Advances in Databases and Information Systems Barbara Catania, Mirjana Ivanovic, Bernhard Thalheim, 2010-09-16 This volume contains the best papers presented at the 14th East-European Conference on Advances in Databases and Information Systems (ADBIS 2010), held during September 20-24, 2010, in Novi Sad, Serbia. ADBIS 2010 continued the ADBIS series held in St. Petersburg (1997), Poznan (1998), Maribor (1999), Prague (2000), Vilnius (2001), Bratislava (2002), Dresden (2003), Budapest (2004), Tallinn (2005), Thessaloniki (2006), Varna (2007), Pori (2008), and Riga (2009). The main objective of the ADBIS series of conferences is to provide a forum for the dissemination of research accomplishments and to promote interaction and collaboration between the database and information systems research communities from Central and East European countries and the rest of the world. The ADBIS conferences provide an international platform for the presentation of research on database theory, development of advanced DBMS technologies, and their advanced applications. ADBIS 2010 spans a wide area of interests, covering all major aspects related to theory and applications of database technology and information systems. Two different submission lines were considered for ADBIS 2010, one within the classic track and another one within a special track organisation. ADBIS comprised five tracks: 1. Conceptual Modeling in Systems Engineering (CMSE) 2. Data Mining and Information Extraction (DMIE) 3. Business Processes in E-Commerce Systems (e-commerce) 4. Personal Identifiable Information: Privacy, Ethics, and Security (PIIPES) 5.

Walking and Trekking in Zagori Aris Leontaritis, 2019-01-16 Zagori in Greece's Northern Pindos National Park is among the last relatively undiscovered and unspoilt hiking destinations in Europe. This guide presents a selection of thirty walks and three short treks within the region's captivating scenery, from dramatic gorges to mystical forests, crystal-clear turquoise rivers, rugged alpine peaks and characterful mountain villages. Routes vary from easy walks on clear paths to strenuous ascents and mountain

traverses, meaning that there is something to suit most ambitions and abilities. Clear mapping accompanies the route description, and the introduction to the guide covers all the practicalities, including getting to Zagori, accommodation, equipment, maps and safety. There is also a wealth of information about the region's rich history, architecture, geology, plants and wildlife, as well as fascinating notes on points of interest encountered on route. The routes are presented in five chapters, covering Central Zagori, Vikos Gorge and vicinity, Mt Timfi, Konitsa and Mt Smolikas, and Valia Kalda National Park and Metsovo, with highlights including Mt Timfi and Mt Smolikas (Greece's second highest mountain), the breathtaking Vikos Gorge, traditional stone arch bridges and the alpine tarns of Drakolimni (Dragonlakes). With so much stunning scenery, this is a region that cries out to be explored.

The book includes all papers that have been accepted after peer review for presentation in the conference.

West Aegean Rod Heikell, 2020-01-01 Rod and Lucinda Heikell's *West Aegean* covers the coasts and islands near Athens, the adjacent islands in the Cyclades and the Eastern Peloponnisos to Monemvasia. Also covered is the mainland coast of Greece from Sounion to Volos and the adjacent coast of Evia, and the Northern Sporades including Skiathos and Skopelos.

Ionian Rod and Lucinda Heikell, 2023-10-13 Now celebrating its eleventh edition, *Ionian* has once again been thoroughly updated with new photos and plans. Covering the coast and islands southwards from Corfu to Finakounda and eastwards to Mesolongion, this much-loved guide contains more detail of many of the smaller anchorages and harbours than are comprehensively covered in Rod Heikell's *Greek Waters Pilot*. Like its companions *West Aegean* and *East Aegean*, *Ionian* is ideal for charterers and flotilla sailors who are onboard for a relatively short time, but also for longer term cruisers on their own yachts who are looking for additional pilotage and background information for this popular cruising ground. As with all the Heikell guides, *Ionian* not only gives all the essential information you need but also exudes the charm and flavour of this corner of the Mediterranean. 'Heikell's style is easy to digest and gives pleasure in the details of the history, geography and social circumstances of the places described as well as the essential sailing information.' The *Little Ship* 'This book, as well as being a practical manual on Ionian cruising, seems to have absorbed much of the author's personal feelings regarding the charm which draws him back to it, and any reader who has had a whiff of the magic spell of the Greek islands will sense this, and inevitably renew the resolve to return and experience it once again

