What Is Your Emotional Age J. George Frederick,2013-10 This is a new release of the original 1928 edition.

What Is Your Emotional Age? and 65 Other Mental Tests J. George Frederick,2008-06-01 This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

The Effects of Chronological Age and Mental Age on the Understanding of Rules of Logic Miriam D. Goldberg Cherkas,1973

Psychological Testing George Domino,Marla L. Domino,2006-04-24 This book is an introductory

text to the field of psychological testing primarily suitable for undergraduate students in psychology, education, business, and related fields. This book will also be of interest to graduate students who have not had a prior exposure to psychological testing and to professionals such as lawyers who need to consult a useful source. Psychological Testing is clearly written, well-organized, comprehensive, and replete with illustrative materials. In addition to the basic topics, the text covers in detail topics that are often neglected by other texts such as cross-cultural testing, the issue of faking tests, the impact of computers and the use of tests to assess positive behaviors such as creativity.

Mental Retardation George S. Baroff, J. Gregory Olley, 2014-06-03 Mental Retardation, now in the third edition, was hailed as a classic when it was first published in the 1970's. This edition provides up-to-date material on the major dimensions of mental retardation—its nature, its causes, both biological and psychological, and its management.

Psychological Monographs, 1920 Includes music.

Methods and Experiments in Mental Tests Cyril Albert Richardson, 1922

Cambridge Handbook of Psychology, Health and Medicine Susan Ayers, Andrew Baum, Chris McManus, Stanton Newman, Kenneth Wallston, John Weinman, Robert West, 2007-08-23 Health psychology is a rapidly expanding discipline at the interface of psychology and clinical medicine. This new edition is fully reworked and revised, offering an entirely up-to-date, comprehensive, accessible, one-stop resource for clinical psychologists, mental health professionals and specialists in health-related matters. There are two new editors: Susan Ayers from the University of Sussex and Kenneth Wallston from Vanderbilt University Medical Center. The prestigious editorial team and their international, interdisciplinary cast of authors have reconceptualised their much-acclaimed handbook. The book is now in two parts: part I covers psychological aspects of health and illness, assessments, interventions and healthcare practice. Part II covers medical matters listed in alphabetical order. Among the many new topics added are: diet and health, ethnicity and health, clinical interviewing, mood assessment, communicating risk, medical interviewing, diagnostic procedures, organ donation, IVF, MMR, HRT, sleep disorders, skin disorders, depression and anxiety disorders.

Psychological Examining in the United States Army Robert Mearns Yerkes,1921

Emotional Development in Atypical Children Michael Lewis,Margaret Wolan Sullivan,2014-03-05

Early emotional development, emotional regulation, and the links between emotion and social or cognitive functioning in atypically developing children have not received much attention. This lack is due in part to the priorities given to the educational and therapeutic needs of these children. Yet an understanding of the basic emotional processes in children with atypical development can only serve to promote more effective strategies for teaching and intervening in the lives of these children and their families and may contribute to our understanding of basic emotional processes as well. When referring to emotions, the editors mean some complex set of processes or abilities, whether or not the topic is normal or atypical development. Specifically, they use the term emotion to refer to at least three things

-- emotional expressions, emotional states, and emotional experiences. The focus of this volume, these three aspects of emotional life are affected by socialization practices, maturational change, and individual biological differences including, in this case, differences in children as a function of disability. Contributors examine the development of emotions in children with organic or psychological disorders as well as those in compromised social contexts making this volume of prime importance to developmental, clinical, and social psychologists, educators, and child mental health experts.

Psychology In Modules David G. Myers,2009-09-28 This version of the main text breaks down the chapters into shorter modules, for more accessibility. The smaller chunks allow students to better grasp and explore psychological concepts. The modules also allow more flexibility in teaching, as cross-references to other chapters have been replaced with brief explanations.

Genes, Brain and Development Marcia A. Barnes,2010-01-07 A review of connections between genes, brain, and behavior for a range of genetic disorders, considering lifespan and treatment issues.

Be A Modern Teacher With Emotional Intelligence Alozie Eugene Iheanyi (Fr),2015-08-25 In the

past ten years of pastoral vocation as a Catholic Priest, I have dedicated not less than eight years in apostolates intrinsically tied to mentoring of young people and classroom teaching. After completing my bachelor's degree; I worked for six years as a secondary school principal in Nigeria before I received the call to come over to Europe for the continuation of my ministerial experience and learning. In all these years, both from studies and in practical experience, I have realized that education is meant to enhance the lives of people and improve them. In the course of researching for my Master's degree, I became aware of the concept of emotional intelligence. I saw in it an apt and timely addendum to the entire course of research and to educational research in particular. The fact is that human life, its reality and goals is the very context inside which learning should be done and for which learning is done. This is what makes education have meaning and determines its usefulness, and it is only in this context that we can say that education prepares one for life and its challenges. Directly or indirectly, emotional intelligence makes a contribution to preparation for living in the modern world. Educational enterprise is not exclusive to the activities that take place within the four walls of a formal

classroom. I accept the educational learning theory which says that learning is everywhere for a conscious mind, though it always needs to be tuned and guided. In fact there are a huge number of para-teachers, such as parents, coaches, mentors, pastors, inspirers, trainers and leaders, who do not know the extent to which their day-to-day teachings and drilling of others affect the psychology of society at large. This is because the teaching, mentoring and coaching of such para-teachers influences the emotional intelligence of their followers and learners, most often in a positive way. Emotional intelligence was a ground-breaking theory developed by Daniel Goleman, not only on to teach how best to teach and inspire, but also to make an important link between the learning achievement of the classroom and success in real life situations. This is called knowledge transfer in education.
