First Stop in the New World David Lida,2008-06-12 The definitive book on Mexico City: a vibrant, seductive, and paradoxical metropolis-the second-biggest city in the world, and a vision of our urban future. First Stop in the New World is a street-level panorama of Mexico City, the largest metropolis in the western hemisphere and the cultural capital of the Spanish-speaking world. Journalist David Lida expertly captures the kaleidoscopic nature of life in a city defined by pleasure and danger, ecstatic joy and appalling tragedy-hanging in limbo between the developed and underdeveloped worlds. With this literary-journalist account, he establishes himself as the ultimate chronicler of this bustling megalopolis at a key moment in its-and our-history.

The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, Cartography in the Twentieth Century, continues this tradition with a groundbreaking survey of the century just ended and a new full-color, encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps.
