**The Meaning of the Letter of Aristeas** Ekaterina Matusova, 2015-05-20 Ekaterina Matusova offers a new approach to the old problems of interpretation of the Letter of Aristeas. Chapter 1 deals with the question of the structure of the narrative. Matusova argues that at the time of Aristeas compositions of the kind of the Reworded Pentateuch, or Rewritten Bible were circulating in Egypt in parallel with the LXX and were a source of interpretations of the Hebrew text different from the LXX and of specific combinations of subjects popular in Second Temple Judaism. In particular, Matusova further argues that the leading principle of the composition of the Letter is that of the Reworded Deuteronomy, where subjects referring to the idea of following the Law among the gentiles were grouped together. The analysis is based on a broad circle of Jewish sources, including Philo of Alexandria and documents from the Qumran library. The principle of the composition discovered in this part of the study is referred to as the Jewish paradigm. Chapter 2 offers a new interpretation of the frame story in the narrative, i.e. of the story of the translation in the strict sense. Matusova shows that two paradigms are skilfully combined in this split story: the Jewish one, based on the Bible, and the Greek one, which involves Greek grammatical theory. She further argues that the story, when read in terms of Greek grammar, turns out to be a consistent story not of the translation, but of the correction of the LXX, which is important for our understanding of the early history of the translation. The analysis involves extensive excursions into Greek grammatical theory, including a discussion of Aristotle, Dionysius Thrax and other Hellenistic grammarians. In Chapter 3 Matusova tries to find the reason for the combination of these two paradigms, namely the Jewish biblical paradigm and the Greek grammatical ones, and to interpret their interconnected meaning, by placing it in the broad historical context of the Ptolemaic state

Mourner, Mother, Midwife L. Juliana M. Claassens, 2012-11-28 Traditional understandings of God as deliverer depict God as a mighty liberator-warrior and wrathful avenger. Juliana Claassens explores alternative Old Testament metaphors that portray God as mourner, mother, and midwife--images that resist the violence and bloodshed associated with the dominant warrior imagery. Claassens discusses how metaphors of God as life giver began to develop in the aftermath of the trauma of Israelite exile. She offers compelling examples of how this feminine imagery still has the power to inspire hope amidst violence in today's world. She demonstrates that God's delivering presence helps people of faith cope with trauma and suffering on many levels--individual, community, national, and global--while bringing forth new life out of death and destruction.

**Zebulon Pike, Thomas Jefferson, and the Opening of the American West** Matthew L. Harris, Jay H. Buckley, 2012-11-21 In life and in death, fame and glory eluded Zebulon Montgomery Pike (1779-1813). The ambitious young military officer and explorer, best known for a mountain peak that he neither scaled nor named, was destined to live in the shadows of more famous contemporaries-explorers Meriwether Lewis and William Clark. This collection of thought-provoking essays rescues Pike from his undeserved obscurity. It does so by providing a nuanced assessment of Pike and his actions within the larger context of American imperial ambition in the time of Jefferson. Pike's accomplishments as an explorer and mapmaker and as a soldier during the War of 1812 has been tainted by his alleged connection to Aaron Burr's conspiracy to separate the trans-Appalachian region from the United States. For two hundred years historians have debated whether Pike was an explorer or a spy, whether he knew about the Burr Conspiracy or was just a loyal foot soldier. This book moves beyond that controversy to offer new scholarly perspectives on Pike's career. The essayists-all prominent historians of the American West-examine Pike's expeditions and writings, which provided an image of the Southwest that would shape American culture for decades. John Logan Allen explores Pike's contributions to science and cartography; James P. Ronda and Leo E. Oliva address his relationships with Native peoples and Spanish officials; Jay H. Buckley chronicles Pike's life and compares Pike to other Jeffersonian explorers; Jared Orsi discusses the impact of his expeditions on the environment; and William E. Foley examines his role in Burr's conspiracy. Together the essays assess Pike's accomplishments and shortcomings as an explorer, soldier, empire builder, and family man. Pike's 1810 journals and maps gave Americans an important glimpse of the headwaters of the Mississippi and the southwestern borderlands, and his account of the opportunities for

trade between the Mississippi Valley and New Mexico offered a blueprint for the Santa Fe Trail. This volume is the first in more than a generation to offer new scholarly perspectives on the career of an overlooked figure in the opening of the American West.

**Outward Evil Inward Battle** Benjamin Hart Fishkin, Bill F. Ndi, Festus Fru Ndeh, 2013 This book is a timely humanistic touch to memory studies. It uses literature as a laboratory for the workings of the mind, and characters as the subjects of human experimentation and diagnostics. This book considers authors from different societies and historical periods. The book is a refreshing illumination on the functioning of human memory. It complements the work of neuroscientists who seek to rationalize the workings of the same. Drawing from various ideas on memory, this rich and authoritative volume results from wide-ranging endeavors centered on the common fact that tracking memory in literature provides an astounding vista of orientations covered in its separate chapters. The writers examined in the various chapters become mediums for unleashing memory and its reconfiguration into artistic images. The ten separate chapters investigate different aspects of memory in such memoric associations as power, music, resistance, trauma, and identity. It is therefore no surprise that the editors should consider this book as a veritable menu for everything needed for an unforgettable memory banquet.

