Speaker Nancy Pelosi and the New American Politics Ronald M. Peters, Jr., Cindy Simon Rosenthal, 2010-04-16 When the Democrats retook control of the U.S. House of Representatives in January 2007 after twelve years in the wilderness, Nancy Pelosi became the first woman speaker in American history. In *Speaker Nancy Pelosi and the New American Politics*, Ron Peters, one of America's leading scholars of Congress, and Cindy Simon Rosenthal, one of America's leading scholars on women and political leadership, provide a comprehensive account of how Pelosi became speaker and what this tells us about Congress in the twenty-first century. They consider the key issues that Pelosi's rise presents for American politics, highlight the core themes that have shaped, and continue to shape, her remarkable career, and discuss the challenges that women face in the male-dominated world of American politics, particularly at its highest levels. The authors also shed light on Pelosi's political background: first as the scion of a powerful Baltimore political family whose power base lay in East Coast urban ethnic politics, and later as a successful politician in what is probably the most liberal city in the country, San Francisco. Peters and Rosenthal trace how she built her base within the House Democratic Caucus and ultimately consolidated enough power to win the Speakership. They show how twelve years out of power allowed her to fashion a new image for House Democrats, and they conclude with an analysis of her institutional leadership style. The only full-length portrait of Nancy Pelosi in print, this superb volume offers a vivid and insightful analysis of one of America's most remarkable politicians.

Crafting Society Donald G. Ellis, 1999-07 The study of communication, language, and discourse is at once simple, elegant, and complex. Each of these areas is informed by micro subjective experiences of individuals and the macro processes of a culture. Communication itself is thoroughly modern yet it seeks anchorage in the traditions of the humanities and social sciences. All of this creates a significant challenge. In this monograph, Ellis considers the study of communication as he discusses three key issues in communication theory: (1) the growing emphasis on meaning, (2) the importance of a mediated culture, and (3) the links between micro communication activities and macro social categories such as ethnicity and social class. In response to these three issues, this book deals with the way people use language and communication to construct their world; this world is not constructed purely but is influenced by attitudes, ideologies, and biases. In the modern world the medium of communication has an impact on consciousness and society, and Ellis shows how the media are responsible for some of the fault lines in society. The book also explores principles of medium theory and documents the impact of media on psychological and sociological phenomena. Finally, work of Goffman, Giddens, and Randall Collins is extended to show how micro communication behaviors are implicated in and by social conditions. ADDITIONAL COPY FOR MAILER Expanded features: * The chapters work out a logic connecting real communication patterns with the broad principles upon which societies are explored. Thus the title *Crafting Society*—the crafting is purposefully active to indicate the dynamic processes involved in creating what we call society. Society and culture have their roots and empirical bases in communication; that is, in

the daily struggles of interaction. * Two chapters on two of the most important and controversial issues of the day--ethnicity and class. These two chapters are clear illustrations of the new theoretical principles discussed throughout the book. * A chapter on social class is very unique for a book devoted to communication processes. Communication theorists do not usually write about class, even though it is a highly symbolic process and rooted in communication patterns. Class is a difficult concept in America since so few people, other than sociologists, care to talk about it. * A chapter on medium theory takes the bold step of experimenting a little by summarizing basic causal statements and propositions. This device underscores the goal of a theory which is to come to grips with testable statements. The focus is on medium theory and how the media influence consciousness and social structure. * A unique chapter takes up the issue of how communication processes are constitutive of social structures. It draws on work by Giddens and others to return to a concept of structure based on actions that produce and reproduce structure.
