Mapping Migration, Identity, and Space Tabea Linhard,Timothy H. Parsons,2018-07-14 This interdisciplinary collection of essays focuses on the ways in which movements of people across natural, political, and cultural boundaries shape identities that are inexorably linked to the geographical space that individuals on the move cross, inhabit, and leave behind. As conflicts over identities and space continue to erupt on a regular basis, this book reads the relationship between migration, identity, and space from a fresh and innovative perspective.

The Atlas of Environmental Migration Dina Ionesco,Daria Mokhnacheva,François Gemenne,2016-11-25 As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities the need to study its impact on human migration and population displacement has never been greater. The Atlas of Environmental Migration is the first illustrated publication mapping this complex phenomenon. It clarifies terminology and concepts, draws a typology of migration related to environment and climate change, describes the multiple factors at play, explains the challenges, and highlights the opportunities related to this phenomenon. Through elaborate maps, diagrams, illustrations, case studies from all over the world based on the most updated international research findings, the Atlas guides the reader from the roots of environmental migration through to governance. In addition to the primary audience of students and scholars of environment studies, climate change, geography and migration it will also be of interest to researchers and students in politics, economics and international relations departments.

A Map Is Only One Story Nicole Chung,Mensah Demary,2020-02-11 From rediscovering an ancestral village in China to experiencing the realities of American life as a Nigerian, the search for belonging crosses borders and generations. Selected from the archives of Catapult magazine, the essays in A Map Is Only One Story highlight the human side of immigration policies and polarized rhetoric, as twenty writers share provocative personal stories of existing between languages and cultures. Victoria Blanco relates how those with family in both El Paso and Ciudad Juárez experience life on the border. Nina Li Coomes recalls the heroines of Japanese animator Hayao Miyazaki and what they taught her about her bicultural identity. Nur Nasreen Ibrahim details her grandfather's crossing of the India-Pakistan border sixty years after Partition. Krystal A. Sital writes of how undocumented status in the United States can impact love and relationships. Porochista Khakpour describes the challenges in writing (and rewriting) Iranian America. Through the power of personal narratives, as told by both emerging and established writers, A Map Is Only One Story offers a new definition of home in the twenty-first century.

How Money Walks - How \$2 Trillion Moved Between the States, and Why It Matters Travis H. Brown, 2013 Between 1995 and 2010, millions of Americans moved between the states, taking with them over \$2 trillion in adjusted gross incomes. Two trillion dollars is equivalent to the GDP of California, the ninth largest in the world. It's a lot of money. Some states, like Florida, saw tremendous gains (\$86.4 billion), while others, like New York, experienced massive losses (\$58.6 billion). People moved, and they took their working wealth with them. The question is, why? Why did Americans move so much of their income from state to state? Which states benefitted and which states suffered? And why does it matter? Using official statistics from the IRS, *How Money Walks* explores the hows, whys, and impact of this massive movement of American working wealth. Consider these facts. Between 1995 and 2010: The nine states with no personal income taxes gained \$146.2 billion in working wealth The nine states with the highest personal income tax rates lost \$107.4 billion The 10 states with the lowest per capita state-local tax burdens gained \$69.9 billion The 10 states with the highest per capita state-local tax burdens lost \$139 billion Money—and people—moved from high-tax states to low-tax ones. And the tax that seemed to matter the most? The personal income tax. The states with no income taxes gained the greatest wealth, while the states with the highest income taxes lost the most. Why does this matter? Because the robust presence of working wealth is the leading indicator of economic health. The states that gained working wealth are growing and thriving. The states that lost working wealth lost their most precious cargo—their tax base—and the consequences are dire: stagnation, deterioration, an economic death spiral as they continue to raise taxes and lose people, businesses, and working wealth. The numbers don't lie. _____ “When I read *How Money Walks*, I thought, ‘It’s about time.’ Finally, we have a book that addresses one of our nation’s most critical (yet rarely discussed) fiscal issues: the migration of working wealth as a direct result of personal income tax rates. Brown’s book paints a clear portrait of where money goes and why. *How Money Walks* should be required reading for anyone who wants to understand why some states struggle to retain people and businesses while others welcome billions of new dollars each year.” Dr. Arthur Laffer Founder and chairman, Laffer Associates and Laffer Investments Former economic advisor to President Ronald Reagan

It also covers politics, policies and governance as well as specific research methods. This means that whereas the chapters bring together literature in a coherent way, they are also connected to IMISCOE's online interactive Migration Research Hub for further reading and for more empirical material on migration and diversity. Atlas of Human Migration Russell King, 2007 A chronological history of the migration of humans from prehistoric times onward discusses the causes, means, and effects of mass migrations on language, societies, and empires.

The Atlas of Human Migration Russell King, Richard Black, Michael Collyer, 2010 Migration has provided millions with an escape route from poverty or oppression, ensuring the survival, even prosperity, of individuals and their families. New currents of human migration, triggered by ethnic cleansing or climate change or economic need, are appearing all the time and immigration has become one of today's most contested issues. This compelling new atlas maps contemporary migration against its crucial economic, social, cultural and demographic contexts. Drawing on data from one of the largest concentrations of migration research, the atlas traces the story of migration from its historical roots through the economic and conflict imperatives of the last 50 years to the causes and effects of flight today. Issues covered include: Refugees and asylum seekers Diasporas Remittances The 'brain drain' Trafficking Student, retirement and return migration.

Developing a Road Map for Engaging Diasporas in Development Doreen Rannveig Agunias, Kathleen Newland, 2012 State governments recognize the value diaspora populations bring to development efforts worldwide. Since 2007, the Global Forum on Migration and Development has examined ways to highlight policies and programs that can magnify the resources, both human and financial, that emigrants and their descendants contribute to development. This handbook continues that effort on the basis of earlier investigations by the book's collaborating institutions, the academic and policy literature, consultations and in-depth interviews with government officials and nongovernmental actors, and input by 62 national governments. The handbook is divided into three major parts. Each part gives concrete examples of policies and programs that have been effective, and pulls out both useful lessons and common challenges associated with the topics at hand. The pivotal question now facing many policymakers is not so much if diasporas can benefit their countries of origin but how they do so and what kinds of government policies and programs can foster these relationships.

The Atlas of Bird Migration Jonathan Elphick, 1995 Using specially devised computer-generated maps, plus full-color photos and illustrations that together represent birds in nature and in close-up detail, the atlas first explains the basics of bird migration and then traces the journeys of more than a hundred species, including detailed information and an illustration of each.
