The Evolution of the Global Terrorist Threat Bruce Hoffman,Fernando Reinares,2014-10-28 Examining major terrorist acts and campaigns undertaken in the decade following September 11, 2001, internationally recognized scholars study the involvement of global terrorist leaders and organizations in these incidents and the planning, organization, execution, recruitment, and training that went into them. Their work captures the changing character of al-Qaeda and its affiliates since the invasions of Afghanistan and Iraq and the sophisticated elements that, despite the West's best counterterrorism efforts, continue to exert substantial direction over jihadist terrorist operations. Through case studies of terrorist acts and offensives occurring both in and outside the West, the volume's contributors investigate al-Qaeda and other related entities as they adapted to the strategies of Operation Enduring Freedom and subsequent U.S.-led global counterterrorism programs. They explore whether Osama bin Laden was indeed reduced to a mere figurehead before his death or continued to influence al-Qaeda's global activities. Did al-Qaeda become a loose collection of individuals and ideas following its expulsion from Afghanistan, or was it reborn as a transnational terrorist structure powered by a well-articulated ideology? What is the preeminent terrorist threat we face today, and what will it look like in the future? This anthology pinpoints the critical patterns and strategies that will inform counterterrorism in the coming decades.

Rick Steves Italy 2017 Rick Steves,2016-12-06 You can count on Rick Steves to tell you what you really need to know when traveling in Italy. From the beaches to the Alps, from fine art to fine pasta, Italy has it all. With this book, you'll trace Italian culture from Rome's Colosseum to Michelangelo's David to the bustling elegance of Milan. Experience the art-drenched cities of Venice and Florence, explore the ancient ruins of the Roman Forum, and learn how to avoid the lines at the most popular museums. Discover the villages of Tuscany and Umbria and the lazy rhythms of the Cinque Terre. Shop at local market stalls, sip a cappuccino at an outdoor café, and pick up a picnic lunch at an allimentari. Relax and enjoy the life of Bella Italia! Rick's candid, humorous advice will guide you to good-value hotels and restaurants. He'll help you plan where to go and what to see, depending on the length of your trip. You'll get up-to-date recommendations about what is worth your time and money. More than just reviews and directions, a Rick Steves guidebook is a tour guide in your pocket.

Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World Georgios Anagnostou,Andreas Benardos,Vassilis P. Marinos,2023-04-12 Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA-AITES World Tunnel Congress 2023 (Athens, Greece, 12 – 18 May, 2023). Tunnels and underground space are a predominant engineering practice that can provide sustainable, cost-efficient and environmentally friendly solutions to the ever-growing needs of modern societies. This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed. At the same time, the tunneling and underground space community needs to be better prepared and equipped with knowledge, tools and experience, to deal with the prevailing conditions, to successfully challenge and overcome adversities on this path. The papers in this book aim at contributing to the analysis of challenging conditions, the presentation and dissemination good practices, the introduction of new concepts, new tools and innovative elements that can help engineers and all stakeholders to reach their end goals. Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures: Knowledge and Passion to Expand Underground for Sustainability and Resilience Geological, Geotechnical Site Investigation and Ground Characterization Planning and Designing of Tunnels and Underground Structures Mechanised Tunnelling and Microtunnelling Conventional Tunnelling, Drill-and-Blast Applications Tunnelling in Challenging Conditions - Case Histories and Lessons Learned Innovation, Robotics and Automation BIM, Big Data and Machine Learning Applications in Tunnelling Safety, Risk and Operation of Underground Infrastructure, and Contractual Practices, Insurance and Project Management The book is a must-have reference for all professionals and stakeholders involved in tunneling and underground space development projects.

The Best System Money Can Buy Carolyn Warner,2011-03-15 As the European Union moved in the 1990s to a unified market and stronger common institutions, most observers assumed that the changes would reduce corruption. Aspects of the stronger EU promised to preclude—or at least reduce—malfeasance: regulatory harmonization, freer trade, and privatization of publicly owned enterprises. Market efficiencies would render corrupt practices more visible and less common. In *The Best System Money Can Buy*, Carolyn M. Warner systematically and often entertainingly gives the lie to these assumptions and provides a framework for understanding the persistence of corruption in the Western states of the EU. In compelling case studies, she shows that under certain conditions, politicians and firms across Europe, chose to counter the increased competition they faced due to liberal markets and political reforms by resorting to corruption. More elections have made ever-larger funding demands on political parties; privatization has proved to be a theme park for economic crime and party profit; firms and politicians collude in many areas where EU harmonization has resulted in a net reduction in law-enforcement powers; and state-led export promotion efforts, especially in the armaments, infrastructure, and energy sectors, have virtually institutionalized bribery. The assumptions that corruption and modernity are incompatible—or that Western Europe is somehow immune to corruption—simply do not hold, as Warner conveys through colorful analyses of scandals in which large corporations, politicians, and bureaucrats engage in criminal activity in order to facilitate mergers and block competition, and in which officials accept private payments for public services rendered. At the same time, the book shows the extent to which corruption is driven by the very economic and political reforms thought to decrease it.

