How To Memorize Erol Ozvatan,2021-02-28 In How To Memorize you'll unlock the potential of your memory and brain. You'll be able to memorize almost anything you like, and at any time you like. Before I began studying memory techniques, my memory was very poor. I could not remember where I put my keys, glasses or where I parked my car. I couldn't even remember if I locked my car doors or not. I never used to be able to remember birthdays, passwords, pin numbers, to do lists, and everything else in between. Not being able to remember the names of the people I met was my worst of all. Fast forward to present day and what seemed absolutely impossible to me a few years ago is now second nature to me. What you will achieve with your memory may seem impossible to you now, but when you start practicing the systems and methods in this beautiful art of memorising, you will be astonished to see that it was always possible and that you always had a good memory. If I could do this, I'm more than sure you can!

Living with a Phenomenal Memory Frank Healy,2007-10-16 In 1966, five-year-old Frank Healy was sick and stayed home from school. Bored and too ill to get out of bed, Frank began looking at a calendar and memorized an entire calendar year in a few days. With additional practice, he memorized everything he experienced by making mental notes throughout the day, from decades of Philadelphia weather facts to the history of space flight and a variety of other subjects. Healy, a life coach who specializes in improving memory, documents events that played a part in developing his superior memory skills and provides insight into his ability to recollect. He describes his techniques, how he mastered them, and what others can do, whether the information is for practical use or simply for entertainment. With many humorous episodes entwined within, this intriguing memoir includes puzzles, exercises, and tips for developing memory skills. You may not need to memorize the calendar or the daily weather of the past forty years, but Living with a Phenomenal Memory can help you memorize what you do need to know. Frank Healy is one of approximately twenty people who have been classified as having HSAM Highly Superior Autobiographical Memory. He remembers what happened every day of his life since he was five years old, including the day of the week, weather, news events, and personal experiences. His memory is similar to the character of Carrie Wells, the police detective in the show Unforgettable. It can be seen on CBS channel 3 on Tuesdays at 10:00 P.M.

Kevin Trudeau's Mega Memory Kevin Trudeau,1997-04-23 Do you think you have a bad memory? Impossible, says Kevin Trudeau, the world's foremost authority on memory improvement training. As founder of the American Memory Institute, Kevin Trudeau has already helped more than one million people do just that. Even better, Trudeau's system ensures instant recall and long-term Mega Memory. All you need is the desire to unleash your Mega Memory, and you can reap all these incredible rewards! Pieces of Light Charles Fernyhough,2013-03-19 Short-listed for the Royal Society Winton Prize for Science Books, the Best Book of Ideas Prize, and the Society of Biology Book Awards • Book of the Year: Sunday Times, Sunday Express, and New Scientist “In its stunning blend of the literary with the scientific, Pieces of Light illuminates ordinary and extraordinary stories to remind us that who we are now has everything to do with who we were once, and that identity itself is intricately rooted the transporting moments of remembrance. We are what we remember.” — André Aciman, author of Out of Egypt and Harvard Square A new consensus is emerging among cognitive scientists: rather than possessing fixed, unchanging memories, we create new recollections each time we are called upon to remember. As psychologist Charles Fernyhough explains, remembering is an act of narrative imagination as much as it is the product of a neurological process. In Pieces of Light, he illuminates this compelling scientific breakthrough in a series of personal stories, each illustrating memory's complex synergy of cognitive and neurological functions. Combining science and literature, the ordinary and the extraordinary, this fascinating tour through the new science of autobiographical memory helps us better understand the ways we remember—and the ways we forget.
