The Estate House Re-designed Anthony Sully, 2018-08-07 The book demonstrates how new houses can be designed to be more sustainable and ergonomic. Specifically, it describes a prototype building that could be constructed in the near future. Responding to some of the poor standards of mass estate housing in the UK and its out-of-date space standards, it contributes towards improving the current status quo by describing a house design, including drawings, that can compete with today's mass housing. The author examines the traditional geometrical reliance on the square in the design of houses and the planning of housing estates and promotes instead the adoption of polygonal forms. This is explained using geometric analysis, diagrams and references to existing housing. These concepts have been developed with reference to technical literature from various companies with one company interested in taking it further. Providing a novel and up-to-date design concept, this book is of value to practitioners and researchers looking to improve the standard of mass housing in the UK. It is also of interest to anyone wishing to build their own house and to manufacturers wanting to move into modern housing technology.

Twenty-First Century Estate Agency Graham Norwood, 2013-10-11 This book is a must have for those estate agents who want to work more effectively in order to grow their business and profits. With 12,000 separately owned estate agencies in the UK this book illustrates how new technology and working practices can revolutionise the industry. Technology can help to improve the competitiveness and sometimes-tarnished image of estate agents in the eyes of the general public. The book contains case studies from international markets and shows how competitive the industry is and how each competitor needs to adopt new approaches to outwit rivals - and to reassure an increasingly sceptical public that agents are worth using, add value and earn their commission.
