MiG Pilot John Barron,1980 An account of the defection of a Soviet pilot who escaped to the West in Russia's most advanced secret fighter plane.

Mr. Mig Paul T. Entrekin,2012-07-11 As indicated by the subtitle, "The Real Story of the First MiGs in America", this is a collection of stories that offer, for the first time, a concise depiction of many first-hand accounts of how these jets were acquired. In addition to historical facts and figures dating to the inception of the Russian Mikoyan-Gurevich design bureau, substantial effort has been taken to expose myths and bring to light facts that are significant and important regarding how, where, when and why the MiG aircraft were obtained and who obtained them. In addition to the history of the MiG jet's inception, the modern day stories of the people in America that acquired them are no less intriguing. As a bonus, you'll learn of the experiences of the first person to own and operate a MiG in the United States and the free world including a peek into the arena of airshow flying.

MiG Pilot John Barron,1981

America's Secret MiG Squadron Gaillard R. Peck, Jr,2012-07-20 The personal account of the original "Red Eagle" of the establishment, equipment, and training practices of the highly classified MiG squadron of the USAF. America's Secret MiG Squadrons is the story of a group of incredibly brave military pioneers who put their lives on the line to establish a training program that would prepare the US Air Force for a potential Cold War battle with Soviet aircraft. As a F-4 Phantom II pilot in Vietnam, Col. Peck had been shocked by the technological abilities of Soviet-built aircraft, and at the poor level of training available to US pilots to aid them in their battles with Soviet MiGs in the skies over Vietnam. Working with the support of Gen Hoyt S. Vandenberg, Jr., and under conditions of extreme secrecy, the CONSTANT PEG program was launched with Peck as the original Red Eagle. This is the fascinating history of the men who trained to fly and maintain covertly obtained MiGs, for the first time providing an insider's perspective, personal anecdotes, and photographs, revealing how Peck battled bureaucracy and scepticism to ultimately establish the premier fighter pilot training center – the real Top Gun.

Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Nato,2008-09 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the *ıFishbedı*. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

MiG Master, Second Edition Barrett Tillman,2014-03-15 To be equally enjoyed by professional aviators and aviation buffs with limited technical knowledge, this biography brings to life the legendary aircraft that scored the highest kill ratio of any U.S. fighter aircraft in the Vietnam War. The book is filled with authentic recreations of Crusader-MiG fights and vivid descriptions of the people and events that are part of the F-8 story, including John Glenn's 1957 record-breaking flight across the United States in three hours and twenty-three minutes. As the Navy's first supersonic aircraft, the Crusader holds an honored spot in carrier flying, and the author shows why it is called one of the most capable, versatile, and long-lived aircraft in naval aviation history. Barrett Tillman effectively combines an exciting account of the F-8's operational history with a detailed and authoritative explanation of its design, construction, and modifications. Tillman recalls the years of frustration and experimentation spent in refining the aircraft and its gunnery system, and then takes the reader through key actions in Vietnam where seasoned pilots handled their rambunctious steeds with scarcely a glance in the cockpit. Extensive appendixes provide further details.

MiG-3 Aces of World War 2 Dmitriy Khazanov,2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

MiG-21 Aces of the Vietnam War István Toperczer,2017-09-21 Having learned their trade on the subsonic MiG-17, pilots of the Vietnamese People's Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the US Air Force, US Navy and US Marine Corps crews striking at targets deep in communist territory. Although the communist pilots initially struggled to come to terms with the fighter's air-search radar and weapons systems, the ceaseless cycle of combat operations quickly honed their skills. Indeed, by the time the last US aircraft (a B-52) was claimed by the VPAF on 28 December 1972, no fewer than 13 pilots had become aces flying the MiG-21. Fully illustrated with wartime photographs and detailed colour artwork plates, and including enthralling combat reports, this book examines the many variants of the MiG-21 that fought in the conflict, the schemes they wore and the pilots that flew them.

Mikoyan Mig-29 Fulcrum Pilot's Flight Operating Manual (in English) North Atlan Treaty Organization (Nato),2007-08-01 En instruktionsbog (Flight Manual) for MiG-29 Fulcrum.

MiG Aircraft Since 1937 Bill Gunston,Yefim Gordon,1998 MiG Aircraft since 1937 reunites Bill Gunston, and Moscow-based Yefim Gordon, who previously worked together on Yakovlev Aircraft since 1924, also in the Putnam series. With their contacts in Russia, the authors have been allowed unprecedented access to the archives of both

the former Soviet Union's design bureaux and the MiG company itself. As a result, they present here the first definitive and fully accurate work of reference on all the MiG designs, complete with hundreds of photographs and drawings - several of which have never been published before - as well as previously unrecorded details of MiG variants.

Mr. MiG Paul Entrekin, 2022-11 The Soviet-built MiG-15 swept-wing fighter startled the world when it was introduced into combat during the Korean War in the early 1950s. The West had no idea that Russia could produce such a capable fighter. Some 35 years later, former Marine aviator Paul Entrekin burst onto the North American Air Show circuit with the first civilian-owned MiG-15. His story tells of the myriad of challenges in obtaining, test-flying, licensing this first-of-its-kind air show aircraft. It's a walk down memory lane that includes some of the most well-known names in aviation and shares the ups and downs, joys, triumphs, and also the tragedies and bitter losses of friends and fellow aviators. Mr. MiG is an engaging, informative, and entertaining story that any aviation aficionado will enjoy.

