Trade Shows in the Globalizing Knowledge Economy Harald Bathelt,Francesca Golfetto,Diego Rinallo,2014-07-17 This book presents a radically innovative view on trade shows as knowledge-rich places, where firms learn through observation and interaction with other economic actors, and as enablers, rather than mere consequences, of

globalization. Traditionally seen as marketing tools, trade shows are conceptualised as temporary clusters that facilitate the creation and diffusion of knowledge across geographical distances, even in the age of social media. The book is organized in four parts. Part I lays out the conceptual foundations of the knowledge-based perspective, from the early development of trade fairs to modern-day events. Part II analyses specific global developments, focussing on the trade show ecologies of Europe, North America, and the Asia-Pacific region. Part III investigates differences in the nature of knowledge generation practices across international hub shows, exports shows, and import shows in different industries, and investigates competition between such events. Part IV discusses the implications of a knowledge-based conceptualisation of trade shows. The book will be of interest to scholars and students in economic geography, management, marketing, organization studies, political science, and sociology. It also has practical implications for trade show organisers on how to make their events more competitive through knowledge-based strategies; for industry associations and cities, on how to use these events for collective/place marketing purposes; and for policy makers, on how to use trade shows for export promotion and innovation policies.

The History and the Future of the Roman Liturgy Denis Crouan,2011-07-05 Since the Second Vatican Council, the liturgy has become the source of conflicting opinions. This situation has given rise to disputes that continue to divide those who practice their faith. But what has created this state of affairs? Author Denis Crouan shows how the decisions made by Vatican II that aimed at restoring the Roman rite were presented poorly, applied incorrectly, and often not applied at all. In many places the Mass has been turned into a permanent work-in-progress, in which the objectivity of the liturgy yields to the subjectivity of those who take part in it. Where does the current unwillingness to apply the liturgical rules come from? Why have the directives of the last council been ignored or circumvented? This book offers answers to the questions asked by Catholics who want to understand their liturgy better, so as to put an end to deviant practices that threaten Church unity.

The Function of Conference Organisers and the Marketing for Information Technology Seminars of Small and Medium-Sized Industries Karin Schneider,1999-09-03 Inhaltsangabe:Abstract: As the European Union (EU) is getting bigger and the movement of people, capital, goods and services across the 15 participating countries is simplified, the

European conference scene has been boosted with this enlarged competition. The latest knowledge and information have become vital economic assets of the information-driven society. While there are numerous ways to obtain this information, seminars are particularly attractive because they communicate desired knowledge quickly in a compact form. The major destination cities show increasing business, allied with enhanced competition, a toughening attitude amongst organisers and meeting planners as well as the need for improved marketing techniques. The use of cyberspace has gained an important influence on this sector. Due to increasing competition, services are under pressure to be improved, and the whole business of meeting is searching for higher standards. Definition of the subject Information systems have /.../ aided the growth of multinational organizations by providing a technical infrastructure to smooth over the constraints of time and distance. /.../ The IT world is changing rapidly and the basic components of an IT infrastructure have grown in power and sophistication. This means looking at how the technology should operate in the organization and who should have responsibility for it. Especially in the liberalisation of the EU (and the connected internationalisation - addition C. S.) IT is at the forefront of achieving competitive advantages. In the fast changing world of data processing not only IT managers, but also the business managers who work with computer technology and decide about the implementation of an IT system in their business have to be informed about the latest technical developments. An IT seminar is one of the most effective ways to gain this knowledge. Although the conference and seminar line has been booming on the national and international basis for several years, the research about it was difficult as a sufficient literature is still not available in this sector. Scientific material about fundamental questions or single problems is relatively rare. Continuing statistical data is very seldom found and a definition of the various meeting types do not exist. Several brochures with simple descriptions of the congress organisers and sites had to be taken into account. Process of the examination After comparing different [...]

Die deutsche Messe- und Ausstellungswirtschaft Martin Uhlenndorf, 2007-02-07 Inhaltsangabe: Problemstellung: Die deutsche Messewirtschaft ist weltweit führend. 23 Messeplätze verfügen zusammen über eine Hallenfläche von über 2,5 Mio. Quadratmetern. Jährlich veranstalten sie rund 140 überregionale Messen und Ausstellungen mit mehr als 170.000 Ausstellern und über 10 Mio. Besuchern. Zwei Drittel der global wichtigen Leitmessen finden auf deutschem

Boden statt, drei der vier größten Messegelände der Welt liegen in Deutschland und sechs der zehn umsatzstärksten Messegelände der Welt haben hier ihren Sitz. Jedes Jahr sorgen die Aussteller und Besucher mit ihren Investitionen in die Messepräsenz allein in Deutschland für einen Umsatz von über 10 Milliarden Euro. Der deutsche Messemarkt ist seit dem Jahr 2001 erheblich unter Druck geraten. Nicht nur die Wettbewerber, wie global agierende Messeorganisationen, die den lukrativen europäischen Markt selbst für sich gewinnen möchten, sondern auch die schwache Konjunktur verhindert wesentliche Belebungsimpulse der internationalen Fachmessen in Deutschland. Eine Entwicklung, der die deutschen Großmessen aktiv begegnen müssen, wollen sie nicht wesentliche Anteile an aggressive, flexible und dynamisch operierende „außerdeutsche“ Veranstalter verlieren. Zudem wirkt sich die Globalisierung in einer Intensivierung des Wettbewerbs der Messe- und Kongressveranstalter um neue ebenso wie um themengleiche Veranstaltungen aus. Auf der einen Seite müssen sie sich gegen andere Kommunikationskanäle behaupten, auf der anderen Seite konkurriert eine Vielzahl von Veranstaltungen und Messegesellschaften untereinander. Und letztendlich kämpfen alle um die knappe Aufmerksamkeit, das nachlassende Interesse und die Budgets ihrer Kunden (sowohl der Aussteller als auch der Besucher). Sämtliche Budgets der Unternehmen stehen zur Disposition. Selten wurden diese so konsequent hinsichtlich ihrer Notwendigkeit und Höhe überprüft wie in der jetzigen Zeit der schwachen Konjunktur. Dies gilt v.a. für Ausgaben, die kurzfristig reduzierbar sind oder gestrichen werden können. Im Fokus der Diskussion stehen dabei nicht selten die Ausgaben für Vertriebs- und Marketingaktivitäten, die im Zusammenhang mit Messen stehen. Verstärkt wurde diese Tendenz noch durch die Ereignisse des 11. September 2001. Etliche Unternehmen aus dem Ausland haben ihre Aktivitäten im Bereich der Messen und Ausstellungen mit der Begründung reduziert, die Mitarbeiter nicht unnötig durch verstärkte Reiseaktivitäten gefährden zu wollen.
