Mexico (map). United States. Central Intelligence Agency,1988

La Gran Línea Paula Rebert,2010-07-05 The Treaty of Guadalupe Hidalgo, which officially ended the U.S.-Mexican War in 1848, cost Mexico half its territory, while the United States gained land that became California, Nevada, Utah, Texas, and parts of Colorado, Arizona, and New Mexico. Because the new United States-Mexico border ran through territory that was still incompletely mapped, the treaty also called for government commissions from both nations to locate and mark the boundary on the ground. This book documents the accomplishments of both the U.S. and the Mexican Boundary Commissions that mapped the boundary between 1849 and 1857, as well as the fifty-four pairs of maps produced by their efforts and the ongoing importance of these historical maps in current boundary administration. Paula Rebert explores how, despite the efforts of both commissions to draw neutral, scientific maps, the actual maps that resulted from their efforts reflected the differing goals and outlooks of the two countries. She also traces how the differences between the U.S. and Mexican maps have had important consequences for the history of the boundary.

Trail of Footprints Alex Hidalgo,2019-07-12 Trail of Footprints offers an intimate glimpse into the commission, circulation, and use of indigenous maps from colonial Mexico. A collection of sixty largely unpublished maps from the late sixteenth to the eighteenth centuries and made in the southern region of Oaxaca anchors an analysis of the way ethnically diverse societies produced knowledge in colonial settings. Mapmaking, proposes Hidalgo, formed part of an epistemological shift tied to

the negotiation of land and natural resources between the region's Spanish, Indian, and mixed-race communities. The craft of making maps drew from social memory, indigenous and European conceptions of space and ritual, and Spanish legal practices designed to adjust spatial boundaries in the New World. Indigenous mapmaking brought together a distinct coalition of social actors—Indian leaders, native towns, notaries, surveyors, judges, artisans, merchants, muleteers, collectors, and painters—who participated in the critical observation of the region's geographic features. Demand for maps reconfigured technologies associated with the making of colorants, adhesives, and paper that drew from Indian botany and experimentation, trans-Atlantic commerce, and Iberian notarial culture. The maps in this study reflect a regional perspective associated with Oaxaca's decentralized organization, its strategic position amidst a network of important trade routes that linked central Mexico to Central America, and the ruggedness and diversity of its physical landscape.

The Mapping of New Spain Barbara E. Mundy, 2000-12 To learn about its territories in the New World, Spain commissioned a survey of Spanish officials in Mexico between 1578 and 1584, asking for local maps as well as descriptions of local resources, history, and geography. In *The Mapping of New Spain*, Barbara Mundy illuminates both the Amerindian (Aztec, Mixtec, and Zapotec) and the Spanish traditions represented in these maps and traces the reshaping of indigene world views in the wake of colonization. Its contribution to its specific field is both significant and original. . . . It is a pure pleasure to read. —Sabine MacCormack, *Isis* Mundy has done a fine job of balancing the artistic interpretation of the maps with the larger historical context within which they were drawn. . . . This is an important work. —John F. Schwaller, *Sixteenth Century Journal* This beautiful book opens a Pandora's box in the most positive sense, for it provokes the reconsideration of several long-held opinions about Spanish colonialism and its effects on Native American culture. —Susan Schroeder, *American Historical Review*