**The Camel We Christians Have Swallowed** Ruth Richardson, 2005 Underway is the dawning of a new day, as the bright morning sun - representing the sun of prophecy (Micah 3: 6), lights the night - the darkness by which prophecy is often explained. With the light of Jesus shining brightly on the explanation of prophecy - For the testimony of Jesus is the spirit of prophecy (Revelation 19:10), we understand it and the rest of the Bible clearly. Truth to Share, this book's logo, is almost unseen. The title, arched overhead, represents a rainbow full of promise. The cover art is by the writer, inspired by a friend's visualization. The title itself is a word-for-word given, as is the final section, The Rainbow, in chapter seven. The Camel We Christians Have Swallowed, as stated in the introduction, is not the well-known eye of the needle camel. It is from Matthew (23:23-24) where Jesus accused the Pharisees of straining out a gnat and swallowing a camel, neglecting the weightier matters of the law, justice, mercy and faith. (More explanation of this title is in the introduction and chapter one.)

**Europe - Space for Transcultural Existence?** Martin Tamcke, Dr. Janny de Jong, Lars Klein, Margriet van der Waal, 2013 Europe - Space for Transcultural Existence? is the first volume of the new series, Studies in Euroculture, published by Göttingen University Press. The series derives its name from the Erasmus Mundus Master of Excellence Euroculture: Europe in the Wider World, a two year programme offered by a consortium of eight European universities in collaboration with four partner universities outside Europe. This master highlights regional, national and supranational dimensions of the European democratic development; mobility, migration and inter-, multi- and transculturality. The impact of culture is understood as an element of political and social development within Europe. The articles published here explore the field of Euroculture in its different elements: it includes topics such as cosmopolitanism, cultural memory and traumatic past(s), colonial heritage, democratization and Europeanization as well as the concept of (European) identity in various disciplinary contexts such as law and the social sciences. In which way have Europeanization and Globalization influenced life in Europe more specifically? To what extent have people in Europe turned 'transcultural'? The 'trans' is understood as indicator of an overlapping mix of cultures that does not allow for the construction of sharp differentiations. It is explored in topics such as (im)migration and integration, as well as cultural products and lifestyle. The present economic crisis and debt crisis have led, as side-result, to a public attack on the open, cosmopolitan outlook of Europe. The values of the multicultural and civil society and the idea of a people's Europe have become debatable. This

volume offers food for thought and critical reflection.

**Current Trends in Language and Culture Studies** Yves-Antoine Clemmen, Margit Grieb, Will Lehman, 2013 This volume includes selected papers from the 20th Southeast Conference on Foreign Languages, Literatures and Film, held on March 2-3, 2012 at Stetson University in DeLand, Florida. It represents a cross section of current approaches to questions of violence and trauma; identity subjectivity and the national; race and gender; and teaching in foreign languages, literatures and film.

*Profession of City Planning*, the Lloyd Rodwin, 2000-01-01 In thirty-four provocative and insightful chapters, the nation's leading planners present a definitive assessment of fifty years of city planning and establish a benchmark for the profession for the next fifty years. The book appraises what planners do and how well they do it, how and why their current activities differ from past practices, and how much and in what ways planners have or have not enhanced the quality of urban life and contributed to the intellectual capital of the field. How have the goals, values, and practices of planners changed? What do planners say about their roles and the problems they confront? What is the relevance of their skills, from design capabilities and environmental savvy to intermediate and long-term perspectives and the pragmatics of implementation? The contributors seeking to answer these questions include Anthony Downs, Nathan Glazer, Philip B. Herr, Judith E. Innes, Terry S. Szold, Lawrence J. Vale, and Sam Bass Warner, Jr. The Profession of City Planning contrasts with the main changes in the US over the second half of the twentieth century in city planning. Sector images of the practice and effects of planning on housing, transportation, and the environment, as well as the development of economic tools are also discussed.

**Item Generation for Test Development** Sidney H. Irvine, Patrick C. Kyllonen, 2013-05-13 Since the mid-80s several laboratories around the world have been developing techniques for the operational use of tests derived from item-generation. According to the experts, the major thrust of test development in the next decade will be the harnessing of item generation technology to the production of computer developed tests. This is expected to revolutionize the way in which tests are constructed and delivered. This book is a compilation of the papers presented at a symposium held at ETS in Princeton, attended by the world's foremost experts in item-generation theory and practice. Its goal is to present the major applications of cognitive principles in the construction of ability, aptitude, and achievement tests. It is an intellectual contribution to test development that is unique, with great potential for changing the ways tests are generated. The intended market includes professional educators and psychologists interested in test generation.

It covers well-known models and languages. How are prosodies linked to speech sounds? What are the relations between prosody and grammar? What does speech perception tell us about prosody, particularly about the constituting elements of intonation and rhythm? The papers of the volume address questions like these with a special focus on how the notion of context-based coding, the knowledge of prosodic functions and the communicative embedding of prosodic elements can advance our understanding of prosody.