MiG-17 and MiG-19 Units of the Vietnam War István Tópercz, 2012-11-20 The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period.

MiG R. A. Belikov, Jacques Marmain, 1994 MiG aircraft have set fifty-five world records, twenty-one of which are still standing as this book goes to press.

Wings of Fury Robert K. Wilcox, 2010-05-11 They are America's best fighter pilots -- from the Navy, Air Force, and Marines. Heroes who push the envelope with their machines, their bodies, and the will to fight and win on their... WINGS OF FURY Here, these airborne warriors reveal themselves as never before. Ride shotgun with TOPGUN pilot Dale Snort Snodgrass as he becomes the first student pilot ever to land an F-14 Tomcat on an aircraft carrier. Silver Star winner Rob Graeter recalls a Cold War close call as he flew his F-15 Eagle over Soviet waters -- almost triggering World War III. Feel the adrenaline as Brian Rocky Fitzpatrick remembers test-flying the F/A-18 Hornet when it suddenly went haywire, leaving him with a crippled plane, a faulty parachute -- and a very long way down.... From the training grounds of Miramar to combat in Vietnam and Desert Storm, these are the stories of those who defend our skies -- and the dramatic evolution of modern air warfare.

From Farnborough to Kubinka Benjamin S. Lambeth, Rand Corporation, 1991 At the September 1988 Farnborough Air Show, the author met the chief test pilot of the Mikoyan Design Bureau, Valery Menitskii, who had accompanied the Soviet team to supervise the first flight demonstrations of the MiG-29 in the West. That contact led to several more encounters between the author and Menitskii during the ensuing year, culminating in an invitation from Menitskii to the author to fly the MiG-29. On December 15, 1989, the author flew with Menitskii at Kubinka Air Base near Moscow, thus becoming the first U.S. citizen to fly the MiG-29 and the first Western pilot invited to fly a combat aircraft of any type inside Soviet airspace since the end of World War II. This report documents that experience in detail.

MiG-17/19 Aces of the Vietnam War István Tópercz, 2016-10-20 At the beginning of the Vietnam War, the Vietnam People's Air Force (VPAF) were equipped with slow, old Korean War generation fighters -- a combination of MiG-17s and MiG-19s -- types that should have offered little opposition to the cutting-edge fighter-bombers such as the F-4 Phantom II, F-105 Thunderchief and the F-8 Crusader. Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority. Taking advantage of their jet's unequalled low-speed maneuverability, small size and powerful cannon armament they were able to take the fight to their missile-guided opponents, with a number of Vietnamese pilots racking up ace scores. Packed with information previously unavailable in the west and only recently released from archives in Vietnam, this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam.

MiG-21 Units of the Vietnam War István Tópercz, 2012-11-20 Having honed their piloting skills on the subsonic MiG-17 and transonic MiG-19, the Vietnamese Peoples' Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the USAF, Navy and Marine Corps crews striking at targets deep into communist territory. Most of the VPAF's 12+ aces scored their bulk of their kills in the MiG-21, which was then the best fighter produced by Russia's premier fast jet manufacturer, Mikoyan Gurevich. Well over 200 MiG-21s were supplied to the VPAF, and the numerous models and the schemes they wore are chronicled in great detail in this unique volume.

Thunderstorm - Nuclear carrier MiG-21's in the Warsaw Pact Laszlo Becz, 2018-11-01 The nearly 50-year history of the MiG-21 has many exciting and unpublished topics for both the flight enthusiasts and historians alike. One such topic is the ability of the airplane to carry a tactical nuclear bomb, even though its official classification was only a fighter aircraft. The successful introduction of a specialized version of the MiG-21 in the second half of the 1960s progressively expanded the nuclear potential of frontal aviation. In the '70s the Soviet Air Force command requirements were to the new type of MiG-21 aircraft whether intended for a nuclear or conventional mission will all be technically capable of nuclear bomb delivery. At some time - after the PFM manufacturing finished in 1969 - immediately start to design and develop new modular special equipment for the upcoming type of MiG-21's that widespread the MiG-21 family nuclear capability. This book tries to summarize all of the valuable information, documents, and photographic evidence that the author collected in the last 15 years about nuclear carrier MiG-21. The publication is focusing on the technical requirements, how the airplane became a nuclear carrier, how it's operated, how their special weapons handled, which equipment required for tactical nuclear bomb delivery. Contain more than 200 photos, 3D renders, drawings and pictures. In addition, the illustrations include many unpublished photographs.

Flight Craft 8: Mikoyan MiG-31 Yefim Gordon, Dmitriy Komissarov, 2011-10-30 The MiG-31 started life as an advanced derivative of the famous MiG-25P interceptor, becoming the first Soviet fourth-generation combat aircraft. First flown in 1975, it differed from its progenitor primarily in having a crew of two (pilot and weapons systems operator), a highly capable passive phased-array radar -- a world first -- and new R-33 long-range missiles as its primary armament. The maximum speed was an impressive Mach 2.82, the cruising speed being Mach 2.35. The type entered service in 1981; more than 500 copies were built between 1981 and 1994. The powerful radar and other

avionics allowed the MiG-31 to operate as a 'mini-AWACS' scanning the airspace and guiding other interceptors to their targets; a flight of three such aircraft in line abreast formation could cover a strip 800 km (500 miles) wide. To this day the MiG-31 remains one of the key air defence assets of the Russian Air Force. The book describes the MiG-31's developmental history, including upgrade programmes, and features a full and comprehensive survey of the various MiG-31 model-making kits currently available on the market.