Geotechnical Research for Land Protection and Development Francesco Calvetti,Federica Cotecchia,Andrea Galli,Cristina Jommi,2019-06-22 This volume gathers the latest advances, innovations, and applications in the field of geotechnical engineering, as presented by leading researchers and engineers at the 7th Italian National Congress of Geotechnical Researchers (CNRIG 2019), entitled “Geotechnical Research for the Protection and Development of the Territory” (Lecco, Italy, July 3-5, 2019). The congress is intended to promote exchanges on the role of geotechnical research and its findings regarding the protection

against natural hazards, design criteria for structures and infrastructures, and the definition of sustainable development strategies. The contributions cover a diverse range of topics, including infrastructural challenges, underground space utilization, and sustainable construction in problematic soils and situations, as well as geo-environmental aspects such as landfills, environmental and energy geotechnics, geotechnical monitoring, and risk assessment and mitigation. Selected by means of a rigorous peer-review process, they will spur novel research directions and foster future multidisciplinary collaborations.

Routledge Handbook of Urban Forestry Francesco Ferrini,Cecil C. Konijnendijk van den Bosch,Alessio Fini,2017-03-31 More than half the world's population now lives in cities. Creating sustainable, healthy and aesthetic urban environments is therefore a major policy goal and research agenda. This comprehensive handbook provides a global overview of the state of the art and science of urban forestry. It describes the multiple roles and benefits of urban green areas in general and the specific role of trees, including for issues such as air quality, human well-being and stormwater management. It reviews the various stresses experienced by trees in cities and tolerance mechanisms, as well as cultural techniques for either pre-conditioning or alleviating stress after planting. It sets out sound planning, design, species selection, establishment and management of urban trees. It shows that close interactions with the local urban communities who benefit from trees are key to success. By drawing upon international state-of-art knowledge on arboriculture and urban forestry, the book provides a definitive overview of the field and is an essential reference text for students, researchers and practitioners.

Italy since 1989 Vittorio Bufacchi,Simon Burgess,2016-01-08 Italy Since 1989 provides the first in-depth, fully documented account in English of the extraordinary last eleven years in Italian politics. Bufacchi and Burgess take the transition to a new Italy as their point of departure, and conduct a guided tour through the massive changes that the country has recently undergone with the collapse of the party-state, attempting to explain as well as understand events along the way. The authors provide extensive coverage of the judicial uncovering of bribery and corruption, and the journey culminates in an entirely original examination of the general election of April 1996. This revised edition includes a fresh introductory chapter, bringing up to date the chronicle of events.

The Rough Guide to the Italian Lakes Lucy Ratcliffe,Matthew Teller,2009-04 A travel guide that covers various top attractions and scenic journeys in the Italian Lakes. It provides accounts of the major tourist sites that characterise the Italian Lakes from the baroque gardens and hidden palaces on the ridges of green mountainside split by Lake Maggiore to the palm-shaded promenades on the western shores of Lake Garda.

A Social Dreaming Experience at the Time of COVID 19 Elisabetta Pasini,Cinzia Trimboli,2023-12-09 The book describes the experience of four Social Dreaming Matrices held online between March and May 2020, during the first lockdown caused by the Covid 19 emergency. The pandemic isolated us and imposed prolonged contact with ourselves and our solitary thoughts. Against this backdrop, there was hope for change, a desire for a different kind of sociability and different forms of intimacy. On the basis of this evidence, our research supports the shift from experiencing trauma to reacting to trauma, looking at a collective traumatic experience not only as something to be overcome but as an opportunity for a transformation that changes our mental schemes in relation to the external context. We have identified Social Dreaming as a privileged technique to overcome a collective traumatic experience, supporting its elaboration through collective feelings, new connections between intuition and rational thought, the discovery of community meanings. The authors's thesis is that the much-needed transition from 'magical thinking' to 'transformative thinking' takes place in a setting that is able to contain the anxieties of life's transitional phases, supporting the creation of new rituals and new social bonds and sustaining the passage from “me” to a “wider we”.

Death Or Deception Felix Siddell,2006 Examining the key works of Buzzati and Morante, Siddell looks at two coexisting and conflicting approaches: one which defined place as an outcome of individual perception, and another in which place is understood as an arrangement of locations separate from the individual. The progression of Buzzati's texts from plausible indications of location to perception-bound space is examined, as is Morante's use of enclosed spaces as the basis of a conceptualisation of elsewhere, paying attention to the contrast and interaction between opposing constructs of place.
