks at both traditional hard dictators, such as Hitler, Stalin, and Mao, and more modern soft or populist autocrats, who are in the process of transforming once fully democratic countries into autocratic states, including Recep Tayyip Erdoğan in Turkey, Brazilian leader Jair Bolsonaro, Rodrigo Duterte in the Philippines, Narendra Modi in India, and Viktor Orbán in Hungary. The authors touch on a wide range of autocratic and dictatorial figures in the past and present, including present-day autocrats, such as Vladimir Putin and Xi Jinping, military leaders, and democratic leaders with authoritarian aspirations. They analyze the transition of selected autocrats from democratic or benign semi-democratic systems to harsher forms of autocracy, with either quite disastrous or more successful outcomes. An ideal reader for students and scholars, as well as the general public, interested in international affairs, leadership studies, contemporary history and politics, global studies, security studies, economics, psychology, and behavioral studies.

**Transformation! Innovation?** Christina Neder, Ines-Susanne Schilling, 2003 Public discourse on cultural identity was not possible on the island of Taiwan until martial law was lifted there in 1987. While until then culture had mainly been an arena for the suppressed political discourse, the demise of the oneparty reign of the Guomindang (KMT) at the end of the 20th century signified not only the transformation from an autocratic to a democratic system but also the end of the cultural hegemony of the mainlanders on the island. The transformation process paved the way for further cultural innovation, the keywords here being education reform, language debate, establishment of new academic disciplines, historiographic reconstruction etc. It has also led to a widespread discussion of a specifically Taiwanese cultural identity which is reflected in literature, language, art, theatre and film. The international workshop Transformation! - Innovation? Taiwan in her Cultural Dimensions, held at Ruhr University in Bochum from March 7th-9th 2001, set out to shed new light on these issues and generated an intensive discussion of potential new interdisciplinary approaches to cultural and literary research in the field of Taiwan studies.

**The Sounds of Mandarin** Janet Y. Chen, 2023-07-11 Mandarin Chinese is the most widely spoken language in the world today. In China, a country with a vast array of regional and local vernaculars, how was this "common language" forged? How did people learn to speak Mandarin? And what does a focus on speech instead of script reveal about Chinese language and history? This book traces the surprising social history of China's spoken standard, from its creation as the national language of the early Republic in 1913 to its journey into postwar Taiwan to its reconfiguration as the common language of the People's Republic after 1949. Janet Y. Chen examines the process of linguistic change from multiple perspectives, emphasizing the experiences of ordinary people. After the fall of the Qing dynasty, a chorus of influential elites promoted the goal of a strong China speaking in one unified voice. Chen explores how this vision fared in practice, showing the complexities of transforming an ideological aspiration into spoken reality. She tracks linguistic change in schools, rural areas, and urban life against the backdrop of war and revolution. The Sounds of Mandarin draws on a novel aural archive of early twentieth-century sound technology, including phonograph recordings, films, and radio broadcasts. Following the uneven trajectory of standard speech, this book sheds new light on the histories of language, nationalism, and identity in China and Taiwan.

Digital Transformation and Innovation in Chinese Education Spire, Hiller A., 2017-08-11 Technology use has become increasingly popular in education. Due to cultural influences and access issues, advances in digital teaching and learning in Chinese education have been slow; however, certain regions have been able to successfully integrate technology into their curriculum and instruction techniques. Digital Transformation and Innovation in Chinese Education is an essential reference source featuring the latest scholarly research on utilizing technology in Chinese learning and instruction, and it provides insights to classroom transformations within the context of Chinese culture. Including coverage on a broad range of topics and perspectives such as MOOCs, blended learning, and e-learning, this publication is ideally designed for academicians, researchers, and students seeking current research on technological innovation in Chinese education.

**Resisting Japan** David Pong, 2008 This book examines, in turn, Chinese resistance to the Japanese-backed smuggling trade in north China on the eve of the War, the deployment of German military advisers, currency manipulations, the not-so-successful effort at organizing a military medical service, the mobilization of reformed Japanese prisoners of war, and the contest for the support of the local population among the Communists, the Nationalists, and the Japanese. Besides fresh perspectives on the War, these studies illuminate the background of the contest for power after the War.

Learning Online Barbara Means, Marianne Bakia, Robert Murphy, 2014-04-03 At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, Learning Online provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. Learning Online synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas, and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work concludes with a call for an online learning implementation research agenda, combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices.

**Mapping the Chinese and Islamic Worlds** Hyunhee Park, 2012-08-27 This book documents the relationship and wisdom of Asian cartographers in the Islamic and Chinese worlds before the Europeans arrived.

Inscribing Jingju/Peking Opera David Rolston, 2021-08-09 What was the most influential mass medium in China before the internet reaching both literate and illiterate audiences? The answer may surprise you...it's Jingju (Peking opera). This book traces the tradition's increasing textualization and the changes in authorship, copyright, performance rights, and textual fixation that accompanied those changes.

