Mapping Latin America Jordana Dym,Karl Offen,2011-12-01 For many, a map is nothing more than a tool used to determine the location or distribution of something—a country, a city, or a natural resource. But maps reveal much more: to really read a map means to examine what it shows and what it doesn’t, and to ask who made it, why, and for whom. The contributors to this new volume ask these sorts of questions about maps of Latin America, and in doing so illuminate the ways cartography has helped to shape this region from the Rio Grande to Patagonia. In Mapping Latin America,Jordana Dym and Karl Offen bring together scholars from a wide range of disciplines to examine and interpret more than five centuries of Latin American maps.Individual chapters take on maps of every size and scale and from a wide variety of mapmakers—from the hand-drawn maps of Native Americans, to those by famed explorers such as Alexander von Humboldt, to those produced in today’s newspapers and magazines for the general public. The maps collected here, and the interpretations that accompany them, provide an excellent source to help readers better understand how Latin American countries, regions, provinces, and municipalities came to be defined, measured, organized, occupied, settled, disputed, and understood—that is, how they came to have specific meanings to specific people at specific moments in time. The first book to deal with the broad sweep of mapping activities across Latin America, this lavishly illustrated volume will be required reading for students and scholars of geography and Latin American history, and anyone interested in understanding the significance of maps in human cultures and societies.

The Urban Transport Crisis in Emerging Economies Dorina Pojani,Dominic Stead,2016-11-18 This edited volume discusses urban transport issues, policies, and initiatives in twelve of the world's major emerging economies – Brazil, China, Colombia, India, Indonesia, Iran, Mexico, Nigeria, Russia, South Africa, Turkey, and Vietnam - countries with large populations that have recently experienced large changes in urban structure, motorization and all the associated social, economic, and environmental impacts in positive and negative senses. Contributions on each of these twelve countries focus on one or more major cities per country. This book aims to fill a gap in the transport literature that is crucial to understanding the needs of a large portion of the world's urban population, especially in view of the southward shift in economic power. Readers will develop a better understanding of urban transport problems and policies in nations where development levels are below those of richer countries (mainly in the northern hemisphere) but where the rate of economic growth is often increasing at a faster rate than the wealthiest nations.

Station Christopher Beanland,2024-04-11 A glorious global celebration of modern railway architecture in the mid-20th century and beyond. Many railway books are about nostalgia for the steam age, but this one is different: a global study of railway architecture from the 1950s onwards and into the future. In 50 fascinating entries, renowned travel and architecture writer Christopher Beanland looks primarily at stations but also covers starkly brutalist signal boxes and depots, charming art-adorned undergrounds and international examples of pioneering signage and design. Station explores LA's iconic Union Station, the verdant Atocha Station in Madrid and Warsaw's spectacular modernist stations, but it also includes less familiar examples such as Saudi Arabia's high-speed Haramain Line, the joyous monorail at Walt Disney World Resort and Mexico's anticipated Tren Maya. The book also contains essays on topics including hanging railways in Germany and Japan, the intriguing architecture and design of Berlin's U-Bahn stations and the joy of interrailing. Illustrated with glorious photographs throughout, this stylish and contemporary book is a celebration of modern railway architecture at its best and will appeal to rail enthusiasts and architecture aficionados alike.
