The restaurant's bustling take-out counter sells a staggering 100 handmade pies every day! With the pies being snapped up that quickly, it's no wonder that Mrs. Rowe urged her customers to order dessert first. In Mrs. Rowe's Little Book of Southern Pies, recipes for Southern classics like Key Lime Pie and Pecan Fudge Pie sit alongside restaurant favorites like French Apple Pie and Original Coconut Cream Pie. Additional recipes gathered from family notebooks and recipe boxes include regional gems like Shoofly Pie and Lemon Chess Pie. RNA Editing ,2007-08-01 RNA processing plays a critical role in realizing the full potential of a given genome. One means of achieving protein

diversity is through RNA editing. A diverse array of editing events has been characterized, affecting gene expression in organisms from viruses and single cell parasites to humans and plants. The variety of editing mechanisms has required the development of many different experimental approaches, many of which are likely to be broadly applicable, particularly given the interplay between editing and other cellular processes, including transcription, splicing, and RNA silencing. RNA Editing not only covers most of the principal methods employed in the field, but also offers innovative solutions to the significant challenges posed by these experimental systems. Presents newly developed methods Covers topics ranging from biochemistry to bioinformatics Includes innovative solutions to potential problems

Asian Pies: A collection of pies and tarts with an Asian twist Evonne Lyn Lee,Sarah FC Lee,2016-05-15

Plant Behaviour and Intelligence Anthony Trewavas,2014-08-21 This book provides a convincing argument for the view that whole cells and whole plants growing in competitive wild conditions show aspects of plant behaviour that can be accurately described as 'intelligent'. Trewavas argues that behaviour, like intelligence, must be assessed within the constraints of the anatomical and physiological framework of the organism in question. The fact that plants do not have centralized nervous systems for example, does not exclude intelligent behaviour. Outside the human dimension, culture is thought largely absent and fitness is the biological property of value. Thus, solving environmental problems that threaten to reduce fitness is another way of viewing intelligent behaviour and has a similar meaning to adaptively variable behaviour. The capacity to solve these problems might be considered to vary in different organisms, but variation does not mean absence. By extending these ideas into a book that allows a critical and amplified discussion, the author hopes to raise an awareness of the concept of purposive behaviour in plants.