**Teaching in the Post COVID-19 Era** Ismail Fayed,Jill Cummings,2022-01-03 This handbook showcases extraordinary educational responses in exceptional times. The scholarly text discusses valuable innovations for teaching and learning in times of COVID-19 and beyond. It examines effective teaching models and methods, technology innovations and enhancements, strategies for engagement of learners, unique approaches to teacher education and leadership, and important mental health and counseling models and supports. The unique solutions here implement and adapt effective digital technologies to support learners and teachers in critical times – for example, to name but a few: Florida State University’s Innovation Hub and interdisciplinary project-based approach; remote synchronous delivery (RSD) and blended learning approaches used in Yorkville University’s Bachelor of Interior Design, General Studies, and Business programs; University of California’s strategies for making resources affordable to students; resilient online assessment measures recommended from Qatar University; strategies in teacher education from the University of Toronto/OISE to develop equity in the classroom; simulation use in health care education; gamification strategies; innovations in online second language learning and software for new Canadian immigrants and refugees; effective RSD and online delivery of directing and acting courses by the Toronto Film School, Canada; academic literacy teaching in Colombia; inventive international programs between Japan and Taiwan, Japan and the USA, and Italy and the USA; and, imaginative teaching and assessment methods developed for online Kindergarten – Post-Secondary learners and teachers. Authors share unique global perspectives from a network of educators and researchers from more than thirty locations, schools, and post-secondary institutions worldwide. Educators, administrators, policymakers, and instructional designers will draw insights and guidelines from this text to sustain education during and beyond the COVID-19 era.

**Terrigenous Clastic Depositional Systems** William E. Galloway,David K. Hobday,2012-12-06 Nonrenewable energy resources, comprising fossil fuels and uranium, are not ran domly distributed within the Earth's crust. They formed in response to a complex array of geologic controls, notably the genesis of the sedimentary rocks that host most commercial energy resources. It is this genetic relationship between economic re sources and environment that forms the basis for this book. Our grouping of petro leum, coal, uranium, and ground water may appear to be incongruous or artificial. But our basic premise is that these ostensibly disparate resources share common genetic attributes and that the sedimentological principles governing their natural distributions and influencing their recovery are fundamentally similar. Our combined careers have focused on these four resources, and our experiences in projects worldwide reveal that certain recurring geologic factors are important in controlling the distribution of com mercial accumulations and subsurface fluid flow. These critical factors include the shape and stability of the receiving basin, the major depositional elements and their internal detail, and the modifications during burial that are brought about in these sediments by pressure, circulating fluids, heating, and chemical reaction. Since the first edition of this book in 1983, there has been a quantum leap in the volume of literature devoted to genetic stratigraphy and refinement of sedimentologi cal principles and a commensurate increase in the application of these concepts to resource exploration and development.

Kuroshio Current Takeyoshi Nagai,Hiroaki Saito,Koji Suzuki,Motomitsu Takahashi,2019-07-02 An interdisciplinary study of the Kuroshio nutrient stream The surface water of the Kuroshio, a western boundary current in the North Pacific Ocean, is nutrient-depleted and has relatively low primary productivity, yet abundant fish populations are supported in the region. This is called the “Kuroshio Paradox”. Kuroshio Current: Physical, Biogeochemical and Ecosystem Dynamics presents research from a multidisciplinary team that conducted observational and modeling studies to investigate this contradiction. This timely and important contribution to the ocean sciences literature provides a comprehensive analysis of the Kuroshio. Volume highlights include: New insights into the role of the Kuroshio as a nutrient stream The first interdisciplinary examination of the Kuroshio Paradox Reflections on the influence of the Kuroshio on Japanese culture Research results on both the lower and higher trophic levels in the Kuroshio ecosystem Comparisons of nutrient dynamics in the Kuroshio and Gulf Stream Predictions of ecosystem responses to future climate variability

Urban Aerosols and Their Impacts Jeffrey S. Gaffney,Nancy A. Marley,2006 Urban aerosols have been identified as important species of concern due to their potential health and environmental impacts. This symposium series book will describe the basic chemistry and physics determining the impacts of aerosol species and will highlight the research results from the measurements that were taken following the collapse of the World Trade Center (WTC) on 9/11/01. The WTC tragedy led to the release of millions of pounds of debris aside from the structural steel, part of which was widely dissipated as aerosols and particulates in the debris cloud over lower Manhattan. Additionally, continuing fires under the debris led to the release of fine combustion related aerosols for a considerable time period in this urban environment. Held during the week of the second anniversary of the WTC tragedy in NYC, the symposium book will describe various aspects of the event, aerosol and gas exposures, and the related impacts of these aerosols. The book contributions will highlight efforts work from atmospheric chemists, meteorologists, health workers, and biologists for a timely compilation of what is known and not known about the composition and transport of tropospheric aerosols in urban environs, particularly those from the WTC collapse. Particular interest is in the acute and chronic environmental effects of these aerosols as they impact human health. Chapters included in the book will also address aerosol lifetimes, aerosol transport and removal processes, acute and chronic health effects to fine aerosol and particulate exposures, and the environmental impacts of aerosols.

*Economic Growth and Endogenous Authoritarian Institutions in Post-Reform China* Hans H. Tung,2019-01-30 This book analyzes the dynamic political economy of authoritarian institutions in China and attempts to answer the following questions: What is the significance of China's authoritarian institutions and the changes Xi Jinping has brought to them? Why did the Chinese elites go along with the changes that affected them negatively? Through these questions, the author unravels the mechanics of authoritarian resilience as well as its dynamics. The work reviews both literatures on China studies and comparative authoritarianism to introduce a general framework for analyzing authoritarian institutional change under dictatorships.
