Jane Hunter

**Scribe with a Scalpel** Mark Killingback, 2017-06-27 *Scribe With A Scalpel* is the biography of an Australian surgeon who practised in Sydney for 41 years (1961-2001). It is diarised in chronological sequence and includes memoirs, reflections, achievements and disappointments. Aspects of family life are detailed. The book refers to some aspects of the training of surgeons in Australia and the United Kingdom. Initially practising as a general surgeon Dr Killingback became the first surgeon in Australia to practice exclusively as a colorectal surgeon, a professional move that was not greeted with enthusiasm by most general surgeons. The book illustrates the development of colorectal surgery as a specialty in Australia and includes the authors contributions to Australian and international colorectal meetings. The book includes 225 illustrations.

**High Possibility STEM Classrooms** Jane Hunter, 2020-12-21 This book offers a new, research-based approach to STEM education in early, elementary, and middle years of schooling, concentrating on building teacher agency and integrated approaches to teaching and learning in High Possibility STEM Classrooms. Author Jane Hunter presents a globally oriented, contemporary framework for powerful Integrated STEM, based on mixed-methods research data from three studies conducted in 14 schools in language-diverse, disadvantaged, and urbanized communities in Australia. Theory, creativity, life preparation, public learning, and contextual accommodations are all

utilized to help educators create hands-on, inquiry-led, and project-based approaches to STEM education in the classroom. A set of highly accessible case studies is offered that places pedagogy at the center of practice – an approach valuable for researchers, school leaders, and teachers alike. Ultimately, this text responds to the call for examples of what successful Integrated STEM teaching and learning looks like in schools. The book concludes with an evidence-based blueprint for preparing for less siloed and more transdisciplinary approaches to education in schools. Hunter argues not only for High Possibility STEM Classrooms but for High Possibility STEM Schools, enriching the dialogue around the future directions of STEM, STEAM, middle leadership, technological literacies, and assessment within contemporary classrooms.

Technology Integration and High Possibility Classrooms Jane

Hunter,2015-03-02 Technology Integration and High Possibility Classrooms provides a fresh vision for education in schools based on new research from in-depth studies of technology integration in exemplary teachers' classrooms. This timely book meets the demand for more examples of effective technology integration by providing a new conceptual understanding that builds on the popular and highly influential theoretical framework of technological, pedagogical and content knowledge (TPACK). Technology Integration and High Possibility Classrooms details four rich case studies set in different

contexts with students ranging from age 6 to 16. Each case study articulates in very practical terms what characterizes exemplary teachers' knowledge of technology integration and how that is applied in classrooms. This highly accessible book clearly demonstrates how theory informs practice and provides new possibilities for learning in twenty-first-century schools.