in greater measure.' Nautical Magazine 'Rod Heikell nowadays is to the Mediterranean as gin is to tonic. It is difficult to imagine sailing there without one of his guides. Clear pilot notes, chartlets and plentiful illustrations, with entertaining commentaries on each place. Up-to-date observations on local and national regulations. The new edition does not disappoint. If one must choose, I would have no hesitation in recommending Heikell.' Cruising Association 'Rod has a knack for dropping in snippets of interest and colour to give the reader a feel for the atmosphere of each port or bay.' Yachting Monthly 'Like all Rod Heikell's pilots, it is also a travel guide in its own right.' Ionian Magazine 'The sailing directions are particularly useful when entering the smaller anchorages and harbours, for which little information is to be found on charts, and include excellent harbour plans and top quality aerial photographs.' Flying Fish Magazine (Ocean Cruising Club)

Mediterranean Almanac 2023/24 Rod and Lucinda Heikell, 2023-01-27 The essential marine data resource for yachts sailing the Mediterranean, the Imray Mediterranean Almanac is published biennially with updates available in a downloadable supplement at the end of the first year. It includes: Data, waypoints and contacts for all major harbours and marinas throughout the Mediterranean Sea plus Atlantic Islands. Weather sources for radio, internet and apps Information on lights and buoys Maritime regulations, marine reserves and traffic schemes Coast radio stations and frequencies GMDSS safety and distress communications Harbour plans throughout, with the familiar Imray cartography which adds clarity to their use. There are the usual detailed revisions throughout this edition, plus many new harbour plans.

East Aegean Rod and Lucinda Heikell, 2021-07-01 The expanded third edition of this popular cruising guide encompasses the Greek Dodecanese islands and the Turkish coast eastwards from the Samos Strait to Kas and Kekova. Fully illustrated with up to date plans and numerous new photographs, it is packed with all the essential information for getting to the area, formalities and sailing these beautiful cruising grounds. There is a level of further detail to this coverage in terms of anchorages and other destinations than is found in the Heikell's Greek Waters Pilot and Turkish Waters and Cyprus Pilot. This handy guide also whets the appetite for the local cuisine and culture and gives some historic context to exploration ashore. The fantastic background information with historical and mythological anecdotes gives ... a richness too often missing from bald pilot guides. Royal Cruising Club ... no East Med cruiser will want to sail without a copy. Yachting Monthly

Extreme Weather for Kids Matthew Cappucci, 2024-03-26 Extreme Weather for Kids is a whirlwind ride through the wild world of weather, written in accessible language and complemented by vivid descriptions and imagery. Designed to harness children's natural curiosity, this action-packed

introduction to meteorology incorporates firsthand accounts from inside Mother Nature's most dramatic moments. For each phenomenon introduced, explanatory text, informative illustrations, sidebars, and asides allow readers to explore at their own pace. Along with storm-chasing reports and photos from in the field, each chapter includes a step-by-step hands-on activity for engaging with the science. What is the polar vortex? And why does a disrupted "polar vortex" lead to extreme cold air outbreaks across Europe, Asia, and North America? Among the many "in case you were wondering" questions addressed: How strong can a hurricane get? What's the biggest tornado to have ever happened? How large can hail get? Is "thundersnow" real? How does it form? How thick is lightning? And how powerful is it? Where can I find "fossilized lightning?" Can it snow in the desert? What are "solar storms?" What makes the northern (and southern) lights? Weather is one of the most accessible sciences there is. Everyone experiences it in some way or another, and learning the basics behind it naturally sparks interest in other sciences. That's why *Extreme Weather for Kids* also teaches the basic principles of scientific observation, while placing a key emphasis on safety. *Extreme Weather for Kids* is sure to awaken the joy of learning—rain or shine.

