Moonwalking with Einstein Instaread, 2016-06-28 Moonwalking with Einstein by Joshua Foer | Summary & Analysis Preview: Moonwalking with Einstein recounts author Joshua Foer's yearlong journey from participant-journalist covering the national memory championships to becoming the 2006 USA World Memory Champion. Other segments offer a journalistic history of the human relationship with memory, addressing its failings, its successes, and its limitations. Most people operate according to a series of misconceptions about human memory. Above all, many believe that they have an average brain and are therefore incapable of performing mental feats such as swiftly memorizing a deck of playing cards shuffled into random order. This belief, however, is false. Memory champions are no smarter than anyone else and have unremarkable brains from a biological standpoint. The difference is in how memory champions use their brain. They employ techniques and training to overcome shortcomings that are hard-wired into the human brain anatomy. Even those who appear to possess a photographic memory likely do not and are instead employing other memorization techniques... PLEASE NOTE: This is key takeaways and analysis of the book and NOT the original book. Inside this Instaread Summary of Moonwalking with Einstein: · Overview of the Book · Important People · Key Takeaways · Analysis of Key Takeaways About the Author With Instaread, you can get the key takeaways, summary and analysis of a book in 15 minutes. Reading Kingdom's Memory Master Marion Blank, 2014-11-20 Reading depends on rapid, smooth decoding. It's what allows a good reader to look at words and instantly recognize what they are saying (that is, decode them into real words). Unfortunately, for many children, this does not happen. Instead, reading is an onerous chore where they have to repeatedly stop to spend time and effort sounding out a slew of words. How could they have forgotten so quickly? The answer is that they did not really forget. What happened is that they never really processed the word they had sounded out and so no memory of it was laid down. Hence when the word is seen again, it is as if it were a first exposure. Fortunately there is a solution which may be a bit unexpected—since it rests not in reading but in writing. Reading often can be achieved without exactness. For example, if you show a young child a long word starting with el and ending with ant, the chances are that he or she will say (correctly) that it is the word elephant. The cues are sufficient to make this guess. Writing, or at least accurate writing, is not possible if this kind of rough approximation is used. For a word to be written accurately, each and every letter must be noted and placed in the correct sequence. That's why writing holds the key to both successful reading and writing. Memory Master, developed based on decades of research, guides students to rapidly develop the essential memory skills that lead to effortless reading and writing.
