Les mutacions socials de la COVID-19 Institut d'Estudis Catalans,2022-07-28 El llibre que us presentem és el resultat final del projecte de recerca titulat Impacte social de la covid-19: una mirada multidisciplinària, coordinat per Andreu Domingo i Valls i Mercè Barceló i Serramalera, elaborat en el si de la Secció de Filosofia i Ciències Socials de l'Institut d'Estudis Catalans, i patrocinat per aquesta institució. El primer resultat del projecte fou l'informe Impacte social de la covid-19. Una mirada multidisciplinària (Barcelona: SFCs, IEC <https://covid-19.iec.cat/>). Ara, complementàriament, en volem oferir una versió de caràcter divulgatiu, més breu, per tal de poder arribar a tot tipus de lector. Es mantenen, però, les dues notes que revaloritzen aquesta obra col·lectiva: la mirada multidisciplinària sobre un mateix objecte, i el prendre com a punt de referència els territoris de parla catalana.

Metro Station Colors Station Metro Station,2020-05-12 We are wrapped up in the subway world, what happens on top of it, what happens inside it, many people wandering inside it, day and night, what are their stories of what is going on in their minds, what do they do?

Optical and Wireless Convergence for 5G Networks Abdelgader M. Abdalla,Jonathan Rodriguez,Issa Elfergani,Antonio Teixeira,2019-08-02 The mobile market has experienced unprecedented growth over the last few decades. Consumer trends have shifted towards mobile internet services supported by 3G and 4G networks worldwide. Inherent to existing networks are problems such as lack of spectrum, high energy consumption, and inter-cell interference. These limitations have led to the emergence of 5G technology. It is clear that any 5G system will integrate optical communications, which is already a mainstay of wide area networks. Using an optical core to

route 5G data raises significant questions of how wireless and optical can coexist in synergy to provide smooth, end-to-end communication pathways. *Optical and Wireless Convergence for 5G Networks* explores new emerging technologies, concepts, and approaches for seamlessly integrating optical-wireless for 5G and beyond. Considering both fronthaul and backhaul perspectives, this timely book provides insights on managing an ecosystem of mixed and multiple access network communications focused on optical-wireless convergence. Topics include Fiber-Wireless (FiWi), Hybrid Fiber-Wireless (HFW), Visible Light Communication (VLC), 5G optical sensing technologies, approaches to real-time IoT applications, Tactile Internet, Fog Computing (FC), Network Functions Virtualization (NFV), Software-Defined Networking (SDN), and many others. This book aims to provide an inclusive survey of 5G optical-wireless requirements, architecture developments, and technological solutions.

Visible Light Communication Shlomi Arnon, 2015-03-05 This book sets out the theoretical principles of visible light communication (VLC), and outlines key applications of this cutting-edge technology.

London the Promised Land Revisited Anne J. Kershen, 2016-03-09 Some two decades since the publication of *London the Promised Land?*, which charted and investigated the successes and failures of the migrant experience in London over a period of three hundred years, this book re-examines the migrant landscape in London. While remaining a beacon for immigrants, the migrant face of the city has changed rapidly and dramatically from one which was heavily populated by semi-

skilled and unskilled post-colonial incomers, to one which now embraces the EU Accession Countries, refugees from the Middle East and Africa, oligarchs from Russia, the new wealthy from China, economic migrants from Latin America and Ireland, and still, post-colonial immigrants - at the same time witnessing the exodus 'home' of incomers, or their descendants, who now see opportunities where there were none before. The contributors, all leading academics and practitioners in their diverse fields, examine changes to the migrant landscape of contemporary London at the micro, meso and macro levels. *London the Promised Land Revisited* thus explores a range of experiences in the capital, including the presence and treatment of illness amongst migrants, the phenomenon of migrant 'invisibility' and asylum, the migrant marketplace and ethnic 'clustering', and interaction with local and national government - across a variety of migrant groups, both 'new' and 'old'. As such, this book will appeal to scholars across the social sciences with interest in migration, migrant experiences and the contemporary 'global' city.

Construction Planning, Programming and Control Brian Cooke, Peter Williams, 2013-02-05 This book offers a clear explanation of the principles and practice of construction planning, programming and control during the preparation and construction stages of a project. The book is written in the context of current procurement and contractual arrangements and JCT2005, NEC3 and ICE7 contracts are covered. The statutory framework within which construction projects must be managed is explained and the topic of construction hazard and risk is covered in detail. A variety of programming techniques are explained and the development of safe construction sequences and methods is particularly emphasised. The control of time, money and resources are considered in a risk management context and a complete chapter is devoted to cash flow. The third edition has been extensively updated and extended to include new materials on: * Hazard identification * Risk

assessment * Health and safety management * CDM 2007 * Construction sequences and method statements * Delay analysis * Waste management and Site Waste Management Plans The final three chapters are devoted to individual case studies which have been selected to illustrate the practical application of the principles explained in the book and to provide examples of current procedures adopted by major contractors. The content is designed to provide a clear and comprehensive text for undergraduates on construction management, surveying and civil engineering degree courses.

Computers in Railways XVII G. Passerini,J.M. Mera,R. Takagi,2020-09-07 It is important to continue to update the use of advanced systems by promoting general awareness throughout the management, design, manufacture and operation of railways and other emerging passenger, freight and transit systems. Originating from presentations at the 17th International Conference on Railway Engineering Design and Operation, this volume contains selected research works on the topic. The included papers help to facilitate the use of advanced systems and place a key focus on the applications of computer systems in advanced railway engineering. These research studies will be of interest to all those involved in the development of railways, including managers, consultants, railway engineers, designers of advanced train control systems and computer specialists.

Optical Wireless Communications Murat Uysal, Carlo Capsoni, Zabih Ghassemlooy, Anthony Boucouvalas, Eszter Udvary, 2016-08-25 This book focuses on optical wireless communications (OWC), an emerging technology with huge potential for the provision of pervasive and reliable next-generation communications networks. It shows how the development of novel and efficient wireless technologies can contribute to a range of transmission links essential for the heterogeneous networks of the future to support various communications services and traffic patterns with ever-increasing demands for higher data-transfer rates. The book starts with a chapter reviewing the OWC field, which explains different sub-technologies (visible-light, ultraviolet (UV) and infrared (IR) communications) and introduces the spectrum of application areas (indoor, vehicular, terrestrial, underwater, intersatellite, deep space, etc.). This provides readers with the necessary background information to understand the specialist material in the main body of the book, which is in four parts. The first of these deals with propagation modelling and channel characterization of OWC channels at different spectral bands and with different applications. The second starts by providing a unified information-theoretic treatment of OWC and then discusses advanced physical-layer methodologies (including, but not limited to: advanced coding, modulation diversity, cooperation and multi-carrier techniques) and the ultimate limitations imposed by practical constraints. On top of the physical layer come the

upper-layer protocols and cross-layer designs that are the subject of the third part of the book. The last part of the book features a chapter-by-chapter assessment of selected OWC applications. Optical Wireless Communications is a valuable reference guide for academic researchers and practitioners concerned with the future development of the world's communication networks. It succinctly but comprehensively presents the latest advances in the field.

Metro Larry Yust, 2004-10-01 Larry Yust fell in love with the Paris Metro while directing a film in Paris and it was a love that inspired him to develop a unique photographic process. This book is a collection of images he was able to capture using that process: stunning photographic elevations of Metro stations, each one featured as a magnificent plate over three feet in length. Quirky, perceptive vignettes in English and French provide details of what the reader can expect to find above ground from each station.