Sustainability of European Food Quality Schemes Filippo Arfini, Valentin Bellassen, 2019-11-15 This edited volume evaluates recent EU quality policy, focusing on the structure, governance, technical specifications and performances – economic, environmental and social – of Food Quality Schemes (FQS) in the European Union and South East Asia. The intended benefits of FQS include generating a fair return for farmers and producers, and enabling

consumers to make better-informed purchasing choices through effective labeling. In addition, policy makers now consider FQS as a means of guaranteeing not only quality in food production, but also sustainability. Despite these potential benefits, the economic performance of the FQS (e.g. PDO, PGI, organic) has been variable. While some support significant value-added production, with substantial benefits to producers, consumers and wider economies, many others have failed to become economically sustainable. In addition, the environmental and social performance of FQS remains largely unexamined, with the exception of the environmental performance of organic products. The editors examine these discrepancies and offer a nuanced evaluation of the effectiveness of such policies. Several unique features make this volume a key resource for those interested in FQS and in the sustainability of food products. The editors provide a concise description of the value chain, the governance and the technical specifications of 27 FQS in Europe and South East Asia. The editors also provide a sustainability assessment of each of these FQS, and support or question the view that FQS are moving from "quality" to "sustainability." Finally, the volume serves as a repository of key data on these FQS. Readers have access to the raw data necessary to compute the indicators used in the sustainability assessment (eg. value added, number of jobs, quantity of fertilizers, etc), allowing them to conduct novel re-analysis. The book is designed for an interdisciplinary audience of academics, policy makers, and stakeholders. The compilation of FQS case studies makes it a useful reference for researchers and students of food policy, geography, food anthropology, local and rural development, local agri-food systems and agri-food chains. Stakeholders such as national and European regulators, entities responsible for FQS technical specifications, and embassy staff will also find the information relevant. Additionally, individuals helping to implement food quality schemes, including auditors, producers, and consumer associates, as well as stakeholders in the sustainability of food products, including farmers, farmer's associations, and environmental NGOs, will also find the information relevant and important for their work.

Ambient Media and Systems Constantinos T. Angelis, Dimitros Fotiadis, Alexandros T. Tzallas, 2013-11-29 This book constitutes the thoroughly refereed post-conference proceedings of the Third International ICST Conference on Ambient Media and Systems, AMBI-SYS 2013, held in Athens, Greece, in March 2013. The 12 revised full papers presented were carefully reviewed and selected from various submissions. The papers focus on emerging technologies, services and solutions for new, human-centric intelligent ambient environments.

Insight Guides Greek Islands Insight Guides, 2014-03-06 With its treasure-filled ancient sites, folklore and island flora, the Greek Islands are the jewel in Greece's crown. Be inspired by the new edition of Insight Guide Greek Islands, a detailed full-colour guide to this fascinating region. Insight Guides' unrivaled coverage of history and culture provides an essential introduction to what makes the Greek Isles unique, including its people and identities as well as its sailing scene. Consult the Best of Greek Islands selection for an at-a-glance guide to the region's most evocative attractions, such as the improbably perched Panagia Hozoviotissa Monastery and the eminently strollable Corfu Old Town, and the editor's choice of recommendations for the best museums and hikes, amongst others. Descriptive

accounts of where to go in the Greek Islands, from the impressive Place of Knossos, the centre of Europe's first civilisation, to the exquisite beaches on Levkada and Crete, are enhanced by beautiful photographs, while all major sights are cross-referenced with full-colour maps. The travel tips section provides a wealth of information on how to plan your trip, plus our selection of the best hotels.

Meteorology of Tropical West Africa Douglas J. Parker, Mariane Diop-Kane, 2017-02-13 Meteorology of tropical West Africa: the Forecasters' Handbook presents the science and practice of weather forecasting for an important region of the tropics. Connecting basic theory with forecasting practice, the book provides a unique training volume for operational weather forecasters, and is also suitable for students of tropical meteorology. The West African region contains a number of archetypal climatic zones, meaning that the science of its weather and climate applies to many other tropical regions. West Africa also exhibits some of the world's most remarkable weather systems, making it an inspiring region for students to investigate. The weather of West Africa affects human livelihoods on a daily basis, and can contribute to hardship, poverty and mortality. Therefore, the ability to understand and predict the weather has the potential to deliver significant benefits to both society and economies. The book includes comprehensive background material alongside documentation of weather forecasting methods. Many examples taken from observations of West African weather systems are included and online case-studies are referenced widely.
